

TRUABUTMENT INC.

Dedicated to providing the highest quality of custom abutments and other related dental solutions, TruAbutment continues to expand its horizons in the market. In 2017, TruAbutment launched their most widely recognized solution - customized overdenture abutments for both fixed and removable dentures. And in 2018, the Angulated Screw Channel (ASC) solution was launched to provide a convenient way to restore areas with limited insertion path, especially in the anterior. The custom abutments are individually designed per each implant placement for better maintenance and a precise fit. The company guarantees one of the most extensive compatibility with all major implant systems and provides lifetime warranty on their abutments. Experience the Tru Solution!
