HISTORY

- 2002. 12 Foundation of HT
- 2002. 12 Introduces "Miso" Bracket
- 2004. 11 Obtained ISO9001 Certificate
- 2005. Introduces "De-Bonding pliers"
- 2005. 01 Obtains SFDA Certificate
- 2005. 06 Obtains CE Certificate
- 2005. 07 Obtains FDA 510(K)
- 2006. Introduces "Cute" Bracket
- 2006. 02 Obtains KGMP Certificate
- 2007. Introduces "Ideal" Bracket
- 2007. Introduces "ETS" Bracket
- 2007. Introduces "Cross-M" Bracket
- 2008. Introduces "Miso Mini" Bracket
- 2009. Introduces "Cross-C" Bracket
- 2011. 07 Moves to new office
- 2012. Draws up development of "Nano Bubble Oral Clener"
- 2013. Draws up development of "Cross-MA" and "Miso Auto" Bracket
- 2014. Introduces "Miso Plus" Bracket
- 2017. Opens Czech office
- 2018. 08 Obtains Russian Registration Certificate
- 2018. 12 Completion of new facility

MISO SERIES [SUPERIOR AESTHETIC SAPPHIRE BRACKETS]

Size Ratio

※ Actual product may differ from image shown

"miso" is a Korean word that refers to smile and it is reminiscent of a beautiful smile.

- **Transparent appearance:** Crafted to the highest aesthetic standard.
- **"RMM" Base technique provides:** Bonding strength comparable to a mesh pad, Minimal distress to enamel surface while de-bonding.
- **Heat treated:** Increased the strength of brackets.
- **Allergic free:** Monocrystalline Sapphire does not contain nickels or other metal substances.
- **Stain resistant:** Does not get stained throughout treatment.
- **Accurate placement:** Color coded ID for easy identification and placement.

※ Actual product may differ from image shown

Poly-Crystalline Ceramic Bracket with specially designed shoulder

- **Interactive design:** Specially designed shoulder provides an interactive treatment (Passive & Active)
- **Maximum bond strength:** 80 Diamond mesh base shape provides maximum bond strength
- Translucent appearance increases the aesthetic feeling
- Rounded corner creates a simple image and increases patient's comfort
- Decreases the time of treatment due to the low friction between wire and ligature ties

※ Order option: Kit and Bulk available

CUTE

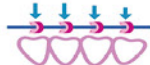

Instruction

1. Close Type

1) Insert arch wire step by step with narrow tip pliers.

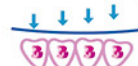

2) After inserting arch wire, sequential bonding on each teeth.

2. Open Type

1) Insert arch wire by sequence

2) Insert arch wire up and down

By bonding open type by sequential up and down, retention of archwire can be acquired without adding flowable resin. This method is adequate for the thicker size archwire during arch retraction or adjustment of arch width.

Cute-Bracket is designed for an efficient movement of teeth in harmony with the main brackets.
(Auxiliary brackets)

- Much smaller size than the normal bracket
- Enhanced bonding strength
- Can approach the narrow and/or deep obstructed teeth
- Ability to use as segmental adjustment working in harmony with the main bracket (buccal or lingual)
- Can be used alone for minor teeth alignment
- Depends on the conditions of patient, it can be used in many different purposes
- Easy bonding and clear de-bonding : short chairside time is necessary
- Open type and Close type available

EXAMPLE FOR APPLICATION OF CUTE

1) Narrow bonding spaces

- Due to its narrow dimension, Cute-bracket can be bonded even on the cusp of teeth
- Also it can be bonded without removing of existing arch wire
- Can control a deep obstructed teeth

2) Segmental adjustment

Lingual movement of anterior 4 teeth After arch expansion

- During buccal or lingual treatment, segmental teeth movement can be easily accelerated by using Cute-bracket
- Especially in the case of lingual movement, it can be utilized with lingual arch very well

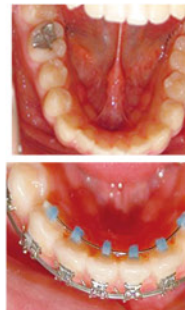

3) Single tooth adjustment

Transposition of upper left lateral incisor and canine

- Apply counter forces of canine after lingually repositioning of canine by using Cute-bracket and lingual arch

4) Control of partially relapsed teeth

- Cute-bracket can work independently or with other mechanics for correction and play the role of fixed retainer after the correction without any break for modification or troublesome wire bending for new retainer

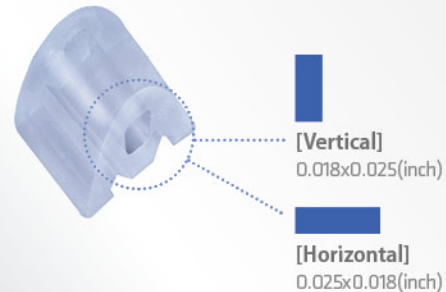

5) Control of deciduous or esthetic therapy

○ Location of CUTE

- Mandibular space closing with cute-bracket and anterior fixed retainers

ETS

ETS is useful for indirect anchorage and partial orthodontic treatment.

- Comfortable and aesthetic by smaller size and simple structure
- Possible to bond with ETS where it is difficult to bond with regular bracket
- Valuable when used together with the indirect skeletal anchorage
- Able to create natural torque by using both horizontal and vertical
- Useful for partial orthodontic treatments
- Easy for oral hygiene management
- Horizontal type and Vertical type available

※ Order option: Kit(20pcs)and Bulk available

Direct bonding technique

Indirect bonding by tray or transfer zig

Insert arch wire: use small beak pliers

EXAMPLE FOR APPLICATION OF ETS

1) Anterior alignment

[Upper]

[Lower]

2) Correction of single-tooth rotation

3) Torque control by lingual leveling

EXAMPLE FOR APPLICATION OF ETS

Alignment of blocked-out maxillary lateral incisors

[Pre-treatment]

- Because of deep bite it is difficult to place the conventional brackets during correction of crossbite.

[After 3 Months]

- Space gaining with open coil spring for #12,22
- Bonding of ETS
- 012 Niti

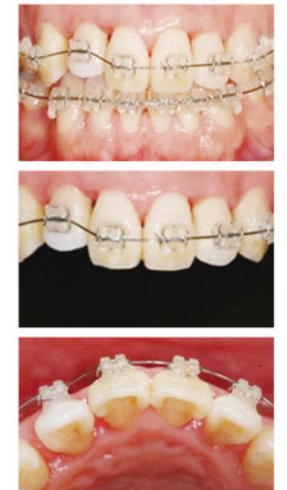

[After 5 Months]

- Laterals are intruded and moved labially

[After 6 Months]

- Bonding of conventional bracket
- Insertion of continuous arch wire

TUBE

Bondable Single Buccal Tubes (Non convertible)

- Funneled entrance design, easier to put into the archwire
- MIM Buccal tubes with Stainless Steel 17-4
- 80 mesh base with two pads with different sizes increases bonding strength
- Color coded indents on the facial surface assist bonding and positioning
- Positioning Notch for adjusting

※ Order option: Set(4pcs) and Bulk available

MISO WIRES

Pre heat-treated Stainless Steel Archwire

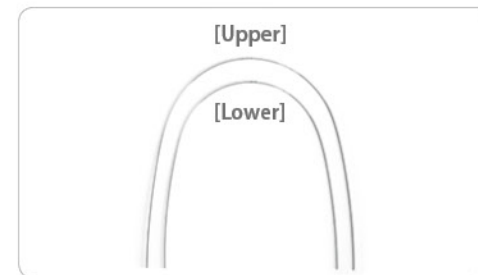

- Uniquely pre heat-treated and stress-relieved
- Increased resilience to improve mechanics
- Forming ensures precise arch forms
- Excellent for all orthodontic and orthognathic treatment

NiTi Superelastic Archwire

- Super Elastic Wire with full shape recovery
- Higher residual forces of recovery for efficient tooth movement
- Lower load forces of engagement
- Reduced number and frequency of archwire changes
- A smoother surface helps to minimize friction during treatment

MISO DELUXE DE-BONDING PLIERS

- Ergonomic design for easy bracket removal
- Go through precision processing(0.01mm)
- High quality material

Patent Number: 10-0746634

MISO DE-BONDING PLIERS

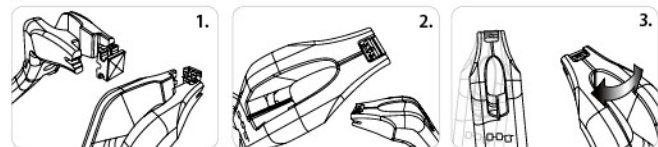

Easier and safer way of de-bonding the bracket

- Produced the highest quality, corrosion resistant stainless steel
- Prevent the fracture on bracket
- Possible to remove the bracket even with the ligation of wire
- Provide easier and comfortable handling for users
- Able to use with other bracket brands

How to use

Patent Number: 10-0746634

INSTRUMENTS

Utility Pliers

Product	Model No.	Description
 How Plier	Model No. 151	Long well tapered shape. With 0.094" (2.4mm) gripping pads which are serrated and shaped, so that their center line coincides with the axis of the rotation of the plier and holds the wire securely. Beaks are rounded to be completely lip safe.
 Utility Plier Weingart	Model No. 154	Classic design, general utility plier. Pointed serrated tips. Holds wire firmly at convenient angle. The beaks are rounded to make the plier completely mouth safe. Useful for removal of ceramics.

Loop Forming, Bending and Laboratory Pliers

Product	Model No.	Description
 Bird beak Plier	Model No. 101	It is used for working round wires up to .030" (0.76mm) in diameter. The beaks are .025" (0.64mm) at the tip. The beaks are parallel at .020" (0.51mm) opening.
 Tweed Loop Forming Plier (1 Piece)	Model No. 102	It has got a fixed, one-piece tip with three forming sections for making Omega loops. The tip sections measure .060", .090" and 0.120".
 Light Wire Plier	Model No. 103	The beaks are more tapered and longer than Bird Beak Plier. Excellent for bending small diameter loops. For wires up to .016" (0.41mm).

Pliers, Direct Bonding Bracket & Band Removers

Product	Model No.	Description
 D.B. Bracket Removing Plier	Model No. 201	Useful for ceramic and stainless steel brackets. The tips wedge between edge of bracket and tooth surface remove it with ease. Completely lip safe.
 D.B. Bracket Removing Plier, with pad	Model No. 202	Designed for quick and comfortable removal of direct bond brackets. It will also remove adhesive from the tooth.

Utility Pliers

Product	Model No.	Description
 Posterior Band Removing, Plier, long	Model No. 203	Will remove bands with maximum patient comfort. The tip is postured in the middle of the pad for band removing easily. A plastic padded tip and a sharp removing beak allow, with slight pressure, easy band removal.
 Direct Bond Bracket Removing Plier, angled	Model No. 206	Ideal for quick and safe removal of direct bond brackets. The 60° angle allows access to anterior and posterior brackets.

Wire and Ligature Cutters

Product	Model No.	Description
 Distal End Cutter with safety hold	Model No. 211	It shear cuts hard wire and braided wire and then, safely holds the loose distal ends of the wire, thus preventing from falling down into the oral tissues. The cutting edges are diamond honed. Maximum cutting capacity: rectangular and twist wires up to .022" x .028" (0.56 x 0.71mm); round wires up to .020" (0.51mm) in diameter.
 Mini-Distal End Cutter with safety hold	Model No. 212	Just a smarter version!
 Flush Cut Distal End Cutter	Model No. 213	It cuts flush to the buccal tube and holds loose distal wire ends.
 No. 332 Pin and Ligature Cutter, straight	Model No. 214	It is designed for easy and efficient cutting of pins and ligatures. The cutting edges are diamond-honed. Maximum cutting capacity: Soft wires up to .015".
 Mini Pin and Ligature Cutter, straight	Model No. 215	Designed as a miniature ligature cutter. The tips are very fine for easy access into the difficult areas of the mouth. Maximum cutting capacity: Soft wires up to .015".
 Hard Wire Cutter, straight	Model No. 216	Provided with tungsten carbide inserts to provide extra hardness required for cutting all sizes and types of archwires. Maximum cutting capacity: Rectangular wires up to .022" x .028" and round up to .020".
 Mini-Pin and Ligature Cutter, 7 degree	Model No. 217	Provided with 7° cutting angle for easy access. Maximum cutting capacity: Soft wires up to .015".
 Pin and Ligature Cutter, 15 degree	Model No. 218	Provided with 15° cutting angle for easy access. Effective for cutting all soft wires, pins and elastics up to .015".
 Hard Wire Cutter, 15 degree	Model No. 219	Provided with 15° cutting angle for easy access with tungsten carbide inserts to provide extra hardness required for cutting all sizes and types of archwires. Maximum cutting capacity: Archwires up to .022" x .028"

LIGATURE TIES

- Latex-Free

MISO S GEL

Temporary mucosal protector

[Soft. Shield. Save time. Super easy removal.]

- Light Curing
- Flowable, easy application
- Easy to remove at once
- Most effective at the beginning of orthodontic treatment
Can reduce irritation and pain

MISO RETAINER

Available Sizes : 1mm*200mm*1unit / 2mm*200mm*1unit

Splinting

- Is Quick, Clean and Simple
- Is comfortable for patient-smooth & highly esthetic
- Supports teeth effectively
- Has superior durability
- Is easy to remove when necessary

Orthodontic retainer

- Aesthetic
- Metal free-comfortable for patient
- A quick application
- Easy to adapt directly to teeth and bond in place

Implant temporary

- Aesthetic
- Easy to make implant temporary prostheses
- Easy to remove when necessary

TYPODONT

Available options

- Plain (without brackets)
- With Mono Ceramic (sapphire) brackets
- With Metal brackets
- With Poly ceramic brackets
- With Mono Ceramic brackets+ Metal brackets
- All desired combinations of HT products

[Plain]

[With MISO]

[Combination]

※ Actual product may differ from image shown

ORTHODONTIC RETAINER CASE

- Whitening tray case
- Can keep Mouth goods clean
- Can Keep musical instrument mouthpiece and contact lens
- Designed for high durability
- Sophisticated design with various colors
- Portable size and light weight

- 81mm*67mm*36mm / 35g
- Made of ABS material

- 82mm*74mm*29mm / 29g
- Polypropylene(sky)
- 82mm*74mm*29mm / 40g
- ABS(white)

SOCIAL CONTRIBUTION PRODUCTS
