Restorations are available with monolithic full contour crowns, bridges, veneers or full arch:

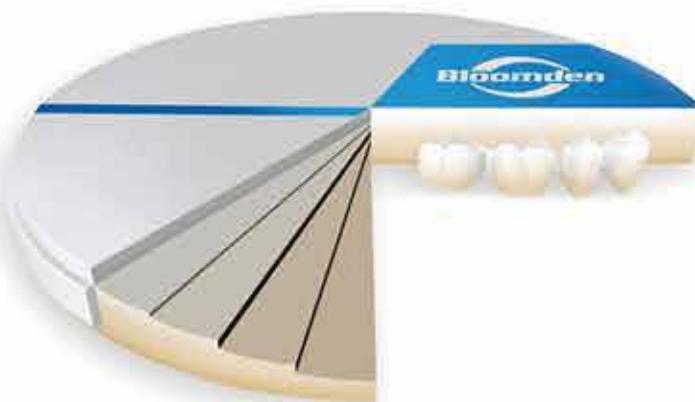

Vita® 16 shades and Bleach 4 shades

Features of 3D Pro-ML Gradient Zirconia

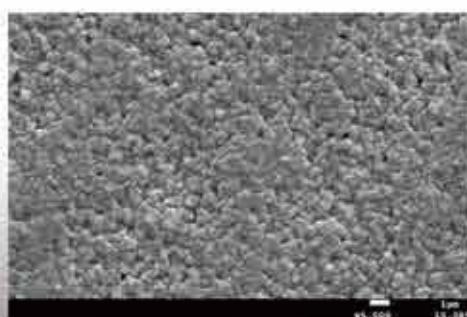

► Outstanding Aesthetics

Bloomden 3D Pro zirconia block from incisal end 49% to cervical end 42% translucency, the incisal end effect is able to ensure the translucency of enamel, meanwhile the cervical end low translucency can realize the shading effect. After sintering, the restoration has a realistic appearance, natural color, and matches with VITA color shade guide.

► SEM images, 5K magnifications.

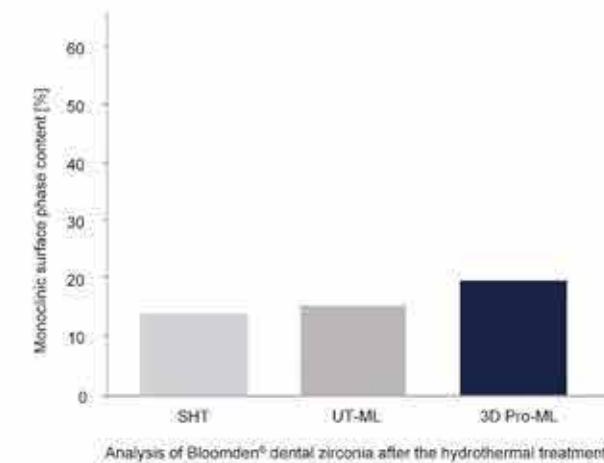

Bloomden® 3D Pro Multilayer Zirconia

Branded competitive Zirconia
—highlighted impurity

► Superior Ageing Resistance

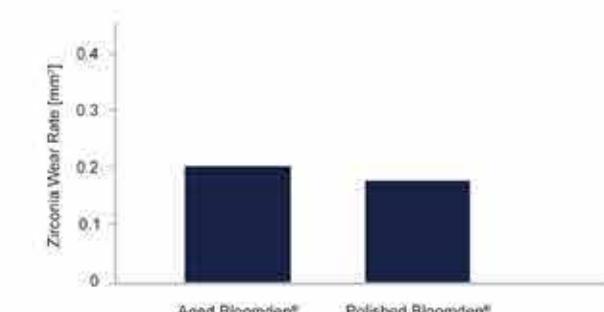

Unique hydrolysis microstructure and chemical formula of Bloomden 3D Pro can resist aging from cubic phase to monoclinic phase.

The fast sintering cycle produces the same crystalline structure inside the zirconia as the standard sintering cycle, which means dental lab technicians can fabricate reliable-quality dental restorations in couple days.

► Chairside Fast Sintering

3D Pro supports chairside fast sintering while ensuring strength, translucency, and aging effect.

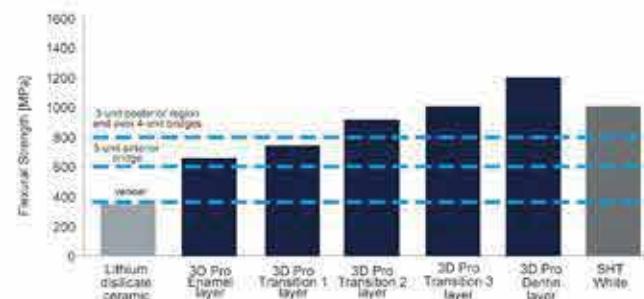

► Low Wear Rate

Bloomden 3D-Pro zirconia has less wear on natural enamel and maintains a good initial shape of the natural enamel surface.

► Super High Strength

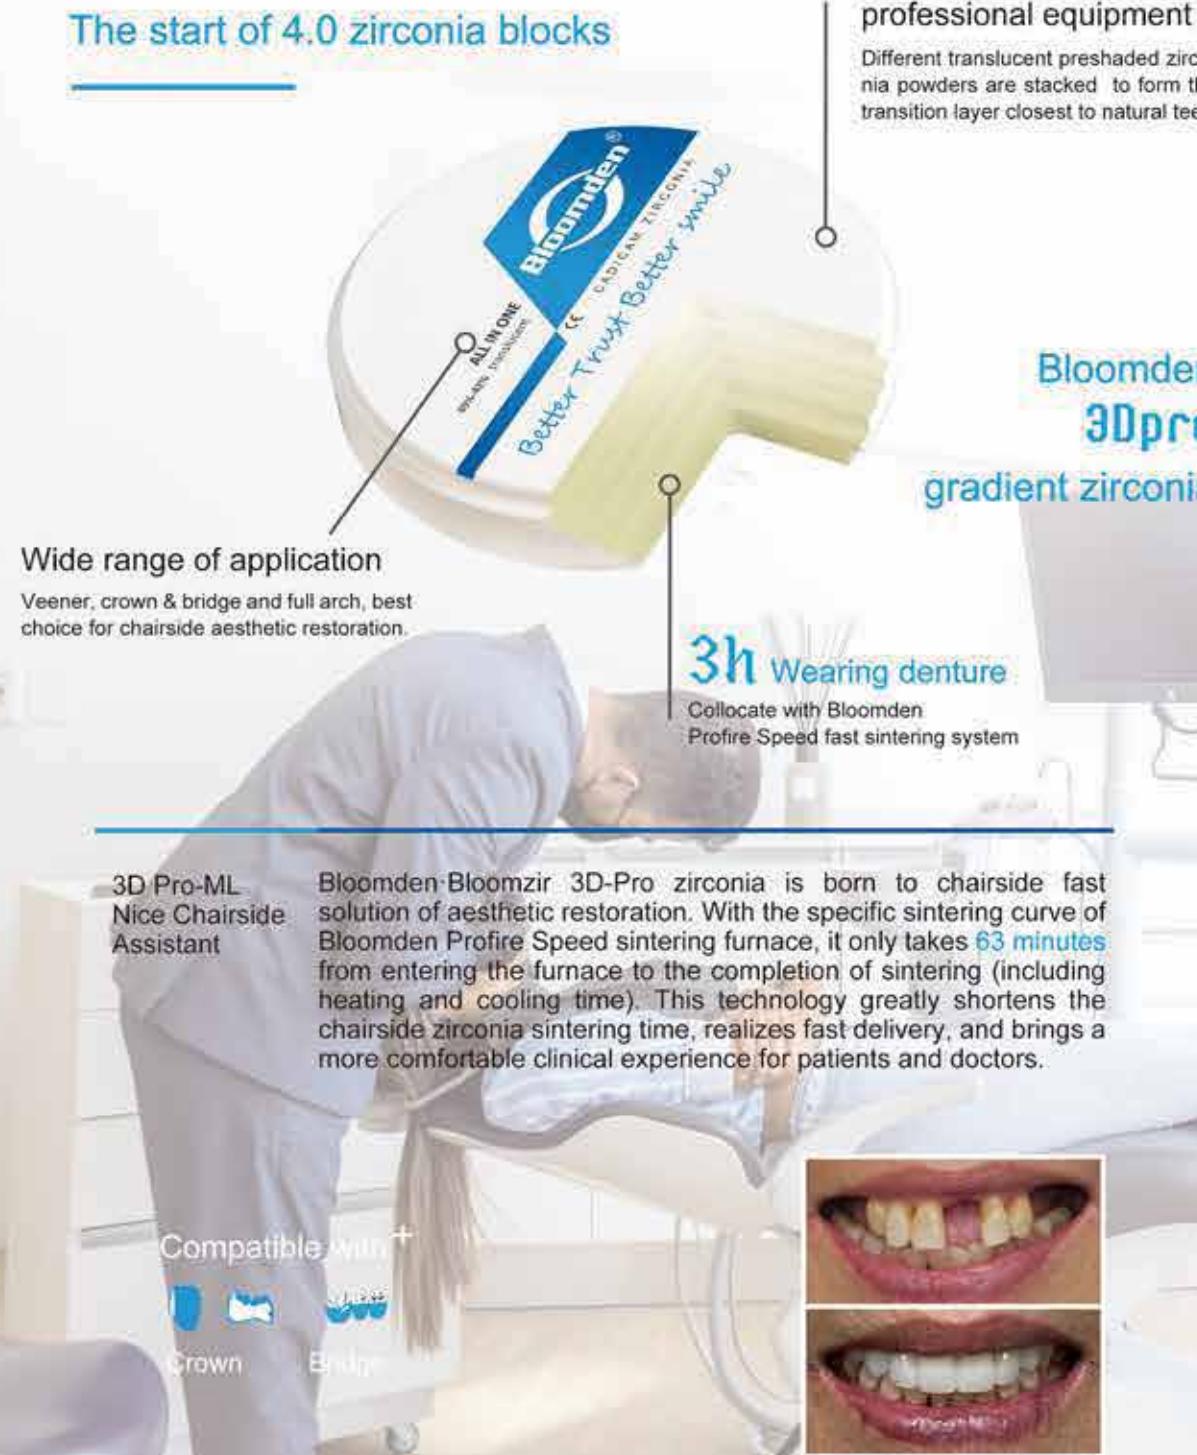

The bending strength of Bloomden 3D Pro-ML naturally transitions from 800MPa to 1200MPa, which can meet the strength of restoration materials for a wide range of indications.

The start of 4.0 zirconia blocks

Adopt German
professional equipment

Different translucent preshaded zirconia powders are stacked to form the transition layer closest to natural teeth

Bloomden
3Dpro
gradient zirconia

Wide range of application

Veneer, crown & bridge and full arch, best choice for chairside aesthetic restoration.

3h Wearing denture

Collocate with Bloomden Profire Speed fast sintering system

3D Pro-ML
Nice Chairside
Assistant

Bloomden-Bloomzir 3D-Pro zirconia is born to chairside fast solution of aesthetic restoration. With the specific sintering curve of Bloomden Profire Speed sintering furnace, it only takes **63 minutes** from entering the furnace to the completion of sintering (including heating and cooling time). This technology greatly shortens the chairside zirconia sintering time, realizes fast delivery, and brings a more comfortable clinical experience for patients and doctors.

Bridge

Chairside Full Zirconia Digital Solution

Bloomden made breakthrough technologies to realize the original Bloomzir chairside full zirconia digital solution, restoration, orthodontics and other fields. The solution uses Bloomden 3DPro zirconia block as the core, equipped with intraoral Scanner, 3D printer, light curing units, professional online design team, X5 five-axis five-linkage milling machine, Profire Speed fast sintering system. We made same-day dentures a reality in one visit.

I am a salesman in Russia. I have to face all kinds of customers every day, and it is my job to negotiate business. For years, I have suffered from dental problems because my unsightly anterior teeth. Introduced by a friend, I chose to come to Dr. S for Bloomden 3D Pro zirconia veneer restoration. Now I have finally regained my former self-confidence.

Cutting Glass Block

High translucency up to 48% matching the esthetics of natural teeth

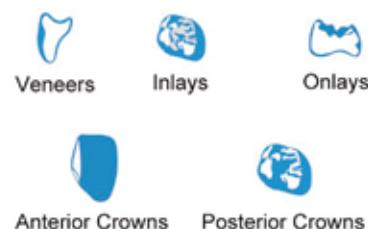

- Stable Physical and Chemical Properties
 - Natural & Lifelike Color
 - Excellent All Ceramics Aesthetic Function
 - Applicable to Immediate Chairside Restoration

595Mpa

Product parameters

Main Components	SiO_2 Li_2O K_2O Al_2O_3 P_2O_5 ZrO_2
Bending strength	595Mpa
Fracture Toughness	4.97
Chemical Solubility	<100ug/cm ²
Density	2.4-2.7g/cm ³
CET	(9-11.5) $\times 10^{-6}\text{K}^{-1}$
Vickers Hardness	6000+500 MPa

Press Ingots

Bloomden Press Ingot is a biological glass ceramic product grown and crystallized in an original platinum system using high-purity mineral raw materials.

- Natural & Lifelike Color
 - Excellent Aesthetic Function
 - Applicable to thin veneers, minimally invasive restoration

450±60Mpa

Product Parameters

Main Components	SiO_2 Li_2O K_2O Al_2O_3 P_2O_5 ZrO_2
Bending Strength	$450\text{Mpa} \pm 60\text{Mpa}$
Fracture Toughness	$3.0 \sim 3.5$
Chemical Solubility	$<100\mu\text{g}/\text{cm}^2$
Density	$2.4 \sim 2.6\text{g}/\text{cm}^3$
CET	$(9.8+0.5) \times 10^{-6}\text{k}^{-1}$
Vickers Hardness	$6000 \pm 500 \text{ MPa}$

Flexible PMMA

Bloomden® Flexible PMMA is a kind of resin with high tensile and flexural strength, fatigue resistance, low friction, low moisture absorption, and excellent dimensional stability.

96Mpa

Indications

Removable full dentures

Removable partial dentures

Product parameters

Vicker's hardness	20HV
Flexural strength	96MPa
E-Modules	<E2771MPa
Residual monomer	<1%
Colors	Pink, Regular, yellow
Systems	98mm / 95mm / 92*75mm
Thickness	12m / 14mm / 16mm / 18mm 20mm / 22mm / 25mm
Shades	A1 A2 A3 A3.5 A4 / B1 B2 B3 B4 C1 C2 C3 C4 / D2 D3 D4

PEEK

PEEK is a high-performance polymer. PEEK has been used as an implant material in human medicine for over 35 years. Its mechanical material properties are similar to bone material properties.

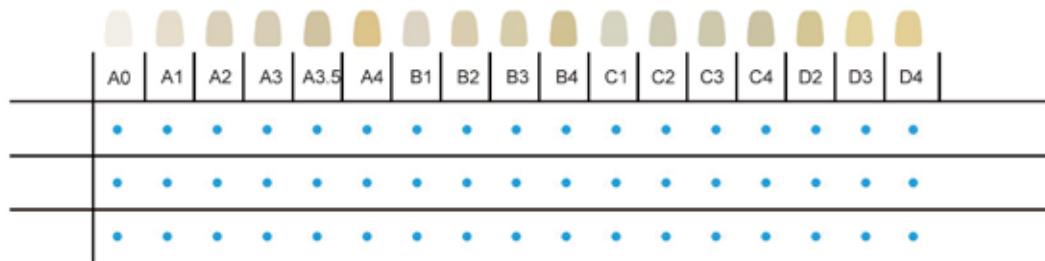

- Easy to mill
- Biocompatible
- Best shape stability

163Mpa

Product parameters

Density	1.32g/cm ³
Bending Strength	163MPa
E-Modules	4
Impact Strength	199KJ/m ²
Color	Natural/White/Pink/Yellow
Size	98mm / 95mm
Thickness	10mm/12mm / 14mm / 16mm 18mm/20mm / 22mm / 24mm 25mm / 26mm / 30mm

Milling Burs

This dedicated dental milling burs have half round mucro. Range of milling is from 0.6mm to 2mm which is used for preliminary and high efficiency manufacture. 0.6mm milling burs is mainly used to mill the sculpture of groove, the elaborate progress. The undercut problem can be fixed easily due to the special length of milling burs and flexible milling.

Sophisticated online restoration design service

Bloomden provides professional dental digital design and more advanced dental CAD/CAM design service. We supply high quality same-day design service to worldwide dental laboratory, dentist and CNC machining center.

01

Bloomden has an excellent design crew that were all graduated from stomatology technology major. Our design team has seven years of working experience per capita and four years of foreign design to provide you with the highest design service

Experienced design crew

02

Bloomden can design a crown in 10 minutes, ensuring to provide high quality, fine design, considerable price and outstanding customer satisfaction in the turnover period.

Bloomden Value Proposition

Honesty—Stable quality, Commitment adherence, Prices system

Stable quality: Through an abundant of analysis of digital dental data, a unique 3D natural translucency and strength degraded zirconia has been developed to meet the characteristics of oral restoration functions and aesthetics of all kinds of customers around the world, forming a standardized and customized product structure. The company has fine powder pressing system, isostatic pressing system, and other advanced manufacturing equipment and testing equipment; a professional factory quality management system, and R&D team for material.

Commitment adherence: Honesty is the fundamental value of all Bloomden employees and the base of cooperation with customers. Bloomden strictly abides by the spirit of the contract and doesn't harm the benefits of customers.

Price System: Bloomden has established a complete price system and distribution management system in various countries and regions to protect and create customer value.

Efficiency—Enterprises-Universities-Researches Integration factory, Fast response, Digital dental solutions

Enterprises-Universities-Researches Integration factory: The company has established Enterprises-Universities-Researches cooperation and exchanges with well-known material technologies domestically and internationally, as well as senior ceramic technology and dental experts. Bloomden has been committed to developing more advanced dental digital technology and zirconia bioceramic technology for dental industry.

Fast Response: The annual production capacity of consuming zirconium powder for zirconia blocks exceeds 200 tons, and strong inventory management can realize the rapid delivery of general items on the next day and customized items in 7 days.

Digital dental solutions: The company provides professional digital cad/cam dental solutions, which can realize one-stop digital chairside service for 3-hour dental restoration service, and provide 24-hour online design services for global dentists and technicians through the digital platform.

Accomplishment: VIP exclusive consultant, Growing up together, Planning regional markets together

VIP exclusive consultant: Provide professional Marketing Consultant service, assist distribution partners to analyze the characteristics of VIP customers, summarize target VIP customer image, help distribution duplicate more VIP customers, and organize specific customer development and maintenance.

Growing together: Support distribution partners to create team building and employee encouragement system, and facilitate customers through digital to achieve mutual success.

Planning regional markets together: Exclusive consultant provides relevant regional market analysis and industry development analysis. Work with our distribution partners to develop marketing and brand promotion strategies.

Company Profile

Bloomden Bioceramics(Hunan) Co., Ltd. (hereinafter referred to as Bloomden) is located in Changsha, Hunan. Founded in 2012, Bloomden is a technological company specializing in research and development, manufacturing, sales and service for dental CAD/CAM zirconia blocks, zirconia 3D printing,zirconia implants, dental restoration materials, digital dental technology & equipment.

Since its foundation, Bloomden has been awarded many honorary titles such as "High-tech Enterprise", "China Engineering Ceramics Council Membership", and "Hunan Province New Material Enterprise"; and has applied for more than 20 patents. Bloomden has its own headquarters operation center and advanced manufacturing facility in Changsha. The company has obtained a number of domestic and foreign medical device registration certificates such as CFDA, FDA, CE, ISO13485, etc.

Strengthened with the material and science engineering college of Central South University, Hunan University, and Changsha University of Science & Technology, as well as senior engineered ceramic experts and dental experts domestically and internationally, the company has established Industry&College Research collaboration and exchanges. Bloomden has been contiguously dedicated to the technology and development of digital dental and zirconia bioceramics for dental restoration. Not only we can provide excellent dental zirconia products and other dental digital restoration materials, but also provide digital dental equipment, digital dental technology, and services.

Bloomden has established marketing all over the world. We built offices in the United States and have serviced customers in nearly 100 countries and regions such as the United States, the Middle East, Europe, Africa, South America, and Southeast Asia. Bloomden's brand strategy is centered on the marketing philosophy of from Customers to the Human Spirit. Our value is "Better Trust, Better Smile". The company complies with the principles of trust, efficiency, and success, and strives to cooperate with domestic and international dental customers for a win-win business. Bloomden is committed to jointly promoting the development of the dental industry, and making China brand and biomaterial technology world-renowned.
