

About Suncast

At Suncast®, we believe outdoor living should be beautiful, functional, and built to last. For over 40 years, we've been designing and manufacturing smart storage solutions and outdoor living products that elevate everyday spaces. From sheds and deck boxes to hose reels, garden beds, and outdoor furniture, our products are made with purpose, combining form, function, and innovation to meet the evolving needs of modern homeowners.

We're headquartered in Batavia, Illinois, just outside of Chicago, where all Suncast product is thoughtfully engineered and manufactured with quality, craftsmanship, and durability in mind. Whether you're organizing your garage, transforming your backyard, or creating a space to gather and entertain, we make products that fit real life and look good doing it.

Innovation is at the heart of everything we do. Our solutions are designed to solve everyday challenges while delivering long-term performance. One standout example: our 8x7 Cabana, a stylish blend of entertainment and storage that went viral this past summer for its versatility, design, and ability to completely transform a backyard experience. Select products also feature our proprietary PSC® Technology, engineered for enhanced durability, weather resistance, and strength at its core.

Suncast is also deeply committed to sustainability. We incorporate recycled materials into our manufacturing process and power our facilities with solar energy. Our products are made to last and are fully recyclable at the end of their useful life, helping to reduce landfill waste and support a more responsible future.

For the first time, we are bringing our most iconic collections to the European market. We're thrilled to be part of SPOGA and look forward to connecting, collaborating, and sharing what we believe is the future. Whether you're a retailer, distributor, or design enthusiast, we invite you to discover what makes Suncast different.

Built for Everyday Life.

Visit us at our booth to experience it for yourself.
