## The story of **Mokki from Norway**

With over 30 years of experience, Mokki's story began in Oslo with the vision of producing original eyewear for the Norwegian market. Stadily, we have grown to become one of the leading designers and suppliers of glasses in Scandinavia.

Our eyewear has always been inspired by the local lifestyle and nature. It incorporates everything everybody loves about Scandinavian design - the clean lines, the uncomplicated functionality and the unmatched quality. Our eyewear is designed and developed in-house, with great attention to details and while keeping in mind the toughest Norwegian weather conditions our eyewear will be exposed to.

Mokki's products are available in over 300 shops, optician stores and pharmacies, and is also sold in several online webstores. Today, the Mokki brand name is to be found internationally.

## Mokki Click & Change

Mokki Click & Change is a revolutionary new invention in the world of babys' and toddlers' eyewear, coming to you straight from Norway.

Our top-notch kids eyeglasses provide the most comprehensive protection for your child's underdeveloped eyes, in any weather condition, environment or activity, from birth to the age of 5 years.

The core of **Click & Change** begins with a casing that contains two complementing pairs of sunglasses, each fitted with its own unique lens;

The *first pair* is fitted with *bluelock* screening lenses for normal sunlight conditions and urban environments.

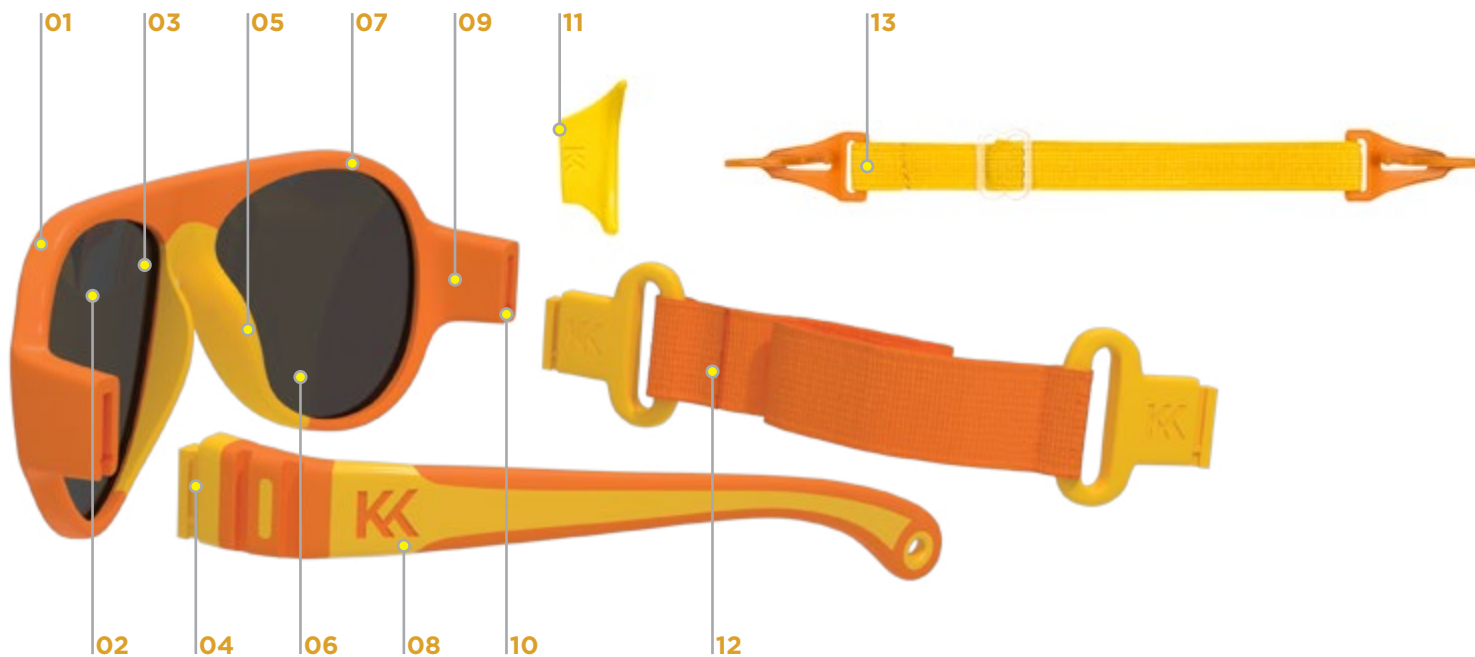

The *second pair* is fitted with *polarized* lenses for highly reflective surroundings such as the beach or in snowy weather.

The technological specification of each lens, in combination with the child-tailored ergonomic design of the frames, offer unmatched quality and sun protection for the eyes. The Click & Change experience is maximized with the additional pair of ScreenSafe glasses and the Accessory Kit.

## Why Click & Change?

- *Optimal sun protection everyday*
- *Highest quality*
- *Ideal comfort*
- *Innovative and adaptive*
- *Norwegian Design*
- *Additional screentime protection*

## Key Characteristics

(01) Completely child-friendly. Free of any screws and small parts. Contains no harmful chemicals or pigments.

(02) Urban pair equipped with PC BlueBlock Lenses, for ideal visual comfort. Uniquely screens harmful HEV (high-energy visual) blue light in daily use.

(03) Outdoor pair equipped with PC Polarized Lenses, for optimal visual clarity. Developed for activities in highly reflective surroundings such as near water sources, snowy landscapes or bright dunes.

(04) Click-on, Click-off. The unique Click & Change mechanism is versatile and simple to use.

(05) TPR nose-pad for ultimate comfort and snug fit.

(06) Unmatched ultra-light materials. Frame for ages 0-2 weighs at only 13.8 grams.

(07) Larger frames are ergonomically designed for the natural facial curvature of children. Developed by experts and tested by children, for improved comfort and maximum sun protection.

(08) Highly bendable and soft Temple Arms for perfect fit and comfortable daily use.

(09) Our TPE-E and TPR materials are specifically designed to withstand the most intensive handling by children.

(10) All parts made in Taiwan under Norwegian supervision.

(11) Removable SideShields ensure maximal protection against lateral sunrays.

(12) The adjustable elastic headband is extra-soft and comfortable. It makes sure the glasses stay on during any activity, no matter how intense.

(13) Removable Neck Strap that ensures the glasses stay on during day to day use.

Children love to spend a lot of time outdoors. Wearing high-quality sunglasses is all the more important to ensure maximum sun protection and optimal visual clarity. Mokki Click & Change offers ideal sun protection in every weather condition, surrounding and activity.

Click & Change is tested and loved by children. We make use of high quality materials that are soft and flexible to ensure prolonged and safe use.

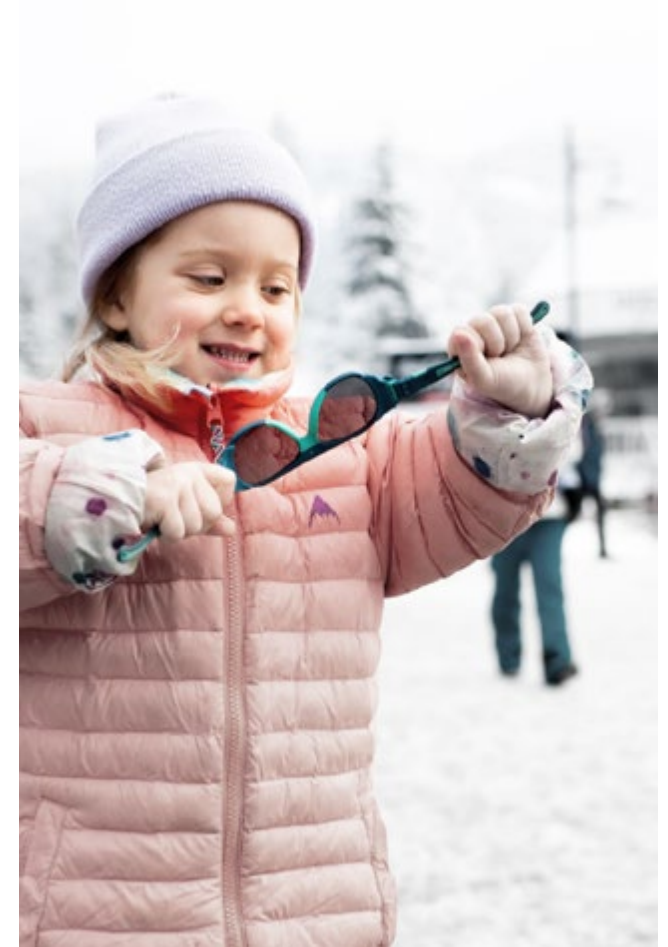

The ergonomic design fits perfectly the natural facial curvature of babies and toddlers. It assures ultimate comfort and optimal light blocking.

Adaptability is the name of the game. Our Click & Change glasses can easily be altered according to one's needs. The playful design and easy switching encourage independence and child development.

To protect the eyes, the everyday life of children requires well thought-out solutions that are at the same time simple. The unique Click & Change system is completely adaptable - from the lens type, all the gripping method and the activity taken place.

Click & Change is the innovative result of our small and industrious R&D department. The unique design was developed in Norway and tested by kids in Norwegian conditions.

*Click & Change Line-Up*

### **Ultimate sun protection for babies and toddlers**

The innovative Mokki Click & Change sunglasses concept is a successful result of many years of research and development by our team of experts. The glasses make use of only high quality materials, lenses and unique ergonomic geometry.

### **A simple click-system enables any kind of combination**

Depending on the requirements, the frame and glasses can be individually combined with a unique system. You can choose between flexible side arms or a headband. The glasses are available in two different sizes (0-2 years and 2-5 years) and in 5 different colors. Mokki Click & Change is made exclusively from environmentally friendly materials. The glasses frame is without any screws and small parts.

The product adheres to the requirements of  
Directive 89/686 / EEC according to the  
EN-ISO 12312-1: 2013 / A1: 2015 standard  
(sunglasses for general use)

## Mokki Click & Change Sunglasses

Mokki Click & Change offers 100% UV protection.  
Every box set includes two complementing pairs of glasses with different lenses and accessories:

*Outdoor frame with polarized \* lenses for strong reflections  
(sea, snow, bright sand etc.) (1)*

*Urban frame with blue-block filter for everyday use  
(city, forest etc.) (2)*

*Removable sideshields for extra sunlight protection (3)*

*Flexible temple arms with an ergonomic fit (4)*

*Comfortable and adjustable headband (5)*

*Removable neck strap, so that the glasses do not fall off the head (6)*

*SunnyBuddy microfibre cloth (7)*

*Protective cotton pouch with two pockets (8)*

*\*This increases the contrast and visual comfort and so the colours are clearer,  
sharper and disturbing reflections are eliminated.*

## Mokki Click & Change Accessory Kit

The Click & Change Accessory Kit allows you to customize your style and experiment with many color combinations.

Each box contains:

*Flexible headband*

*Elastic temple arms*

*Two pairs of side sunshields*

*Extra SunnyBuddy microfibre cloth*

## Mokki Click & Change ScreenSafe

Today children spend prolonged periods of time in front of the screen. Whether it is television, computer, tablet or smartphone - all screens emit harmful levels of HEV (high-energy visible) blue light, which leads to eye strain, eye fatigue, sleep disorder, weight-gain and other health problems such as lack of concentration, and headaches. Mokki Click & Change ScreenSafe fully protects your child from the harmful effects of HEV blue light.

The stylish Click & Change ScreenSafe glasses are suitable for daily use during prolonged periods of time in front of all screens. This product package contains only one pair of glasses. The appropriate Click & Change accessories must be purchased separately.

*Yellow Lenses, Category 1*

*Ideal 93% screening of HEV Blue Light*

*100% BPA free*

*Anti-scratch coating*

*Anti-reflection coating*

*Ergonomic design*

*Suitable for prescription lenses (Rx)*

**Mokki Click & Change Multi+**  
With Photochromic Lenses

Photochromic innovative technology offers ultimate eye comfort by changing the darkness of the lenses, from Category 0 to Category 3, in a short moment, according to the varying lighting conditions, defined by changing settings and environments. Thus making the glasses ideal for a wide range of activities, both indoors and outdoors. The protective properties of the lenses, such as UV blocking, are permanent.
