

COMMITMENT TO QUALITY

With dedication to innovation and precision, we have combined the reliability of aluminium with our experience in dental craftsmanship to create units that redefine what excellence is. The use of aluminium in our dental solutions contributes durability, corrosion resistance and a modern and elegant aesthetic. At Ancar, reliability is more than a word, it is a deep-rooted commitment that's at the core of everything we do. Throughout all these years, we have been at the forefront of dental technology, pioneers in innovation, redefining the whole industry's reliability standard.

When a customer chooses Ancar, they chose peace of mind.

Ortho

Aluminium Core

Sd-60

We present to you our orthodontic dental chairs SD60 and A3200, designed with innovative features and high-quality materials to enhance the excellence of both the dental professional and the patient.

UNRIVALLED DURABILITY:

Our SD60 unit is made of anti-corrosive aluminium, not plastic, which makes it a robust and long-lasting piece of equipment. After years of use, it will be as flawlessly white and crack free as the first day. It's an investment that will last over time, guaranteeing an enduring return for the surgery.

COMFORT AND EASE OF USE:

We stand out among the few dental units that include a built-in hydric box and spittoon. This not only ensures the patient's comfort, but also makes it easier to clean the suction hoses and instruments used.

INNOVATION IN DESIGN AND FUNCTIONALITY:

Our SD60 unit has a hydric box attached to its structure and this guarantees that positions and distances stay the same, regardless of the chair's movements. This offers stability and precision in each procedure.

The hydric box can be opened up to 70°, which makes two-person jobs much easier. This unique feature optimises efficiency in the surgery, allowing faster and more accurate care to be offered.

SOME KEY ADVANTAGES:

- Made of anti-corrosive aluminium, not plastic.**
- One of the few dental units with a built-in hydric box and spittoon.**
- Hydric box attached to the chair.**
- Hydric box can open up to 70°.**

Ortho

Aluminium Core

We present the Orthodontic Dental Chair A3200, a revolutionary innovation in the field of dentistry, which is designed to elevate the experience for both professional and patient. Here we will show you what makes the A3200 the ideal choice for your surgery:

Ancar-3200

UNRIVALLED STURDINESS AND DURABILITY:

Made of anti-corrosive aluminium instead of plastic, the A3200 is built to last. After years of use, it will be as flawlessly white and crack free as the first day. This guarantees a long-lasting and trustworthy investment for your surgery.

AMBIDEXTROUS AND VERSATILE:

The unique design of the A3200 includes a fixed arm behind the chair, which means the whole unit can be ambidextrous. This characteristic makes it suitable for both right-handed and left-handed professionals, ensuring the equipment is comfortable and easy to use, no matter what the preference of the user.

SIMPLIFIED HYGIENE:

Unlike other dental chairs, the A3200 is designed without a hydric box or spittoon. This greatly facilitates hygiene at the clinic, since it's not necessary to worry about cleaning the spittoon or other related components. Eliminating the hydric box and the spittoon not only simplifies maintenance, but it also promotes a cleaner and tidier clinic space, facilitating compliance with the highest standards of hygiene and safety.

SOME KEY ADVANTAGES:

- Made of anti-corrosive aluminium, not plastic.**
- Ambidextrous equipment.**
- No hydric box, no spittoon.**

Serie 3

Touch Expert

These units are meticulously designed to offer the best experience for both the professional and the patient. They not only represent exceptional durability and resistance, but also incorporate innovative characteristics that improve the efficiency, comfort and safety of the dentist's surgery.

Sd-300

Touch Expert

DURABILITY AND RESISTANCE:

Manufactured with anti-corrosive aluminium instead of plastic, our SD300 and SD350 units are exceptionally robust and durable. After years of use, they will be as flawlessly white and crack free as the first day, making them a worthwhile and durable investment.

EASE AND EFFICIENCY AT WORK:

The hydric box can be opened up to 70°, which makes two-person jobs much easier. This unique feature optimises efficiency in your surgery, allowing faster and more accurate care. Smooth surfaces with minimal joints and corners make cleaning and hygiene in the surgery easier. This guarantees a clean and safe surrounding for your patients and your team.

Sd-350

Touch Expert

ERGONOMIC AND TECHNOLOGICAL INNOVATION:

With our wireless pedal, we eliminate the hassle of cables on the floor. This not only makes things more ergonomic, but it also reduces risks of tripping and accidents in the surgery. The large touchscreen is easy to read and highly intuitive, which simplifies the handling and control of the equipment during the dental procedures.

STABILITY AND PRECISION OF MOVEMENTS:

The hydric box is attached to the chair, which ensures that the positions and distances remain constant no matter what movement the chair makes. This provides stability and precision during treatments, guaranteeing optimal results for patients.

SOME KEY ADVANTAGES:

- Made of anti-corrosive aluminium, not plastic.**
- One of the few dental units with a built-in hydric box and spittoon.**
- Hydric box attached to the chair.**
- Hydric box can open up to 70°.**

by Ancar

Designed with unique features and the highest quality materials, these units are bound to transform the experience both for the professional and for the patient.

S³

UNRIVALLED DURABILITY AND STURDINESS:

Manufactured with anti-corrosive aluminium instead of plastic, our units are exceptionally robust and durable. After years of use, they will be as flawlessly white and crack free as the first day, guaranteeing that they are a worthwhile and durable investment.

ERGONOMICS AND COMFORT FOR THE PROFESSIONAL:

Our units are equipped with an ambidextrous assistant's arm, which can be used by right and left-handed professionals equally. This ensures the unit is comfortable and easy to use for all professionals. The hydric box can be opened up to 70°, which makes two-person jobs much easier. The hanging hoses are equipped with detachable and disinfectable supports, which prevent hand and wrist strain and facilitate in-depth hygiene in the surgery. The pole systems with 3D lateral movement are designed to avoid hand and wrist strain and also to reduce the need to make unnecessary gestures during procedures.

ADVANCED INNOVATION AND TECHNOLOGY:

The lamp can be switched off using the pedal, which eliminates unnecessary gestures and optimises efficiency during procedures.

ADAPTABILITY AND COMFORT FOR THE PATIENT:

Our units offer the option to select a standard chair type seat, which saves space in the box, makes getting in and out easier for the patient and reduces their anxiety, making the experience more comfortable and relaxing.

SOME KEY ADVANTAGES:

- Made of anti-corrosive aluminium, not plastic.
- Hydric box can open up to 70°.
- Ambidextrous assistant's arm.
- Hanging hoses: detachable and disinfectable supports
- Poles with 3D lateral movement.
- The lamp can also be switched off from the pedal.
- Option to choose a standard chair type seat.
