HONEYCHEW[®]

"Kejriwal Group, the first and largest Quality Honey processor and exporter from India brings premium Export Quality honey comparable to USA standards. It is honey that is ethically procured through our network of registered beekeepers and delivered on your table only after stringent quality checks in international labs and free of any adulterants and antibiotics.

We follow internationally acclaimed beekeeping practices that keep the interest of bees, beekeepers and our customers at the forefront. Our efforts have helped 100% pure Indian honey to be amongst one of the most sought after honey varieties in the world. Honey connoisseurs, across the globe, absolutely love **Nature's Nectar Honey**.

With the vision of supplying pure organic products procured straight from their pristine source, we have recently expanded our portfolio by adding a premium range **"VANANTARA – THE MUSIC OF THE FOREST**. "Vanantara's Honey Range - The Nectar of the Forest, is delightful blend between organic honey and specially sourced

Kejriwal Honey has continuously strived to adhere to stringent norms in its production process to let its customers avail of the ultimate benefits of honey in its purest form.

The Company's endeavour has resulted in the manufacturing of some of the most sought after honey products, which have been acclaimed across the globe.

The company's manufacturing expertise has not only been confined to raw honey but it has even extended its horizons to other products. Its brands include a variety of natural products, which boast of honey's healing qualities with other natural

ORGANIC HONEY

— with Organic herbs & spices —

At Vanantara, Our Brand philosophy stems from the spirit of the bees, the primary pollinators of the ecosystem, giving back as much as they take, if not more. It is this philosophy that commits Vanantara as the caretaker of their social and economic environment; sourcing redefines the way Organic produce is marketed by procuring from remote areas of the Highlands, Tribal areas and deep Tropical Forests that are naturally organic and bereft of any
