Air Care Group

AIR FLOW
50 to 1000 CFM

COVERAGE AREA
50 to 2000 ft²

PORTABLE HEPA AIR PURIFIERS AF Series

Designed to handle high concentrations of aerosols (chemicals, gases, odors, particles, viruses, bacteria) the AF Series HEPA air purifiers delivers superior air quality for residential, institutional, and commercial spaces, office buildings, workshops or production facilities that require effective air filtration.

For virtually any application that demands removal of aerosols directly at the source, the AF Series HEPA air purifiers can be customized with a wide selection of flexible or articulated arms, hoods, and ducting accessories to capture any contaminants before they spread into the environment.

FUME EXTRACTORS

HEPA AND DEEP BED CHEMICAL FILTERS

Housed inside a durable power coated, welded cabinet, our multistage filtration systems rely on a wide selection of pre-filters, medical grade HEPA filters and deep bed chemical filters to deliver clean air. An additional layer of protection is offered by our LaserBlue gel sealing technology that guarantees ZERO FILTER BYPASS.

Our impressive selection of units offers tailored fume extraction solutions for any type of setup or budget, for clean and healthy work environments.

Engineered for maximum efficiency, our HEPA fume extractors feature intelligent control panels with audible and visual status indications and alarms, high quality motors/turbines.

Paired with a wide range of accessories such as extraction arms, containment enclosures and venting enclosures, our fume extractors offer unparalleled source capture extraction capabilities.

DEEP BED
CHEMICAL FILTERS
2" to 24" $\frac{4\text{PH}}$ to 200 lbs
STATIC PRESSURE
up to 90" W.C.
AIR FLOW
50 to 600 CFM

HEPA DUST COLLECTORS

COMPACT · SELF-CLEANING · BAGS · CARTRIDGE

Backed by over 30 years of proven performance, our HEPA dust collectors offer advanced protection against particulate matter and harmful chemicals and VOCs when fitted with additional chemical filters.

Our extensive line of dust collectors ranges from compact units suitable for small applications to larger, high pressure, high-capacity units for high volume, continuous operations.

Designed for efficiency and productivity, our dust collectors are offered with various filter configurations (bags or cartridge filters), with self cleaning capabilities, high quality motors, intelligent controls, and a wide range of accessories.

ABOUT US

HIGH EFFICIENCY, PORTABLE AND INTEGRATED
AIR MANAGEMENT SOLUTIONS

Since 1991 QUATRO Air Technologies has been researching, designing, and manufacturing high efficiency, portable and integrated air management solutions for commercial and industrial applications.

Working closely with engineers and professionals from a wide range of industries and services helped us deliver solutions that match the specific requirements of almost any sector.

Our air purification systems are indispensable tools for industries and processes generating high volumes of debris, ultra-fine particles, chemicals, VOC's and fumes: welding, soldering, laser marking, cutting and engraving, dental laboratories, jewelry and precious metals processing, digital, offset and large format printing.
