

Carbide abrasive tools consist of granulated sintered tungsten, small sharp grains of metal, which are evenly soldered onto a steel plate. This combination makes these tools extremely resistant and make them extremely long lasting. Tungsten carbide has almost the same hardness and resistance than diamond based products and they can also withstand extreme temperatures.

**Type of usage:**

- rasping
- removing
- grinding
- preparing
- sanding
- finishing
- and more.

**Grit size:**

You can get our products in different grit sizes:  
3, 6, 10, 14, 24, 36, 60, 80, 120, 180, and 240.

Our products are not all available in all grit sizes.  
We produce products for 99 % of all types of machines.

**Wall and Sanding machines\***

- Ø 125 mm Ø 150 mm Ø 180 mm
- Ø 200 mm Ø 225 mm
- Ø 225 mm with 9 holes (for Festool)
- Ø 225 mm with 10 holes (for Flex)
- Ø 225 mm with 6 holes
- Ø 230 mm with 8 holes (for Rokamat and other type of machines)

Standard grit sizes:  
14, 24, 36, 60, 80, 120, 180 & 240

**CARBIDE**  
abrasive tools

**YOU name it.  
CARBIDE removes it.**

**Abrasive discs for Random orbital sanders\***

- ∅ 90 mm with 7 holes (for Festool)
- ∅ 125 mm with 8 holes (for Bosch, Makita, B&D & more)
- ∅ 125 mm with 9 holes (for Festool)
- ∅ 150 mm, 6 holes (for Bosch, Makita, B&D and more)
- ∅ 150 mm, 9 holes (for Festool)

Standard grit sizes:  
24, 36, 60, 80, 120, 180 & 240

\* All products are with Velcro

**Grinding discs for angle grinders**

- ∅ 115 x 22,2 mm (10 deg. angle)
- ∅ 125 x 22,2 mm (flat and rounded)
- ∅ 180 x 22,2 mm (flat and rounded)

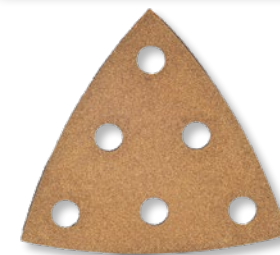

Standard grit sizes:  
14, 24 & 36

**Abrasive triangle for Delta sanders\***

- 80 x 80 x 80 mm for Fein
- 90 x 90 x 90 mm for Bosch, DeWALT, B&D, and more
- 95 x 95 x 95 mm for Festool

Standard grit sizes:  
24, 36, 60, 80, 120, 180 & 240

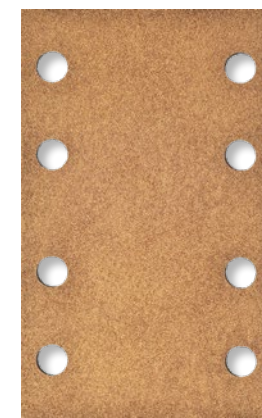

**Abrasives for Sanders\***

185 x 93 mm for Bosch, DeWALT, B&D, and more

133 x 81 mm for Festool

147 x 100 mm, 7 holes for Festool

Standard grit sizes:  
24, 36, 60, 80, 120, 180 & 240
