Contains: 2 x 290ml Jars

Equipments

Focus Plus

Focus plus is LED curing light which has consistent output of 1,800mW/cm² (high-mode). There are 2 modes to choose from including soft-start mode to reduce polymerization shrinkage.

Vacu-Mixer

Vacu-Mixer is world's first portable impression auto-mixer. By pressing the button, it brings you flawless auto mixing without voids.

- 1:1 ratio eliminates mixing errors
- 10 seconds for full tray loading
- No voids
- Portable and compact
- Flawless auto mixing reduces chairtime and minimizes retakes

SPISCAN PRO

SPISCAN PRO is Phosphor Plate Scanner which delivers great digital X-ray image with 35µm pixel size. By providing different imaging plate sizes (0,1,2,3,4c), it leads users to use on various cases. We provide our own software and yet through TWAIN driver, it can also be linked with other dental diagnostic software.

Impression

I-SiL Premium Jumbo

Regular Set / Fast Set

A-Silicone Impression Material

Advantages

- Same great impression material as I-SiL Premium available for Vacu-Mixer
- Improved hydrophilicity at the surface from the start of mixing
- Designed to minimize voids and bubbles
- High tear strength to maintain impression integrity upon removal

Comparison of auto-mixing and manual mixing

manual mixing

automixing by Vacu-Mixer
