REVOLUTIONARY CHAIR SIDE FILTER FOR THE SUCTION SYSTEM

BiomatFilter™

the BIOMAT filter, a revolutionary chair side filter for the suction system. The BIOMAT filter is connected to the spittoon at the beginning of the suction line, and clears the suction flow without a decrease to the vacuum power. This is achieved thanks to its multi stage filtration technology and unique design. The filter will clear the suction stream and protect all electric, and non-electric separators.

The filter is independent and can be installed on any type of dental unit

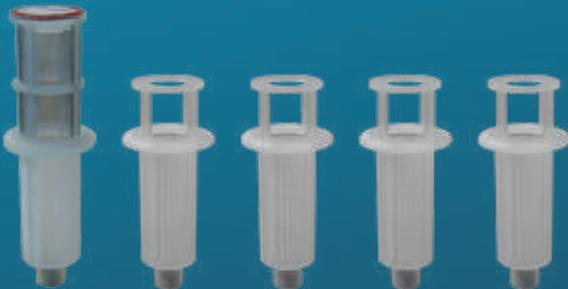

BIOMAT FILTER KIT:

Safety mount with release pin

4 standard filters for powerful vacuum
+ Particle Filter

Biomat Filter

Additional canister + sealed cap
