## Disinfection of dental prostheses and orthodontic appliances is no longer optional, but crucial.

Can you recognize the difference between 99.9%, 99.99% and 99.999% disinfection?

Experiment with 100,000 control bacteria		
	Disinfectant	Survival Bacteria
1	99.9%	100
2	99.99%	10
3	99,999%	under 1

SMART UV30 disinfects 99.999% in just 30 seconds.

## SMART UV30 is a medical device that can sterilize various dental items as well as prostheses and orthodontic appliances.

SMART UV30 is a disinfection device for prostheses, implant abutments and orthodontic appliances. It is also possible to sterilize instruments, handpieces, burs, etc. using existing trays.

Instruments

Burs

Prostheses

Impression

Handpieces

### Best in class Technology SMART UV30

Equipped with 14 UV-C LED chips inside, all bacteria and viruses are sterilized within just 30 seconds

(corona virus and other types of bacteria confirmed)

All surfaces disinfection possible with the special Tray patent pending.

Voice support increase patient trust (disinfection-related voice message)

Class II Medical deviceapproved by KFDA

Inactivation of 99.999% corona virus and other bacteria certified by the public institution

### The most powerful germicidal

# UV-C wavelength band LED lamp installed!

**UV-C?** The shortest wavelength of ultraviolet radiation that is the most effective for disinfecting viruses and bacteria.

**Certificates and Patents** 

#### **SPECIFICATION**

Parameter	Specifications
Sterilization time	30 seconds
Lamp type & wavelength	UV-C LED (275nm ±5%)
Color	Metal Silver, Sky Blue, Purple Pink
Germicidal Power	99.999% of corona virus & other types of bacteria killed within 30 seconds

Parameter	Specifications
Operating Voltage	Input : 220V 60Hz Output : 24V 2A
Voice service	Start/Operation/End of disinfection process
Safety parameter	Automatic shutoff in abnormal use or position
Accessories	Starilizer, Tray, AC/DC Adaptor, Manual Option : Portable charger, Power cable
