

„We build your solution“: This has been the guiding principle of VETEC ANLAGENBAU for decades. By consistently developing our product range for thermal treatment of foods and focusing on our customers, we have carved out an outstanding reputation worldwide.

Our impressive industrial customer base includes many well-known manufacturers of food in Germany and internationally.

APPLICATIONS

Our full-, semi-continuous thermal treatment systems cover the following range of applications and guarantee a high process safety and energy / resource efficiency:

OUR PRODUCT RANGE

AEROMAT FAMILY

Hot Smoking, Cooking & Cooling Installations

CLIMAMAT FAMILY

Climatic Maturing & Post-Maturing Installations

SMOKE GENERATORS

Glowing, Friction, Steam and Liquid

CONTROL SYSTEMS & ACCESSORIES

Software and Hygienic Design

Your satisfaction is our top priority. This is why VETEC ANLAGENBAU offers you comprehensive customer service. As well as customer-specific advice and tailored planning of your system installations, this includes individual services such as training, modifications and our spare parts service for wear parts.

✔ **Personal Advice & Product Development**

Take advantage of our fully equipped customer, testing and development centre for tests and demonstrations on a wide range of installations. We provide individual advice on appropriate installation systems for thermal food treatment. Arrange an appointment now. sales@vetec-anlagenbau.de

✔ **Technical Consulting & Training**

Our experienced engineers and master butchers support you with product launches, production optimisation, technical commissioning and process control. They provide you with optimum training on operating your installation systems - on site under local conditions. We help you to preserve the soul of craftsmanship business in large-scale industrial production. technology@vetec-anlagenbau.de

✔ **Service, Retrofit & Spare Parts Service**

From initial construction of your installation to smooth commissioning and maintenance, through to technical support and training as well as our spare parts service, retrofit to adapt existing installations to new conditions and remote service: You will find the right contact for all your issues here.
