

**Cold Cure / Rapid Repair Powder & Liquid**

Packing :  
100 gms / 3 kg / lab pack  
Shades : Clear / Pink /  
Light Veined / Dark Veined

**Heat Cure / Cross Linked Powder & Liquid**

Packing :  
100 gms / 3 kg / lab pack  
Shades : Clear / Pink /  
Light Veined / Dark Veined

**Special Tray Material**

Special Tray Material for  
Individual impression trays.  
Base plates & stabilized  
base plates.

Packing  
500g / 250g (Green/Pink/Clear)

**Cold Mould Seal**

To create a film on Gypsum  
for easy separation

Packing  
110 ml  
5 Litre

**Impression Compound Sticks**

Green Tracing Sticks for  
recording border extensions  
on custom impression trays.  
Making of functional and  
relining Impressions

Packing  
10 Sticks, 15 Sticks, 100 Sticks

**Impression Compound**

Used for taking primary  
impression of edentulous  
teeth and becomes  
stable after cooling and  
is shrinkage free

Packing  
Pack of 5 Cakes

**Beading Wax**

To bead round the edge  
of a functional Impression  
prior to casting

Packing  
Pack of 12 strips

**Boxing Wax**

1) To create the land area  
of the cast.  
2) To build up vertical walls  
around the Impression to  
make a cast base.

Packing  
6 inch - 6 Sheets  
12 inch - 6 Sheets

**Mock-Up Wax**

Used for diagnostic wax up  
or mock up trial

Packing  
12 Sheets  
200 gms

**Bite Rims**

Bite Rims are occluding surfaces  
built on temporary or permanent  
denture bases for the purpose of  
making maxillomandibular  
relation records and for  
arranging teeth

Packing  
10 N

**Dental Stone (Type II, III & IV)**

Type II gypsum for providing  
optimal strength for diagnostic  
dental models. Type III gypsum  
for fabrication of dental models/  
base. Type IV for crown and  
bridge, dies and cast partials.

Packing  
30 kg

**Retention Mesh**

Reinforce the denture and  
reduces the chances of  
midline fracture of the  
denture

Packing  
10 N

**Clasp Profiles**

Wax clasp pro files for  
molars and premolars  
are designed to ensure  
good hold and stability for  
dentures

Packing  
10 N

**Perforated Wax Retainers**

Both partial and total dental  
prosthesis can be modelled  
easily and efficiently. MAARC  
wax retainers are available  
in packs of 10 pieces.

Packing  
10 N

**Lingual Bar**

Pre-formed lingual  
connector bars. Ideal  
for clasps, flange, and  
lingual connector areas.

Packing  
453 g

**Utility Wax**

Used for protecting and  
preserving the periphery  
edge in removable  
prosthesis

Packing  
5N, 12N, 48N, 96N, 250g, 500g

**Inlay/Onlay Wax Sticks**

Used for the construction  
of wax pattern using direct  
wax technique, for  
fabrication of inlay & onlay  
restorations

Packing  
10 Sticks

**Sprue Wax**

To make Path for metal  
to flow

Packing : 500 gms  
Dia.: 1.5mm / 2mm / 2.5mm  
3mm / 4mm / 5mm

**Palate Wax**

Used to improve denture  
quality by attaining a  
natural living tissue finish

Packing  
10 N

**Spacer Wax**

Wax used to hold space for  
impression material, base  
plate wax or tissue

Packing  
Upper - 25 Lower - 25

**Cad / Cam Wax Blanks**

1) Used for making crown  
and bridge through lost wax  
casting method.  
2) Calibration of cad cam  
machine.

Packing  
1 pc per pack

**Pattern wax / Inlay Onlay wax**

Preparation of wax pattern  
for cast metal restorations  
like inlays, onlays, crowns  
& bridges

Packing  
Pack of 200 gms

Ni-Cr Alloy	R2 Ceramic Alloy	Relief Wax	Eugenol
Find Fast	Chloro-Hx	Pumice Powder	Carving Wax
Die Spacer	Die Hardener	Die Lubricant	Casting Wax Sheets

(In-Office Tooth Whitening Kit)

8 minute cycle

**EDTA-17**

(Chelating / Lubricating Material)

**MTA**

Root and Pulp treatment material

**Packing**  
1 gm powder, 5 ml liquid, + Dispensing Scoop  
180 mg + 2 ml (Unidose Kit)

**Sealmax-R**

**The Platinum Standard Sealer**  
Resin based Root Canal Sealer

**Packing**  
10 gm powder, 10 ml Resin, + Dispensing Scoop & Mixing Pad

**Calahyd - RC**

**High pH (>12)**  
Calcium Hydroxide with Iodoform paste (for root canal dressing)

**Packing**  
1.5 gm x 2 Syringes with 4 Applicator tips

**D-Vitz**

Pulp Devitalizing paste, Arsenic Free

**Packing**  
3 gm Syringe + 5 Applicator tips

**Endo Paste**

17% EDTA with Carbamide Peroxide (Root canal conditioner)

**Packing**  
3 gm Syringe with 3 Applicator tips

**Hemostaz Gel / Solution**

**Acts within 1-2 minutes**  
Hemostatic agent (25% Aluminium Chloride)

**Packing**  
Hemostaz Gel - 3 gm Syringe with 10 Applicator tips  
Hemostaz Solution - 15 ml

**ETC-37**

Etching Gel & Liquid with 37% Phosphoric Acid

**Packing**  
3 gm Syringe + 3 Applicator tips  
25 gm Syringe + 10 Applicator tips + 1 Connector  
5 gm x 3 Syringe + 10 Applicator tips  
15 ml x 1 Liquid bottle refill

**Twin Kleen**

Single Step Chelation & Irrigation

**Packing**  
100 Capsules  
25 Capsules

**CeraSeal-B**

Bioceramic Root Canal Sealing Material

**Packing**  
1 gm powder, 5 ml liquid, + Dispensing Scoop

**Calcium Hydroxide Powder**

**High pH (>12)**  
Calcium Hydroxide Powder with Barium Sulphate

**Packing**  
15 gm

**T-Fill**

Type II - Temporary Cement for bases and temporary restoration (Eugenol Free)

**Packing**  
40 gm pack

**Endogel-RC / Endo-L**

17% EDTA Gel & Liquid for Smear layer removal

**Packing**  
Endogel-RC: 3 gm Syringe with 3 Applicator tips  
Endo-L: 100 ml Bottle Refill

**Zirprophy**

Zirconium Silicate based Prophylaxis Paste

**Packing**  
45 gms, 340 gms

**F-Sol**

Indicated as a disinfectant and devitalizing solution used as part of endodontic treatment

**Packing**  
15 ml

**Sodium Hypochlorite**

Endodontic irrigation solution intended for rinsing root canals. It improves cleaning of root canals from the remnants of the treated tissue.

**Packing**  
3% - 250ml  
5% - 250ml

**GSOL**

Orange oil (D-limonene) based Gutta Percha Solvent for removing gutta percha at the time of Re-root canal treatment

**Packing**  
15 ml

**Calx-O**

**High pH (>12)**  
Calcium Hydroxide Paste with Barium Sulphate

**Packing**  
Calx-O - 1.5 gm x 2 Syringe with 4 Applicator Tips

**Bite Registration Wax**

For Registering Bite of patient for Prosthetic applications

**Packing (10 pcs)**  
Bite Registration Wax (Aluminium Filled)  
Classic BRW Extra Hard (Aluminium Filled)  
Perfect Bite (Zero tolerance)  
Bite Wafers

**Articulating Paper**

To highlight occlusal contacts and distribution of occlusal forces

**Packing**      **Thickness**  
1 Box of 10 Books (Red)      40µ, 70µ, 100µ  
1 Box of 10 Books (Blue)      40µ, 70µ, 100µ  
1 Box of 10 Books (Red/Blue)      40µ, 70µ, 100µ  
1 Box of 6 Books Horseshoe (Red/Blue)      40µ, 70µ

**Calx**

**High pH (>12)**  
Calcium Hydroxide Paste with Barium Sulphate

**Packing**  
3 gm x 1 Syringe with 3 Applicator tips

**Reinforcement Mesh**

Reinforce the denture and reduces the chances of midline fracture of the denture

**Packing**  
Golden Pack of 10 Pcs  
Silver Pack of 10 Pcs

**Modelling Wax (Base Plate Wax)**

Type 2 low-fusing wax used for indirect wax technique. Fabrication of occlusal rims, fabrication of trial denture base, registering of jaw relations etc

**Packing (12 sheets/500 gms)**  
Modelling Wax Regular  
Modelling Wax Red  
Plasti wax Type 6  
Hard Wax

**Shellac Base Plate**

Fabrication of trial denture base and custom impression tray during prosthetic rehabilitation in edentulous patients.

**Packing**  
12 pcs, 50 pcs, 100 pcs

**Dental Special Tray**

To make special tray

**Packing**  
10 pcs.

**Pro-Paste**

Prophylaxis Paste for cleaning and polishing the surfaces of teeth

**Packing**  
90 gms, 340 gms

**Plaque-D**

Plaque Disclosing Gel

**Packing**  
2 gm x 4 Syringe + 4 Applicator tips

**Lubri Spray**

Lubrication, cleaning & maintenance of dental handpieces / surgical instruments

**Packing**  
600 ml Can

**Ziego**

Zinc oxide + Eugenol kit

**Packing**  
30 gm powder  
15 ml liquid
