Natural, antibiotic free wound treatment for your pet

Mānuka Vet®

SKIN & WOUND MANAGEMENT

Wounds and injuries are an inevitable part of pet ownership. Many of these wounds can be treated easily and safely at home. So, it's useful to have an effective, natural, antibiotic free wound treatment around the property to protect and heal minor wounds and skin abnormalities better and faster.

Studies have shown that only genuine New Zealand medical grade Mānuka honey (from the *Leptospermum scoparium* plant) possesses all the necessary properties to help heal even the most frustrating of minor wounds faster, with less inflammation and scarring.

Our products have been formulated and tested by veterinarians and use only the best medical grade Mānuka honey to offer an incredible wound healing solution that combines the best nature and science has to offer.

Skin & Wound

GEL

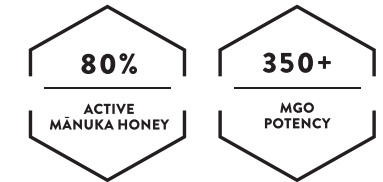

AVAILABLE IN 20G AND 100G TUBES

- Consists of 100% *Leptospermum scoparium* (Mānuka plant) honey from New Zealand
- Certified 500+ MGO
- Contains pure honey with no other added ingredients
- Medical grade & sterile
- Ultra-filtered
- Can be safely applied to a wound under a bandage or applied directly onto an open wound

The Gel is intended for the management of minor wounds in the early stages of healing, prior to the use of Mānuka Vet® Skin & Wound Crème, or as the sole topical treatment until wound healing is complete.

Skin & Wound

CRÈME

AVAILABLE IN 100G TUBES

- Consists of 80% *Leptospermum scoparium* (Mānuka plant) honey from New Zealand
- Certified 350+ MGO
- Contains added emollients, and natural oils to help repel nuisance insects
- Medical grade & sterile
- Ultra-filtered
- Can be applied directly onto an open wound (not to be applied under a bandage)

The Crème is designed to complement Mānuka Vet® Skin & Wound Gel by being able to be used in the latter stages of healing minor wounds, or as the sole topical treatment until wound healing is complete.
