Sapphire Bracket

Invisibly Clear with
Excellent Mechanical Properties
for Supreme Aesthetic Patient Demand

- Monocrystalline Sapphire Bracket
- Excellent Aesthetics
- Rounded Edges without patient discomfort
- Standard, Roth, MBT

Wing&Hook

It was manufactured in a gently curved shape. So, foreign body sensation was minimized.

Slot

Smooth surface decreases friction on the contact surface.

Soft Angle

Comfortable fit and smooth curved line is implemented.

Simple&Easy

Bonding strength is excellent, and removal is convenient in debonding as well.

Strong

When a bracket is torqued, it is not easily damaged. And undercut is strong as well. Accordingly, ligation is easy.

Design

It gives a sense of unity with tooth color as it uses the quality of sapphire material having excellent transparency.
