

GALIT

EXPERT IN DENTISTRY

Dental equipment

For more than 20 years GALIT is determined to supply the best dental equipment and innovative solutions to professional dentists around the world.

Our focus on exemplary service forms a loyal long-term relationship with our customers. More than 5,000 dentists have already tested the quality and reliability of our equipment. All this is possible due to careful monitoring of the requirements of our customers, as well as principles that are fundamental to GALIT.

In our work we are constantly guided by the following values:

- Quality - we work to the highest quality standards in everything we produce.
- Trust - respect, honesty and sincerity guide our actions to do the right thing.
- Care - our customers inspire us to act faithfully and passionately.
- Innovations — we optimize the latest technologies to achieve mastery in dentistry.
- Partnership - we work with professional dentists and our partners to win TOGETHER.
- Commitment - we work diligently and efficiently to provide exceptional results with the best customer service.

Brand new concept No Stress

Benefits for Dentists:

- Save money as no service lines are required.
- Easy to move between treatment rooms or locations.
- Perfect fit for small treatment rooms.
- Continued treatment without stopping for technical maintenance.
- Can be tailor-made for specific treatments.

Benefits for Patients:

- Can be easily hidden to create a more patient friendly environment.
- Designed with the highest ergonomic standards and the most advanced technologies to reduce noise and improve air quality.

Benefits for Technicians:

- The module system allows for simple and quick installation.
- Technical assistance is available immediately.
- Every service point is easily accessible.

GALIT AUTONOME

The Galit Autonome dental unit with a built-in compressor, aspirator, container for secretions – the ideal solution for clinics where it is impossible to provide service lines. Unit is autonomous and independent – easy to install and move.

The main advantages of GALIT AUTONOME:

- Galit Autonome – a completely independent unit of the supplied air, vacuum, water and sewage networks.
- Massive and stable design for mounting additional equipment. The microscope, X-ray and monitor can be conveniently placed for easy operation.
- Components are from leading European manufacturers with warranty service.
- Long arms of the lamp for convenience in carrying out medical procedures.
- Compressor with dehumidifier and stainless steel tank is built into the cuspidor unit.
- Suction unit with bactericidal filter is built into the cuspidor unit.
- Water container for glass filling and spittoon flushing. The container for secretions is in the cuspidor unit.
- Dental Unit works with a low noise level, it is comfortable for the doctor and for the patient.
- Bactericidal HEPA filter (H14) protects the air in the dental office from viruses and bacteria, filtering it up to 99.9%.

GALIT OMNIPRATIQUE

The Galit Omnipratique dental unit is our bestseller.

More than 4 000 leading clinics around the world have chosen Galit Omnipratique for their daily work.

We have created an ergonomic and functional dental unit with a perfect design, because every part and every process is important to us. Carefully selected components of the Galit Omnipratique dental unit are combined with each other for high-performance work and perfect results.

The main advantages of GALIT Omnipratique:

- Components are from leading European manufacturers with warranty service.
- Cuspidor unit can be floor-standing or mounted on the chair.
- Unique selection of options to meet your dental requirements.
- Possibility to choose up to 10 dental instruments for reliable and effective treatment.
- Assistant console can be moved horizontally and vertically.
- Dental patient chairs are designed for ultimate comfort with a number of options to choose from.
- Easy for maintenance and access for medical personnel and service workers.

GALIT PRO

The Galit PRO dental unit is our premium model designed for dentists who demand higher standards of equipment quality.

The main advantages of GALIT PRO:

- Massive and stable design for mounting additional equipment. The microscope, X-ray and monitor can be conveniently placed for easy operation.
- Exquisite Italian design.
- Components are from leading European manufacturers with warranty service.
- Compact cuspidor unit for optimal use of working space.
- Possibility to choose between a floor-standing cuspidor unit or mounted on the chair.
- Long arm of the lamp for convenience during treatment.
- Mechanical pantograph of the doctor console with pneumatic fixation.

GALIT AMBIDEXTRE

Practical and universal GALIT AMBIDEXTRE — an optimal solution for clinics where one dental unit can be used by a right-handed and left-handed dentist.

The main advantages of Galit Ambidextre:

- A unique rotation mechanism allows for the doctor console and assistant console to be easily moved from right to left in just a few seconds.
- Components are from leading European manufacturers with warranty service.
- Exquisite Italian design.
- Optimal use of workspace.
- Possibility to choose the mounting of the lamp and the doctor console to the ceiling or to the chair.
- Even more space to communicate with your patients.
- A wide range of configurations for exceptional comfort during treatment.

GALIT CONSOLE

The design of the Galit Console dental unit frees up additional space for more comfortable work.

The patient chair is attached to the cuspidor unit, thus freeing up more space for legs of the dentist and assistant, without restricting the movement during the treatment.

The patient chair is designed for ultimate comfort with a number of options to choose from:

- Lifting and backrest movements.
- Program to reset to "0" position.
- Foot control on the chair base.
- Safety stop on the chair base and on the backrest.
- UNI headrest.

Components are from leading European manufacturers with warranty service.

Cuspidor ceramic bowl of rotary type is with rinsing and cup filling electronic control.

Modern design of the dentist console with upper / lower delivery of hoses, including electronic spray regulation.

Control panel to control chair and unit operation with power adjustment of all dynamic instruments.

Cassette for sterilization

Cassettes for sterilization produced by Galit using special technology!

Special stainless steel processing technology eliminates sharp edges on the cassette and gives the metal a noble matte appearance.

Materials: stainless steel and silicone.

The cassette is equipped with a pulling clip for fixation, securely attached to it.

In the closed position the clamp reliably fixes the tools.

Silicone inserts are available in six colors: purple, yellow, magenta, red, blue, green.
