

BE AWARE!

No other Fiber Post **MASTERS** Light Transmission & Radiopacity like Super Fiber Post (Serrated)

Pushing the boundaries of what is possible, the iLumi's Super Fiber Post (serrated) incorporates the latest fiber optic technology. It maximizes light transmission and delivers photocuring light to the apex, suitable for LIGHT or DUAL cure resin cement, providing a one-step process post and core build-up. It is primed to save time and expertly notched to have extra core bonding strength. More than 5X radiopacity provides extra detailed X-ray visibility. A low modulus of elasticity reduces root fracture. It is esthetic, metal-free non-corrosive, and biocompatible.

Mechanical Properties

| Color code | Item | Description |
|-------------------|---------|---|
| Assort Kit | SK-9123 | 15 Super Fiber Post (Serrated), 5 each Ø1.35, 1.47, 1.67mm & 3 Matching Drills. |
| Yellow | SR-9135 | 10 Super Fiber Post (Serrated) Ø1.35m. |
| Red | SR-9147 | 10 Super Fiber Post (Serrated) Ø1.47m. |
| Blue | SR-9167 | 10 Super Fiber Post (Serrated) Ø1.67m. |
| Yellow Kit | SD-9135 | 10 Super Fiber Post (Serrated) Ø1.35m & 1 Matching Drill. |
| Red Kit | SD-9147 | 10 Super Fiber Post (Serrated) Ø1.47m & 1 Matching Drill. |
| Blue kit | SD-9167 | 10 Super Fiber Post (Serrated) Ø1.67m & 1 Matching Drill. |
