

Automate Crown Design with AI - Digitalize Smarter, Not Harder

Web-based AI Dental CAD Software

Discover how online AI crown design can change your life

Dentbird Solutions is the most advanced automated dental CAD solution in digital dentistry. With this AI design solution, enjoy a simpler process that saves you time and effort, as well as minimizes the number of patient re-visits. Maximize your profit with maximized accessibility.

Save time

Dentbird is the automation you have been waiting for. Say goodbye to long edits and endless clicking in dental CAD, and hello to 3-click crowns.

Start free

With Dentbird, you are finally free from all that installations and dongles. Pay only for designs you choose to export.

Go online

Access Dentbird solutions anytime, anywhere, with an unlimited number of connected devices. All you need is a PC, laptop, or mobile device to get to work.

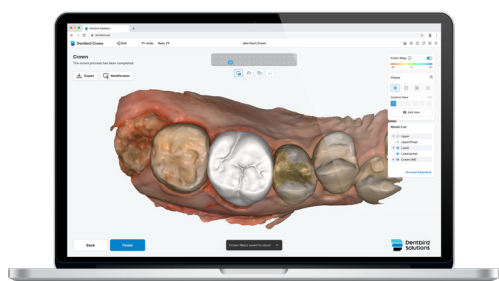

Maximize profit

The speed and ease of our solutions reduce work hours, minimize costs, increase productivity, and maximize revenue.

Online AI Dental CAD

Accelerate your workflow with AI-based crown design system.

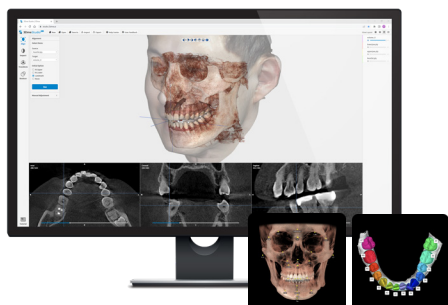

- No installation. No initial cost.
- You upload, AI designs.
- Scan, design, and print. All in one day.

Cloud data storage

Store your digital dental data in the cloud and use it anytime, on any device.

- Access your data anywhere you want.
- No limit in the number of connected devices.
- Order and pay like you shop online.

Dentbird API for dental solution companies

Drive your customer satisfaction with out-of-this-world productivity from Dentbird API integration, ultimately benefiting both you and your customers.

- Auto-Registration
- CT Landmark Detection
- Tooth Segmentation

Dentbird Solutions Key Features

AI-powered Pre-processing

- Automatic upper/lower jaw classification
 - Automatic preparation detection
 - Automatic insertion direction detection
 - Automatic margin line detection
-

AI-powered Crown Design

- Automatic crown design based on proximal and occlusal contact points
 - Fast and simple process
 - Precise undercut blockout
 - Smart adaptation
-

Web-based CAD Solution

- No software installation required
 - Cloud data storage
-

System Requirements

Supported OS

- Windows 7, Windows 8, Windows 8.1, Windows 10, Windows 11
 - Mac OS
-

Supported Browser

- Chrome
-

CPU

Octa-Core recommended (minimum Dual-Core)

Memory

32GB recommended (minimum 16GB)

Imagoworks®

Making the future of digital medicine for everyone

Imagoworks Inc. offers a Web-based Dental CAD solution using AI, streamlining the digital workflow for dental professionals. Together with world-class technology, we are setting new standards for digital dentistry in the global market. Our mission is <Making the future of digital medicine for everyone>. While we have accumulated technological expertise in the medical field for over 10 years, specializing in AI-based automation, 3D geometric modeling and mesh processing, and software as a service (SaaS), we now turn our focus to commercializing our innovative technologies and transforming the field of digital dentistry. By cooperating with and licensing to leading global dental companies, we are seeing great success as we find ourselves in the industry spotlight. Imagoworks currently offers Dentbird Crown which automatically generates optimal crown designs without any software installation. As we continue to expand our services, Imagoworks aims to be recognized as a chairside design solution for dentists worldwide.
