

PROFESSIONAL BIOCOMPATIBLE THERMOPLASTIC RESIN & MILLING DISCS

PREMIUM ALTERNATIVE TO METAL
For Flexible Aesthetic Dentures
Crowns & Bridges

ABOUT PERFLEX

PERFLEX: INNOVATIVE DENTAL TECHNOLOGIES

EXPERIENCE

Perflex was founded in 2007 by Perla and Vidal Ben Simon after more than seventeen years of experience in dental manufacturing labs, which made it clear what materials and tools technicians and dentists were still noticeably lacking. By becoming the specialized experts in aesthetic dental thermoplastics, Perflex has grown from a small family lab to provide dentists and patients around the world with top-quality materials and new innovations.

INNOVATION

Perflex is a leading trailblazer in biocompatible thermoplastics, developing cutting-edge technologies to enhance convenience and patient comfort. Our company is pushing the limitations of dental materials and creates superior formulas for hypoallergenic, light weight and durable dental appliances, including fixed crowns, dentures, and implant restorations with fully natural appearances, no risk of sensitivity reactions and avoids the use of metal altogether.

TRUST

By taking full responsibility for both development and manufacturing, Perflex is able to assure the reliable high quality of their products. The company holds the highest manufacturing standards, meeting the requirements of ISO 13485:2016, ISO 9001:2015, EU's CE marking, and is FDA approved.

EDUCATION

The Perflex Dental Academy holds workshops, lectures and demonstrations in their own headquarters and around the world, in a variety of languages, to help professionals get all the information they need to make the most of cutting-edge thermoplastics. With their own highly experienced international trainers, Perflex leads the way in educating distributors on the advantages and uses of advanced thermoplastics and sophisticated processing techniques, at the Perflex training center and around the world.

PERSONAL TOUCH

All of Perflex's products are developed with the goal of creating materials that fit the lifestyle of the patients which are the end users. The Perflex team is involved in all stages of bringing the product to the patient, including providing distributors with personal support to create a mutually beneficial partnership.

WHY THERMOPLASTICS

USING THERMOPLASTICS

The great strides that Perfex has made in dental thermoplastic technology provide dentists with the freedom to create biocompatible restorations. Besides being hypoallergenic and ideal for sensitive patients, Perfex thermoplastics are durable and repairable at any time, adding new teeth or clasps to existing dentures or to adapt the existing denture for a new implant. Repairs and relines are easy to make with the same thermoplastic and with conventional acrylics and composites.

Unlike traditional acrylics, injection molding machines are used to melt thermoplastics and inject them into the denture flask under high pressure and machines such as Perfex's Smart 101-500 and Perfex Manual Injector, enable dentists and technicians to do the process right in their own labs

IMPROVING PATIENT LIFESTYLE

Perfex thermoplastic compounds are completely biocompatible. With no chemical additives, thermoplastics are healthier for all patients and can particularly improve the quality of life for patients with acrylic sensitivities or tendencies toward allergic reactions.

THE ADVANTAGES OF METAL-FREE

By avoiding metal components in dental restorations, dentists and patients bypass a range of problems. Metals, like acrylics, can cause allergic reactions in some patients and for many others it simply has an unpleasant metallic taste. Most commonly, patients prefer that their dental appliances appear natural: A quality that only thermoplastics can provide.

PERFLEX THERMOPLASTICS

INNOVATIVE BIOCOMPATIBLE MATERIALS FOR THE HIGHEST QUALITY RESULTS

Perfex is constantly developing new formulas and processes to refine and improve their monomer-free, non-allergenic materials to meet market demand and to keep up with the latest technologies available, creating an adaptable portfolio of monomer-free resins in pellets, milling discs and machinery to meet all dental needs.

PERFLEX THERMOPLASTIC PRODUCTS

- Biosens** - Semi Rigid thermoplastic resin pellets for all denture types
- Biosens Cad** - Semi Rigid thermoplastic milling discs
- T-Crystal** - Semi-flexible thermoplastic resin pellets for all denture types
- Flexinylon** - Flexible thermoplastic resin pellets for partial dentures
- Acryfree** - Elastic and monomer-free acrylic for all denture types
- Perfex Pure Permanent** - Thermoplastic resin pellets for crowns, bridges & implant over dentures
- Petflex Pure Permanent** - Milling Discs
- Acetal** - Tooth colored thermoplastic resin pellets for temporary crowns and frameworks
- Acetal Cad** - Acetal Milling Discs
- Thermofix** - Polymer pellets that softens in hot water for bite registrations, individual trays and night guards
- Easy Clasp** - pre-made thermoforming clasps

PERFLEX MACHINES

- Smart 101-500** - Perfex's automatic injection molding machine
- Perfex Manual** - Injection molding machine

BIOSENS

SEMI-RIGID THERMOPLASTIC RESIN

INDICATIONS: full, partial and implant supported dentures, splints, clasps and frameworks.

Biosens is a hypoallergenic thermoplastic, offering all the advantages of acrylic, with none of the drawbacks. Its rigidity allows for thin, precise and comfortable results, while its low weight, perfect elasticity and 0% shrinkage during processing, make it fit correctly immediately after inserting dentures. Over time, this material remains virtually unbreakable and can easily be repaired and relined chairside using conventional acrylics.

BENEFITS:

- * Rigid, for comfort and rapid adaptation
- * Less bone resorption
- * Stress resistant and virtually unbreakable
- * No metal clasps or frames
- * Cervical clasps for gum health and comfort
- * Thin, smooth and invisible
- * Rapid adaptation
- * No change in color over time
- * Non-absorbent
- * High level polish and shine
- * Glossy texture prevents bacteria and mineral buildup
- * Flexible clasps for added strength
- * Easy to polish and repair
- * Repair using fuse method by injection molding
- * Repairable and relinable with hot or cold conventional acrylics and composites
- * Chairside relining or rebasing
- * Available in aluminum cartridges small, medium, large, and extra-large 25mm, medium and large 22mm, medium and large 28mm Or in Bulk 200g, or 1kg jar
- * Cartridges are individually vacuum sealed in aluminum bags
- * Choice of Clear - Transparent, Light Pink, Light Pink Clear, Standard Pink, Standard Pink Clear, Opaque Pink, Purple pink & Purple Light Pink

BIOSENS CAD

PREMIUM ALTERNATIVE TO METAL

Biosens is an aesthetically superior semi-flexible removable partial denture, which blends perfectly with the patient's gums, providing better function, aesthetics, comfort and durability.

INDICATIONS: Invisible clear-transparent frameworks
Full, partial and implant supported dentures, night guards, clasps and other dental appliances processed by CAD/CAM milling machines for light weight, aesthetic non-metallic restorations.

BENEFITS:

- * Through CAD/CAM production, Biosens Cad dentures eliminates the wax-up stage, investing, casting and finishing
- * The process is fast, clean, precise and cost-effective
- * After the milling process, the denture comes out nearly finished, final polishing is easy with minimal effort
- * Biosens Cad when used for any type of denture, eliminates the need of metal reinforcements and metal clasps, improving aesthetics and patient comfort, avoiding the aesthetic compromise of metal clasp, which is replaced with a transparent translucent clasp

Biosens Cad dentures and appliances can be relined or repaired in the lab or chair-side, with ANY conventional acrylics, and composites. A new clasp or tooth can be added with Biosens resin material to the existing denture using most of injection machines.

Discs Shades Available in transparent-clear & pink.

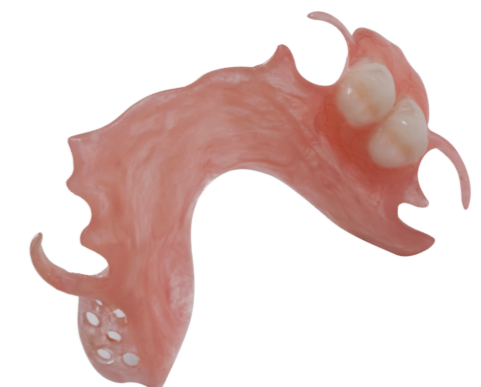

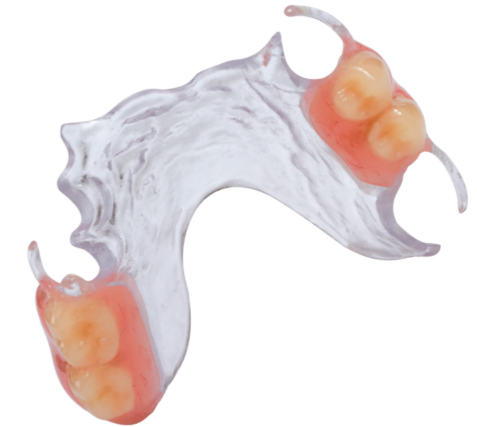

- * Clasps are flexible and tooth bearing
- * Occlusal rests stops setting in order to reduce sore spots with less adjusting, grater functionality and excellent retention
- * Comfortable immediate adaptation by the patient
- * Virtually unbreakable
- * Biocompatible and non-allergenic
- * Light weight, durable and precise

Disc dimensions: 98.5 – 16 98.5 - 20mm 98.5 - 24 with step and no\step.

For repairs by injection molding: Aluminum cartridges available in small, medium, large and extra-large tubes, 22mm,25mm 28mm or in bulk jars of 200g and 1kg.

BIOSENS CAD - MILLING DISCS

T-CRYSTAL

SEMI-FLEXIBLE THERMOPLASTIC RESIN

INDICATIONS: full, partial, and implant supported dentures and splints.

T-Crystal is Perfex's semi-flexible adaptable thermoplastic that allows for repairs and relining right in the dental office using conventional acrylics and composites, or in the lab using primer fuse techniques.

T-Crystal is very similar to Biosens, with a higher degree of flexibility, with lower melting temperature and different color shades variety.

BENEFITS:

- * Semi-flexible compound with low melting temperature
- * Virtually Unbreakable
- * Metal-free restorations
- * Clasps attach over teeth to avoid gum injury
- * Rapid adaptation
- * Texture mimics palatal rugae effect
- * Thin and invisible
- * Repairable and relinable at the lab or chairside
- * Easy to finish and polish
- * Available in aluminum cartridges small, medium, large, and extra-large 25mm, medium and large 22mm, medium and large 28mm
- * Or in Bulk 200g, or 1kg jar
- * Cartridges are individually vacuum sealed in aluminum bags
- * Choice of Clear - Translucent, Light Pink, Standard Pink, Opaque Pink and Purple Pink

FLEXINYLON

FLEXIBLE THERMOPLASTIC RESIN

INDICATIONS: partial dentures.

Flexinylon creates unbreakable partial dentures while the flexibility of the appliance, including its clasps, results in maximum retention.

BENEFITS:

- * Thin and light-weight, high durability
- * Easy to polish and add teeth or rebase existing partial dentures using the liquid fuse technique
- * Hypoallergenic and appropriate even for patients with acrylic sensitivity
- * Translucent, helping to create a natural appearance
- * Perfect feet - very stable
- * Available in aluminum cartridges small, medium, large, and extra-large 25mm, medium and large 22mm, medium and large 28mm. Or in Bulk 200g, or 1kg jar
- * Cartridges are individually vacuum sealed in aluminum bags
- * Choice of Natural - Transparent, Light Pink, Standard Pink, Opaque Pink & Purple Pink

NET WEIGHT OF FILLED CARTRIDGES:

22mm diam M = 18g L = 27g * 25mm diam S = 10g M = 18g L = 28g XL = 31g * 28mm diam M = 19g L = 31g

ELASTIC PMMA: FLEXIBLE AND FULLY REPAIRABLE THERMOPLASTIC ACRYLIC DENTURE BASE MATERIAL

INDICATIONS: metal-free full and partial dentures, flippers.

This acrylic resin is hypoallergenic, making it the perfect choice for sensitive patients or for those looking to avoid potential sensitivities. It can easily be repaired by injection molding with the same material, or with hard, soft, hot or cold acrylics.

BENEFITS:

- * Ten times more breakage-resistance than conventional acrylics
- * Translucent, for the most natural appearance
- * Precise results in restorations through injection molding
- * Can be repaired with the same material or with hard, soft, hot or cold acrylics
- * Can be relined in dental office with temporary soft liners
- * Easy and fast polish with same products as for conventional acrylics
- * Polished surface helps prevent calculus and bacteria build-up
- * Can be used with porcelain prosthetic teeth.
- * Thin, for added comfort

- * Repairs can be done fast and easy using Perflex Easy clasp – pre-made clasps to repair or add a new clasp to the existing denture.
- Available in aluminum cartridges small, medium, large, and extra-large 25mm, medium and large 22mm, medium and large 28mm.
- Or in Bulk 200g, or 1kg jar
- * Cartridges are individually vacuum sealed in aluminum bags
 - * Choice of Clear - Transparent, Light Pink, Standard Pink, Opaque Pink, Opaque Light Pink, Light Purple Pink, Opaque Pink N-5, Purple Pink & Purple Pink Light Dark

Acryfree, T-Crystal & Biosens
Can all chemically bond with
Conventional acrylics

PURE P PERMANENT

PEEK COMPOUND: TODAY'S HIGHEST PERFORMING SEMI-CRYSTALLINE THERMOPLASTIC

INDICATIONS: fixed crowns, bridges, and restorations over implants, healing caps, veneers, individual abutments, over-dentures and telescopic dentures.

This thermoplastic offers a biocompatible alternative to the traditional metal and ceramic restorations for a wide range of appliances, including fixed crowns and bridges, implants, healing caps, abutments, and gingival formers.

BENEFITS:

- * Alternative for zirconia, ceramic and metal
- * Chairside repairable with conventional composites
- * Allows for maintenance and repair without appliance removal
- * Metal free, for no ion exchange or electrical conductivity
- * Elasticity is similar to that of bone and cartilage tissue
- * Aesthetic white color
- * Allows for thin, lightweight and precise aesthetic restoration
- * Works with injection molding, pressing and CAD\CAM
- * Less pressure damage to implants and abutment teeth
- * Resists breakage and cracking
- * Suitable for permanent contact with tissue
- * Veneered with composites and facet systems
- * Available in pellets and discs for most CAD\CAM machines on the market
- * Pellets available in 50g and 100g bulk jars

PURE P CAD

Besides pellets, Perflex Pure\CAD high performance polymer is available in discs for CAD\CAM digital processing. Combining the advantages of Perflex Pure Permanent with the efficiency of CAD\CAM processing allows for patient customized results with the ideal combination of precision, speed, aesthetics, and virtually unbreakable restorations.

EASY CLASP

FLEXIBLE AESTHETIC CLASPS

Add a flexible aesthetic clasp to any acrylic denture in less than 15 minutes.

A Quick and easy way to fix broken clasps in acrylic dentures.

Pre-made clasps for a quick and easy clasp repair for acrylic dentures.

Available in 10pcs pack in Translucent Opaque pink, and transparent crystal clear.

Easy clasp is molded to shape with a heat-gun on the model, bonded with any type of cold/self cure acrylics and easily polished as acrylics.

How to use: demonstration video on our website: www.perflexltd.com

ACETAL

TOOTH - COLORED RIGID THERMOPLASTIC RESIN

INDICATIONS: Suitable for the production aesthetic tooth shade color frameworks, aesthetic clasps, for use with metal frames, space maintainers, partial dentures, cosmetic smile enhancers, provisional crowns and bridges for long term use.

BENEFITS:

- * Hypoallergenic and monomer-free
- * Temporary crowns and bridges without complex reinforcement elements
- * Thin occlusal appliances
- * Can be used with conventional acrylics or all Perflex thermoplastics
- * Aesthetic clasps for metal frames and space maintainers
- * Stain and bacteria resistant
- * Easy to clean and polish
- * Resistant to high-impacts and abrasions
- * Balanced formula for flexibility and stability
- * Choice of five different shades, with more available on request: A2, A3, A3.5, A4 and Pink, other colors by request
- * Available in 200gr packaging only

ACETAL CAD

MILLING DISCS

Acetal Cad - CAD\CAM thermoplastic disc for the production of invisible and aesthetic tooth shade color frameworks, partial dentures, cosmetic smile enhancers, provisional crowns and bridges, by CAD\CAM milling machines.

Acetal Cad consists of high tensile and flexural strength, fatigue resistance low moisture absorption, and excellent dimensional stability.

BENEFITS:

Through CAD\CAM production, Acetal Cad partial dentures eliminates wax-up stage, investing, casting and finishing, process become fast, clean, precise and cost-effective.

After milling, the denture comes out nearly finished, final polishing is easy with minimal efforts.

Acetal dentures are biocompatible, aesthetic removable partial dentures which blends perfectly with a natural tooth shade clasp on the tooth providing better aesthetics, function and comfort.

INDICATIONS: Removable partial dentures (RPD'S), frame works, night guards, full dentures implant retained dentures, clasps, bite splints\night guards cosmetic smile masks, provisional crown and brides and other metal-free removable dental appliances.

- * **Comfortable** immediate adaptation by the patient
- * **Cost effective** save time, fast and clean process

Acetal Cad is ideal for frameworks, and provisional crown and bridges, Unlike conventional metal partials, Acetal restorations are lightweight, very aesthetic, avoiding metal taste.

Available in discs: 98.5 mm with step and no-step 98.5 - 16 98.5 - 20 and 98.5 - 24

Shades: A1, A2, A3, A3.5, C1, G1, G2, G3 & other colors by request

THERMOFIX

BIOCOMPATIBLE THERMOPLASTIC FOR IMMEDIATE IMPRESSIONS

INDICATIONS: individual trays, bite registrations, night and mouth guards, for extending walls and making functional impressions, plastic cap retentions for ball attachments, convenient matrix for interim fabrication, jig in implants, anterior jig to record centric or vertical relationships, index of the opposing maxillary and mandibular quadrants, graft donor sight protection, tooth protection during extraction.

With a dip in hot water, this material softens to a pliable putty, which hardens into unbreakable plastic. Biocompatible ThermoFix can be reformed as many times as it takes to get the perfect impression or bite and can even be shaped into sticks to be softened with a torch.

BENEFITS:

- * FDA approved
- * Takes less than one minute to use
- * Dimensionally stable
- * Can be fabricated directly in the mouth
- * Smooth, glossy surface requires no polishing
- * Quick fabrication of base plates with no complex equipment
- * Dip in hot water to make material soft and pliable
- * 5 minute bench set, or immediate setting in cold water
- * No mixing or chemical polymerization

- * Odorless and reusable
- * Unbreakable when hard
- * High levels of accuracy and precise detail
- * Non-toxic and safe for contact with skin or food
- * Easy to cut when in softened state
- * Choice of White, Yellow, Blue & Pink
- * Available in 200gr and 1kg jars

FLEXI CLEAN

Flexi Clean is a top-of-the-line concentrated denture cleaner, specially developed for thermoplastics. This solution removes the harshest stains and kills live germs without any harm to the appliance.

Flexi Clean concentrated denture cleaner and stain remover is specially formulated to kill actual germs and pathogenic microorganisms present on removable appliances. Eliminates Candida albicans Infections from thermoplastic dentures and acrylic dentures.

- * Formulated to use with all Perflex thermoplastics: Biosens, T-crystal, Acetal, Flexinylon, Acryfree, P. Pure
- * Non-chlorinated
- * Removes plaque and stains in just 20 minutes
- * Non-effervescent
- * Protects dentures from odors
- * Prevents color-changes
- * Available in Denture cleaner kit of 12 mini-jars of 7g each (net weight 84g) for one year use, and in boxed sample set of 30 mini-jars of 7g each (net weight 210g) with 30 patient care instruction flyers.

SMART 101-500

FAST, EASY AND EFFICIENT AUTOMATIC-THERMOPLASTIC INJECTION PRESS

The Smart 101-500 is a powerful and automated heating injection machine that guarantees consistent, accurate results with easy cleanup and maintenance.

- * Consistent, precise results
- * Compact and cost effective
- * Easy to use
- * Adjustable operational pressure of up to 9.5 bars
- * Display operated
- * Operational again within minutes following use
- * 30 minute maximum heating mode
- * Built in furnace
- * Consistent pressure throughout processing
- * Multi-programming for numerous materials, appliances and restorations
- * Easy to operate
- * High-level safety features
- * Adheres to CE standards
- * Easy cleanup
- * Comprehensive training courses and ongoing online support
- * Available in 230v, 50-60Hz and 110V

MANUAL INJECTOR

EFFICIENT AND EASY TO USE – MANUAL THERMOPLASTIC INJECTION PRESS USED IN CONJUNCTION WITH THE PERFLEX DIGITAL OVEN

The PERFLEX manual injector is a powerful machine with temperature adjustable heating oven, that guarantees consistent, accurate results and melting of Perfex thermoplastics with easy cleanup and maintenance.

The manual injector includes a Basic starter kit with an assortment of Perfex thermoplastics and processing materials.

BENEFITS:

- * Consistent, precise results
- * Compact and cost effective
- * Easy to use
- * Processes injections of almost all thermoplastics
- * Adjustable temperature heating oven
- * Display operated
- * Operational again within minutes following use
- * Oven separated from the injector
- * Easy to operate

The manual injector includes:

- 1 Manual Flexible denture injector
- 1 Heating oven
- 1 cartridge sleeve
- Bronze discs small and large 2 Each
- 2 Flasks
- 1 Knock out tube

- * High-level safety features
 - * Adheres to CE standards
 - * Easy cleanup
 - * Comprehensive training courses and ongoing online support
 - * Oven Available in 220 V and 110 V
 - * Use with 25mm cartridges
- Yelds approx.. 30 cases per day

STARTER KIT 77001

Starter Kit includes all the materials and accessories necessary to produce more than 15 aesthetic thermoplastic dentures.

55236	Grey Silicon Point G147B	Silicon point	1
55238	Grey Silicon Point G127C	Silicon point	1
55221	Red Arti-foil	Sample arti-foil articulating film	1
WAXES			
55802	Red Sprue wax	5 mm sprue wax	1 bag 25g
POLISHING KIT			
55301	Polifast Pumice	Polish powder	1 lb bag
55302	Polish Bar	Blue	1 unit
55303	Polish Bar	white	1 unit
55304	White Rag Mustin Buff 4"	Leather center	3 units
55305	Brown Slim Brush	Soft brush medium size 48 mm	1 unit
PROCESSING MATERIALS			
55702	Cement	Glue agent to secure teeth in plasters	1 bottle 15ml (liquid)
55402	Lubrisil	Lubricant and Mold release	1 bottle 100ml (liquid)
55501	Isosep Film	Separator & isolation media for T-crystal, Acryfree & Biosens	1 bottle 100ml (liquid)
55502	Isosep Glaze	Separator and isolation media for Flexinylon (non film)	1 bottle 100ml (liquid)
55503	Isosep Oil	Separator & isolation media for T-crystal & Biosens second step	1 bottle 50ml (liquid)
55701	Fuse	Repair liquid (bonding agent)	1 bottle 15ml (liquid)
55902	Flexi Clean Denture Cleaner Kit	Denture cleaner total net weight 84g	12 mini jars for 1 year use

PROCESSING TOOLS & MATERIALS

HIGH QUALITY ACCESSORIES FOR ACCURATE RESULTS

Perflex's complete line of processing accessories provides tools for precise products from the first step through the finishing touch. Individually, or in

convenient kits, Perflex tools are the most reliable way to process state-of-the-art thermoplastic appliances and restorations.

PROCESSING TOOLS & MATERIALS

TOOLS & ACCESSORIES

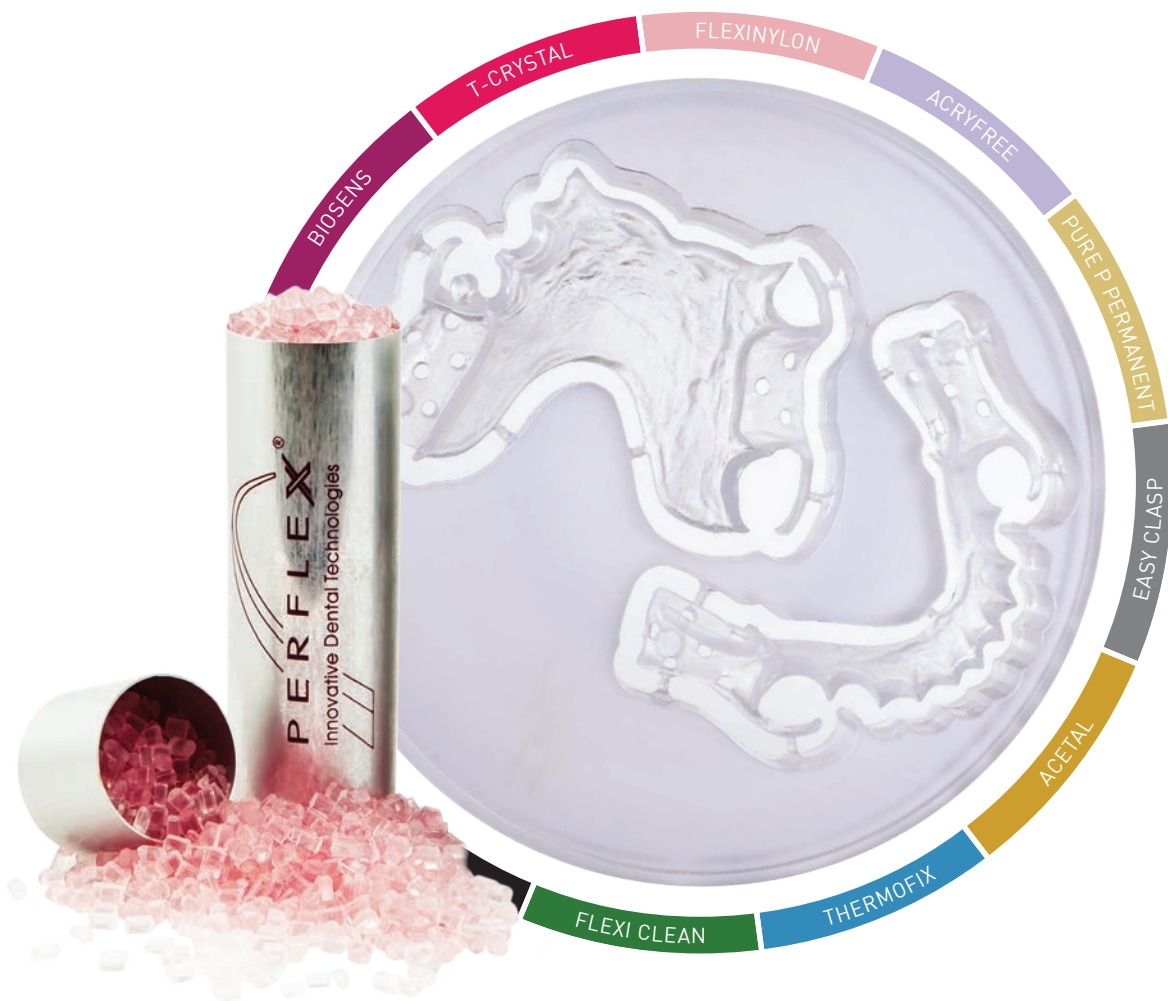

CAT NO.	ITEM	DESCRIPTION	UNIT/SET/KIT
PROCESSING EQUIPMENT			
55001	Smart 101- 500	Injection Machine Suitable For All Thermoplastics Types. Including Injection Flask Only.	
EMPTY AL. TUBES/CARTRIDGES			
55100-S	25 mm diam.Tube & Cap	Small 45Mm Long (80 Sets Min.) Soft	1 set
55101-S	25 mm diam.Tube & Cap	Extra Large 110 Mm Long (40 Sets Min.) Soft	1 set
55102-S	25 mm diam.Tube & Cap	Large 101 Mm Long (40 Sets Min.) Soft	1 set
55103-S	25 mm diam.Tube & Cap	Medium 76 Mm Long (40 Sets Min.) Soft	1 set
55101-H	25 mm diam.Tube & Cap	Extra Large 110 Mm Long (40 Sets Min.) Hard	1 set
55102-H	25 mm diam.Tube & Cap	Large 101 Mm Long (40 Sets Min.) Hard	1 set
55103-H	25 mm diam.Tube & Cap	Medium 76 Mm Long (40 Sets Min.) Hard	1 set
55104	28 mm diam.Tube & Cap	Large 87 Mm Long (100 Sets Min.)	1 set
55105	28 mm diam.Tube & Cap	Medium 63 Mm Long (100 Sets Min.)	1 set
55121-S	22 mm diam.Tube & Cap	Large 120 Mm Long (100 Sets Min.) Soft	1 set
55122-S	22 mm diam.Tube & Cap	Medium 85 Mm Long (100 Sets Min.) Soft	1 set
55106	Injection Flask	Injection Flask	1 unit
55107	Soldering Torch	Hot Air Welder	1 unit
55108	Scalpel blades no.15	Blades	100 units pack
55109	mini Toarch (discontinued)	Flame Toarch	1 unit
55110	Timer	Digital Timer	1 unit
55112	Pneumatic Buterfly	Pneumatic Screw Driver	1 unit
55113	Surveyor	Two Axis Paralelometer	1 unit
55114	Red Pensil	Pensil	1 unit
55115	Universal Plastic Glasses	Safety Glasses	50 units pack
55116	Pensil Toarch	Flame Toarch	1 unit
55117	Closing Plier for Aluminum Tubes	Crampon/Plier	1 unit
PROCESSING TOOLS			
FINISHING			
DRILLS			
55201	Twist drills no.6	Retention Burs Thin	6 units pack
55202	Twist drills no.9	Retention Burs Medium	6 units pack
55203	Twist drills no.12	Retention Burs Large	6 units pack
DIAMONDS			
55204	Diamond bur jumbo	Coarse Grinding	1 unit
55205	Diamond bur jumbo	Medium Grinding	1 unit
55206	Diamond bur jumbo	Fine Grinding	1 unit
CARBIDES			
55207	Carbide bur	Plane Cut,Toarch Type	20 units pack
55208	Carbide bur	Plane Cut,Flame Type	20 units pack
55222	carbide bur	Round Small Carbide	6 units pack
STONES			
55209	Brown Stones	Grinding Mounted Stone	100 units pack
55210	Pink Stones small	Grinding Mounted Stone	100 units pack
55211	Pink Stones large	Grinding Mounted Stone	100 units pack
RUBBER WHEELS			
55212	Green Wheels	Disk Rubber Wheel	100 units pack
55213	Green Wheels	Cylinderrubber Wheel	100 units pack
55215	Mandrel no 1	Mandrel For Disk	100 units bag
55216	Mandrel no 2	Mandrel For Cylinder	100 units bag
55217	Round White Soft Brush	Mounted Round 19Mm White Soft Polishing	12 units box
55218	brown medium soft brush	Mounted Star/Round 19Mm White Soft Polishing	12 units box
55219	puff mounted brush	Small Puff For High Polish	12 units box
55220	coton yarn brush	Mounted Brush	12 units pack
55223	Blue Rubber Wheel	Thik	10 units pack
55224	Blue Rubber Wheel	Thin	10 units pack
55221	Articulating plastic foil	Extra Thin Double Sided Red	1 unit
55233	Gray Silicone point G157A	Mounted Round Silicone Wheel	10 units pack
55234	Gray Silicone point G157C (55214)	Mounted Round Silicone Wheel	10 units pack
55235	Gray Silicone point G157H	Mounted Round Silicone Wheel	10 units pack
55236	Gray Silicone point G147B	Mounted Round Silicone Wheel	10 units pack
55237	Gray Silicone point G147R	Mounted Round Silicone Wheel	10 units pack
55238	Gray Silicone point G127C	Mounted Round Silicone Wheel	10 units pack

TOOLS & ACCESSORIES

CAT NO.	ITEM	DESCRIPTION	UNIT/SET/KIT
POLISHING			
55301	Polifast	Polish powder 1lb (454gr) bag	20 units pack
55302	Blue Polish Bar	Prepolishing	2 units pack
55303	White Polish Bar	Final polishing	2 units pack
55304	White rag muslin buff 4"	Leather center non stitched buffing brush	10 units pack
55305	Brown slim brush	Soft brush medium size 48mm	10 units pack
LUBRICANTS			
55401	Lubrigel	Al.tubes/cartridges lubricant	can 100ml (gel)
55402	Lubrisil	Lubricant & mold release	bottle 250ml (liquid)
SEPERATORS			
55501	Isosep film	Separator & isolation media for T-Crystal & Acry Free	bottle 250ml (liquid)
55502	Isosep glaze	Separator & isolation media for Flexi Nylon(non film)	bottle 250ml (liquid)
55503	Isosep oil	Separator & isolation media for T-Crystal (second step)	bottle 150ml (liquid)
DUPLICATING MATERIALS			
55601	Geliflex	Duplicating gelatine	1can (~4kg)
55602	Duplacting Flask	Duplacting flask	1 unit
GLUES			
55701	Fuse	Repair liquid (bonding agent)	bottle 30ml
55702	Cement	Glue agent to secure teeth in plasters for Flexi Nylon	bottle 30ml
WAXES			
55802	Red sprue wax	Wax 5/7 mm dia.	100g
55805	Block out wax	Wax for cr-co paralelometer	150g block
ASSORTIMENT KITS			
7000-1	Finishing Kit	Technician tools	
7000-2	Polishing Kit	Technician tools	
7000-3	Dr Adjustment Kit	Dentist tools	
DR ADJUSTMENT KIT 7000-3			
55217	White soft brush	Round Brush	1 unit
55220	White Cotton Yarn Brush	Cotton Yarn Puff White Brush	1 unit
55222	Round Small Carbide	Carbide	1 unit
55209	Brown Mounted Stone	Stone	1 unit
55210	Pink Mounted Stone	Small Stone	1 unit
55211	Pink Mounted Stone	Large Stone	1 unit
55208	Carbide Flame	Carbide	1 unit
55207	Carbide Torch	Carbide	1 unit
55212	Green Wheels	Disk Rubber Wheel	3 units
55213	Green Wheels	Cylinder Rubber Wheel Point	3 units
55223	Grey Jumbo Silicon Point	Jumbo Silicon Point	1 unit
55224	Red Arti-Foil	Sample Arti-Foil Articulating Film	1 sample
