

RESORBA® High-End Solutions for Oral Surgery

Advanced Medical Solutions

RESORBA® Collagens

- Absorbable collagen sponges and cones which are used as haemostatic agents after tooth extractions and oral surgery
- Quick and complete integration into the surrounding tissue
- Able to absorb large amounts of fluids on account of their sponge-like structure
- Optionally with antibiotic protection for risk patients (diabetics, multimorbid or immunocompromised patients, etc.)

RESORBA® Membranes

- Absorbable Collagen Barrier Membranes in 3 different types
- Easy to trim and to adapt
- Can be used on both sides, no fixation required
- Quick and complete integration into the surrounding tissue

RESORBA® Bone Substitutes

- Absorbable Bone Substitutes for Bone Augmentation Procedures in 2 different types
- Porcine Xenograft Particulate
- Biphasic Calcium Phosphate, 60% HA / 40% β -TCP (MBCP® Technology)
- High porosity thanks to interconnected macro and micropores

RESORBA® Sutures

- Absorbable and non-absorbable sutures
- Atraumatic due to optimal transition between needle and thread
- PTFE assortment adapted to dental surgery
