**The Next Gen Dentistry**

600006

## **Dengotemp** Temporary Filling (40gm)

### **Description**

DENGOTEMP is a radiopaque, temporary filling material which sets upon contact with oral fluids.

### **Recommendation**

- For temporary restoration of cavities/Temporary Fillings.

600007

## **Dengocem 1** Luting Cement (15g/10ml)

### **Description**

DENGOCEM 1 is the self cure, translucent, glass-ionomer luting cement with excellent tooth adhesion.

### **Recommendation**

- For a wide range of clinical applications.

600008

## **Dengocem 2** Restorative Cement (15g/10ml)

### **Description**

DENGOCEM 2 is the self cure, restorative glass-ionomer cement with excellent strength.

### **Recommendation**

- It can be used for restoration of small cavities like class I, II & V.

600009

## **Dengen Caries Arrest** SDF 38% (5ml)

### **Description**

38% silver diamine fluoride solution for dental use.

### **Recommendation**

- It can be applied on cavities prepared for prosthesis, crowns, bridges, incipient or rampant dental caries and in fissures.

600010

## **Denbond SE** Self Etch 7th Gen Bond (5ml)

### **Description**

A 7th gen. Self Etch, light cured one component dentine /enamel bonding agent for bonding of both direct & indirect restoration.

### **Recommendation**

- As direct / indirect restorations with light cured composites.
- Excellent adhesion to dentine and enamel.

600011

## **Denbond TE** Total Etch Bond (5ml)

### **Description**

DENBOND TE is Total Etch Bond combines the ingredients needed for priming, bonding into a single adhesive.

### **Recommendation**

- This adhesive can be used for the bonding of both direct and indirect restorations.

600012

## **Formcoresol** Dencresol (15ml)

### *Description*

Bucky standard composition without losing the therapeutic proprieties, increasing its biological compatibility

### *Recommendation*

- For conservative treatment of primary dentition and in some specific cases of permanent teeth.

600013

## **Denopulp** Devitalizer Jar (6gm)

### *Description*

DenoPulp is a Devitalizer which provides powerful pulp Devitalizing properties due to Paraformaldehyde.

600013S

## **No Pulp** Devitalizer Jar (2\*3gm)

### *Description*

No Pulp is a Devitalizer which provides powerful pulp devitalizing properties due to Paraformaldehyde.

600014

## **Dentogyl** Dry Socket Paste (12gm)

### *Description*

Used in Treatment of dry sockets and post extraction dressing.

600015

## **Dengen** RVG Sleeves (Pack of 500)

### *Description*

Super soft tear resistant Sensor Sleeves.

600016

## **Dengoetch** Etchant (3gm)

### *Description*

Good thixotropy Providing Optimal viscosity for precise placement and excellent control

### *Recommendation*

- Provides excellent etching depth.

600017

## **Dengoetch** JUMBO Etchant (50gm)

### **Description**

Good Thixotropy providing optimal viscosity for precise placement and excellent control.

### **Recommendation**

- Provides excellent etching depth.

600018

## **Dengocal** Calcium Hydroxide Paste (3gm)

### **Description**

Premixed water based radiopaque calcium hydroxide paste with barium sulphate for endodontic indications.

### **Recommendation**

- High pH (pH 12) helps neutralize free acids of obturating cements and restorative materials calcium Hydroxide content helps the neo formation of secondary dentin.

600019G

## **Dengoprep** EDTA With Carbamide (3gm)

### **Description**

Water soluble gel containing 17% EDTA with 10% carbamide peroxide.

### **Recommendation**

- For chemical and mechanical cleansing root canal Preparation.

600019L

## **Cheate It** 17% EDTA Solution (15ml)

### **Description**

Solution containing 17% EDTA

### **Recommendation**

- For chemical and mechanical cleansing root canal preparation.

600020

## **Dengopex** Calcium With Iodoform (2.2gm)

### **Description**

Dengopex is premixed oil based calcium hydroxide paste containing iodoform. The addition of iodoform to calcium hydroxide improves radio-opacity and improves disinfecting property of the paste.

600021

## **Dengen Desensitizer** (5ml)

### **Description**

Dengen Dentin Desensitizer is a highly effective, one step, chair-side treatment for dentinal hypersensitivity caused due to cervical erosions and exposed roots.

600022

## **Dengosol** Gutta Percha Solvent (10ml)

### **Description**

Dengosol Gutta Percha Solvent is used for removing gutta percha at the time of root canal retreatment.

### **Recommendation**

- Useful for removing all types of root canal filling materials including Zinc Oxide.

600023

## **Dengoglass** Light Cure Gic (4\*2gm)

### **Description**

It is single component, light cured glass Ionomer cement for lining, extended fissure sealing and smaller lesions.

600024

## **Dengoflow** Light Cure Composite (4\*2gm)

### **Description**

Dengoflow is Nano Hybrid flowable composite that delivers Great strength & wear resistance. Indicated for direct filling of class V, Root Erosions, wedge shaped defects. Fillings of anterior teeth (Class III & IV). Small fillings in posterior teeth.

600025

## **Dengoflow** Light Cure Composite (2\*2gm)

### **Description**

Dengoflow is Nano Hybrid flowable composite that delivers great strength & wear resistance. Indicated for direct filling of class V, Root Erosions, wedge shaped defects. Fillings of anterior teeth (Class III & IV). Small fillings in posterior teeth.

600026

## **MTA ALL IN ONE** (3gm)

### **Description**

MTA ALL IN ONE root canal sealer intended for the permanent sealing of root canals and may be used in combination with root canal obturation materials. It can also be used for perforation repair.

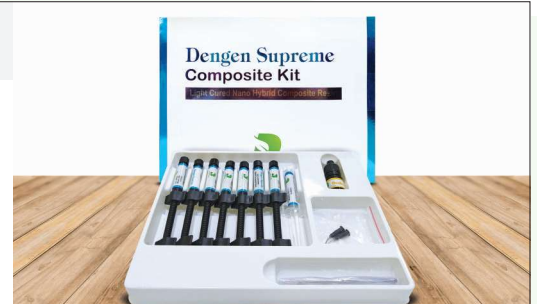

600027

## **Dengen Supreme** Composite Kit

### **7 Syringe with 5th Gen Bond (4gm each)**

### **Description**

Dengen Supreme is a visible light cured, radiopaque highly filled composite restorative material for anterior and posterior restorations of all teeth.

600029

## Dengen Supreme

4 Syringe kit with 5th Gen Bond (4gm each)

### Description

Dengen Supreme is a visible light cured, radiopaque highly filled composite restorative material for anterior and posterior restorations of all teeth.

600030

## Dengen RMGI (9gm)

### Description

Dengen RMGI is a resin-modified glass ionomer luting cement offered in a paste formulation that provides an option for tack light-curing of excess cement. This dual-cure material is packaged in dual barrel syringes with single-use automix tips.

600031

## Dengocore Build Up (9gm)

### Description

Dengocore is dual-curing, radiopaque, composite for core build-up. It contains inorganic fillers in a methacrylate matrix. Core build-up of vital or non-vital teeth and luting of roots posts.

600032

## Dengodam Gingival Barrier 4\*1.5ml Syringe

### Description

Dengodam is a light curing resin based gingival barrier. It is used for sealing of margins & protect soft tissues during whitening, rubber dam application and other procedures.

600033

## Dengocal LC Light Cure Calcium Hydroxide Liner (2\*2gm)

### Description

Dengocal LC is light cured radiopaque Calcium Hydroxide Paste which can be used for pulp capping and as a protective base/liner under dental filling materials, cements.

600034

## Dengofoam Gealtin Sponge (32 Cubes)

### Description

Dengofoam 10x10x10 MM Absorbable Gelatin Sponge 32/pk.

### Recommendation

- Widely used for arresting the bleeding following tooth extraction.

600035

## **Dengoseal** Resin Based Root Canal Sealer

(15g/10ml)

### **Description**

Dengoseal is a radiopaque, non-resorbable resin based root canal sealer. Its composition is well tolerated by the tissues and provides anti inflammatory, antiseptic and germicidal action.

600035T

## **Pexsil** Calcium Based Root Canal Sealer

(15gm Base Paste & 15gm Catalyst Paste)

### **Description**

PEXSIL is a calcium hydroxide, polymeric resin, root canal filling material that is used in conjunction with gutta percha or silver endodontic points.

600036

## **Carie Spot** Caries Detecting Dye (10ml)

### **Description**

Caries indication by visual differentiation between infected carious dentine & sound, remineralizable dentine.

600037G

## **Hemostas Gel** Hemostatic Agent (3gm)

### **Description**

To stop bleeding during restorative procedures, crown preparations & other dental procedures.

600037L

## **Hemostas Liquid** Hemostatic Agent (15ml)

### **Description**

To stop bleeding during restorative procedures, crown preparations & other dental procedures.

600038

## **Carie Fix** Caries Removing Gel

### **Description**

The chemo-mechanical caries removal method has been a solution for treatment of patients seeking alternatives to conventional methods.

600039

## Dengen Silane (5ml)

### Description

It is used for porcelain repairs and bonding etched porcelain restorations and porcelain crown cementation.

600040

## Porcelain Etch (2gm)

### Description

Used During Repair of porcelain restorations & Prior to Cementation of porcelain restorations.

600041

## iOFFICE In Office Bleaching Kit

(6gm with 1.5gm Barrier)

### Description

iOFFICE is a hydrogen peroxide based in-office tooth whitening system.

### Recommendation

- Whitening of discoloured vital teeth.
- Whitening of discoloured non-vital teeth.

600042

## Moon White Home Bleaching kit (3\*3gm)

Available in 16 & 22%

### Description

Moon White is a carbamide peroxide based Home tooth whitening system

### Recommendation

- Whitening of discoloured vital teeth.
- Whitening of discoloured non-vital teeth.

600043

## Reinforce Fiber Splint (3 inch\*4 Splints)

### Description

For Splinting in Periodontics, Orthodontics and of avulsed or extracted teeth.

600044

## Dengen Supreme Single Syringe (4gm)

(Shades Available: A1, A2, A3, A3.5, B2, OP)

### Description

Dengen Supreme is a visible light cured, radiopaque highly filled composite restorative material for anterior and posterior restorations of all teeth.

600045

## **Dengen Bite Up** Composite Single Syringe (4gm)

### **Description**

Dengen Bite Up is a visible light cured, radiopaque highly filled composite restorative material for Raising The Bite in anterior and posterior restorations of all teeth

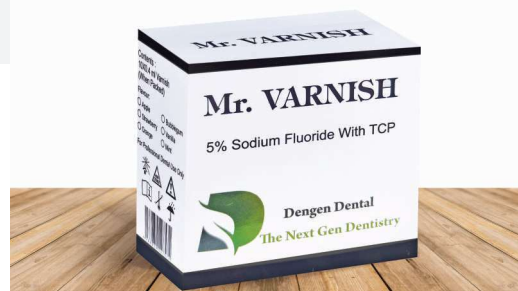

600045

## **Mr Varnish** 5% Sodium Fluoride With TCP

(Pack of 10 Sachet)

### **Description**

For Treatment of hypersensitive teeth.

600047

## **Iodoform Powder** (15gm)

### **Description**

Disinfection dressing (especially at post extraction sockets).

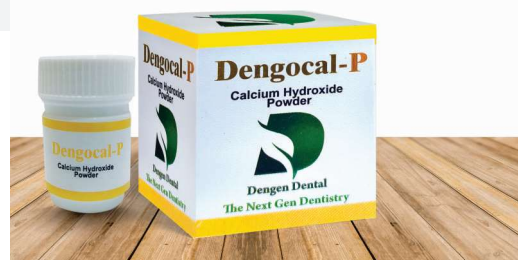

600048

## **Dengocal-P** Calcium Powder

### **Description**

Temporary root canal dressing for endodontic therapy and for indirect pulp capping.

600049

## **Cera Repair** Porcelain Repair Kit

### **Description**

Intraoral and Extraoral repair of Porcelain fused to metal crowns, bridges, inlays & onlays, ceramic veneered restorations.

600050

## **Denbond** Universal

### **Description**

This adhesive can be used for the bonding of both direct and indirect restorations. Priming of Metal, Zirconia, Alumina, Composite and Post Restorations.

600051

## **MO WAX** *Modelling Wax (12 Sheets)*

### *Description*

Mo Wax Modeling Wax is pink/red wax for modelling denture bases and acrylic saddle. Modelling Wax that we give is widely used in dentistry and is formulated using materials.

600052

## **BI WAX** *Bite Registration Wax (10 Sheets)*

### *Description*

Bite Registration sheets are dimensionally stable, does not shrink or distort. It is used to record bite while doing dental procedures. They are ideal for checking and maintaining accurate occlusal records.

600053

## **Early Coat** *Pit & Fissure Sealant (2\*2gm)*

### *Description*

Indicated For Sealing /filling of pits and fissures & Covering of caries pre -dilection sites during orthodontic treatment. It can also be used for Sealing of deciduous teeth

600054

## **Lunax** *Polishing Paste (2gm)*

### *Description*

To Be used for Final polishing of direct/ indirect anterior and posterior composite restorations/veneers.

600055

## **Gum Comp** *Gingival Shade Composite 4gm Syringe*

### *Description*

Dengen Gumcomp is a visible light cured, radiopaque highly filled composite restorative material for gingival recession and gingival shape defect.

600056

## **CAL-BIO LC** *Light Cure MTA (2gm)*

### *Description*

CAL BIO LC Calcium Silicate Liner sealer intended for the permanent sealing of root canals and may be used in combination with root canal obturation materials. It can also be used for perforation repair.

600057

## **HOLLY HYPO** SODIUM HYPOCHLORITE

SOLUTION (3% & 5%)

### **Description**

Used for irrigation of root canals. It also helps debride & disinfects root canal during instrumentation.

600058

## **Signet** Carving Wax (40 Blocks)

### **Description**

Especially developed wax blocks to provide dental students with a wax suitable for carving tooth anatomy. Bubble free wax which does not chip or flakes.

600059

## **Perfecto** Tracing Green Stick (10pcs)

### **Description**

Thermoplastic sticks for functional and relining impressions. Ideal for recording full depth of the sulcus.

600061

## **Soothenol** Eugenol Liquid (15ml)

### **Description**

Soothenol Eugenol Liquid Reacts with zinc oxide to form a temporary cement for sedative dental dressing or lining under non- composite resin restoration.

600062

## **ZPO** Zinc Polycarboxylate Cement (30gm/15ml)

### **Description**

ZPOCement is a zinc Polycarboxylate cement suitable for the cementation of crowns, bridges, inlays facings and orthodontic brackets.

600063

## **ZPC** Zinc Phosphate Cement (30gm/15ml)

### **Description**

ZPC Cement is a zinc phosphate cement suitable for the cementation of crowns, bridges, inlays facings and orthodontic brackets.
