

Rim

Introduction

Healthy sitting since 1991

Rim

Introduction

The founders of RIM CZ, Milan Nagy and Rudolf Fukal, met in a factory connected with the aviation industry and they were united by the desire to establish something of their own.

In the emerging democracy, there was a need for office chairs, and so the plan that was to fill their evenings was clear. They started from scratch, without any capital and the necessary technology, just with the sketch of a chair. The first model saw the light of day in 1991 and stirred up great interest. They were soon making a thousand chairs a month and ten years after their founding the expansion to prosperous western markets came.

Now you can find our chairs in all corners of the globe except for Antarctica, we have a subsidiary in Asia and in Europe alone we have 500 dealers and business representatives. RIM CZ was transformed into a joint-stock company, though it is still headed up by those same two friends who dreamed about how to make quality chairs in their evenings after work.

A good design is becoming a key driver of innovative and successful companies. Therefore, RIM CZ is cooperating with international designers such as Massimo Costaglia, Giulio Mazzanti or Kai Stania.
