Capacity	For 18 to 75mL cartridges
Color	● teal
Ratio	1:1, 2:1
Elements	12
Length	67.6 mm
Outlet	D
Package	Pack of 50
Indications for use	Impression taking (tray material)
Order No.	186992

MIXPAC™ T-Mixer™ Mixing Tips

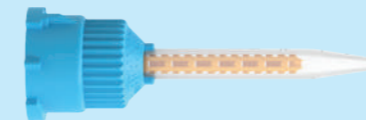

Capacity	For 18 to 75mL cartridges
Color	● pink
Ratio	1:1, 2:1
Elements	12
Length	59.4mm
Outlet	D
Package	Pack of 50
Indications for use	Impression taking Bite registration
Order No.	186988

Capacity	For 18 to 75mL cartridges
Color	● light blue
Ratio	1:1, 2:1
Elements	12
Length	49.8 mm
Outlet	S
Package	Pack of 50
Indications for use	Temporary Crown & Bridge
Order No.	186989

Capacity	For 18 to 75mL cartridges
Color	● yellow
Ratio	1:1, 2:1
Elements	12
Length	50.1 mm
Outlet	D
Package	Pack of 50
Indications for use	Impression taking (wash material) Core build-ups Relining
Order No.	186991

Capacity	For 18 to 75mL cartridges
Color	● light blue + orange elements
Ratio	4:1, 10:1
Elements	16
Length	57.6 mm
Outlet	S
Package	Pack of 50
Indications for use	Temporary Crown & Bridge
Order No.	186990

Other MIXPAC Candy Colors™ are available upon special order.

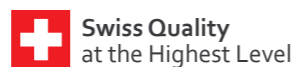

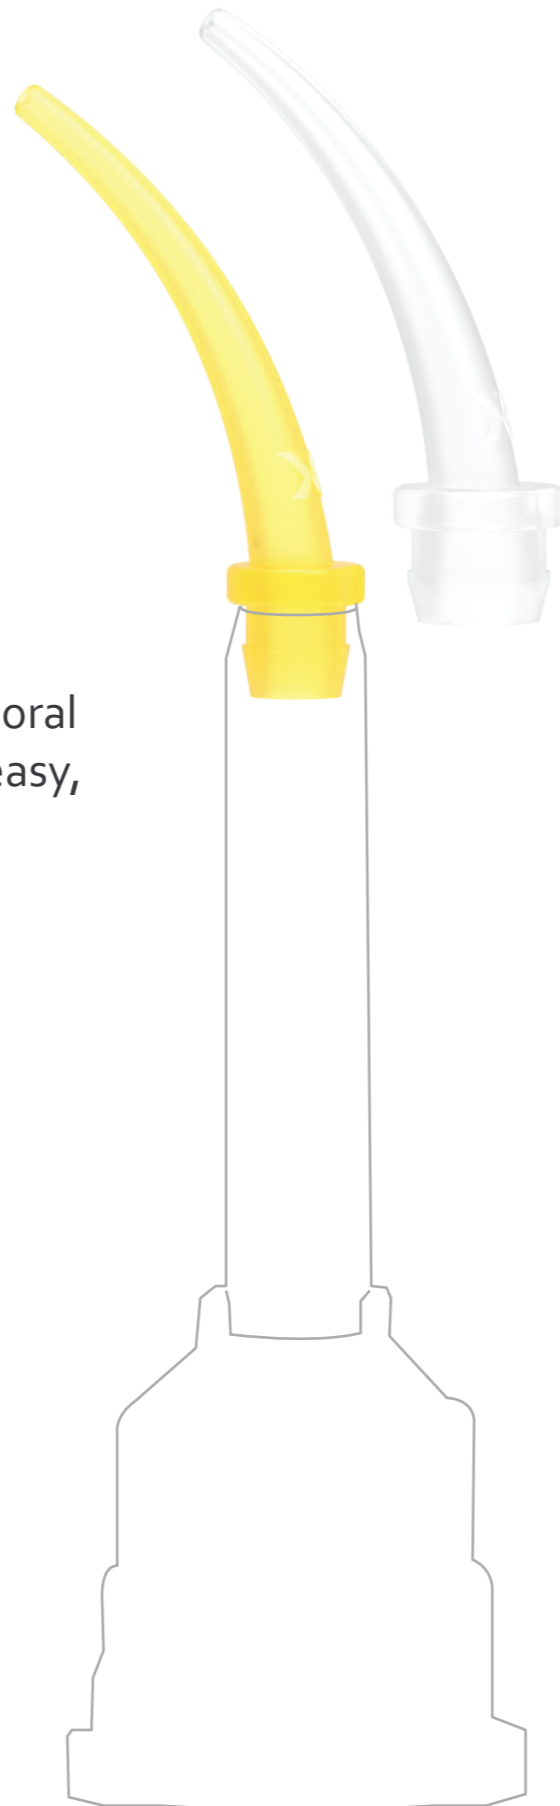

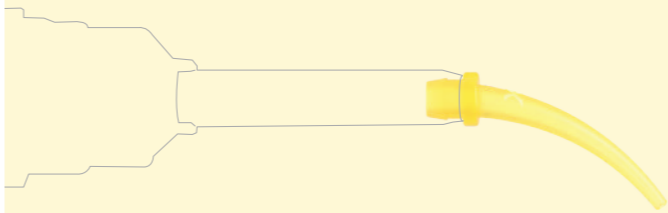

Mixing tip accessories

Intra Oral Tips

Intra Oral Tips are used primarily for intraoral applications in confined areas to ensure easy, precise and safe dispensing of materials.

Snap-on Intra Oral Tip facilitates easy, precise and safe dispensing of materials.

Capacity	For 18 to 75mL cartridges
Color	● yellow*
Ratio	1:1, 2:1
Size	Inner diameter: 0.6 mm Outer diameter 1.4 mm
Outlet	Connects to outlet D
Package	Pack of 100
Indications for use	Impression taking (wash material)
Order No.	186985

Capacity	For 18 to 75mL cartridges
Color	● natural*
Ratio	1:1, 2:1
Size	Inner diameter: 0.6 mm Outer diameter 1.4 mm
Outlet	Connects to outlet D
Package	Pack of 100
Indications for use	Impression taking (wash material)
Order No.	186986

yellow* – For use with wash material mixing tips / For Mixing Tip 5.4 mm and 6.5 mm diameter
natural* – For use with heavy body mixing tips / For Mixing Tip 5.4 mm and 6.5 mm diameter

T-Mixer™ Colibri™ Plus Breakable Mixing Tip

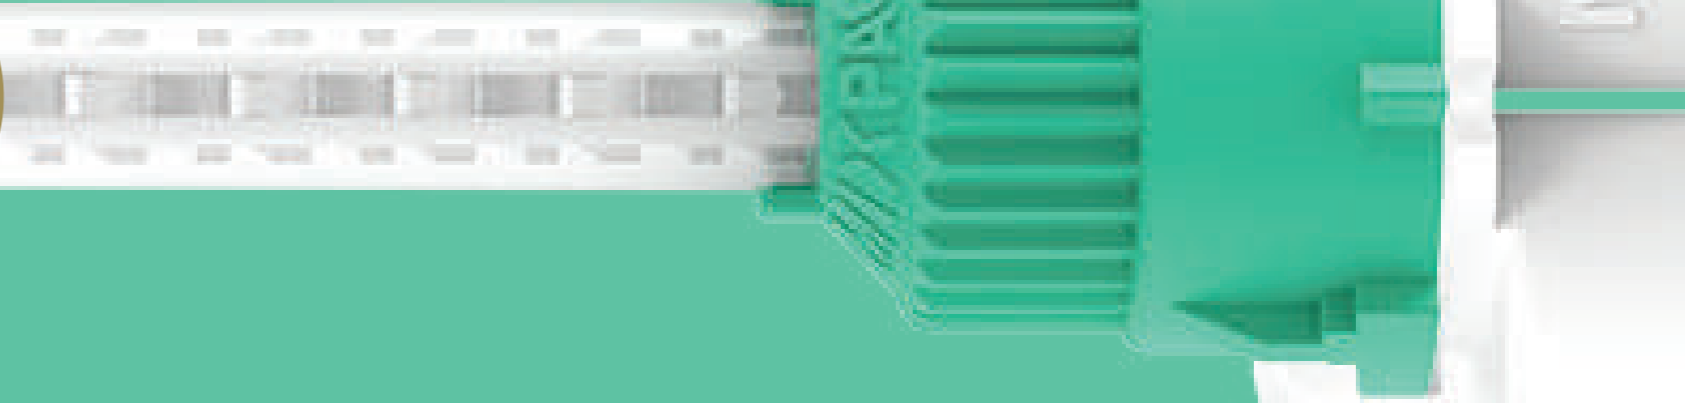

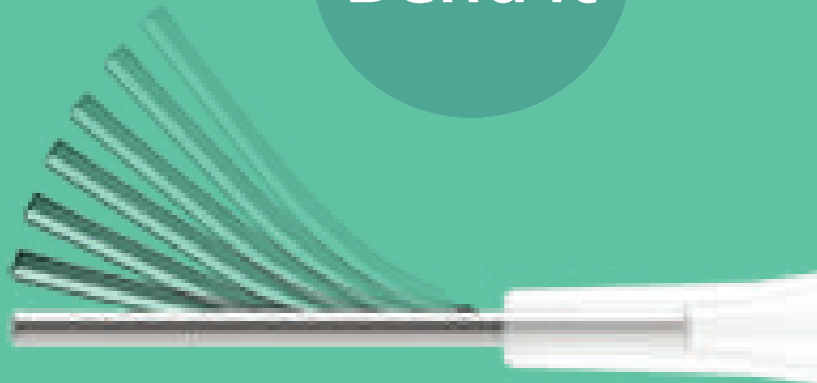

Designed for improved precision and increased flexibility.

2 in 1 SOLUTION
Improved workflow and savings with 1 less item to order!

Mixing tip with integrated cannula
for intra- and extra-oral
applications!

Step 1
Bend it

Step 2
Break it

360° rotatable cannula

Precise and customized application, smooth rounded design from cannula to minimize trauma to soft tissue.

Bendable integrated cannula

Designed for improved the precise application of material around the teeth to elevate the performance of impression of prepared tooth, Core build-ups, Cementation of root post.

Integrated breaking zone

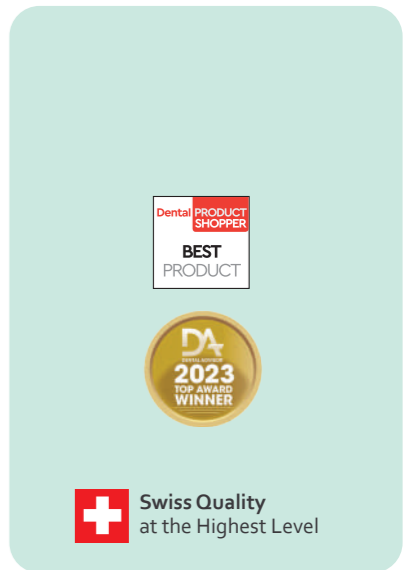

Break it and apply bigger amount of material.

Why Colibri™ Plus Breakable?

- ✓ Safe and precise application
- ✓ Easy access to difficult to reach areas
- ✓ Constant flow of material even when the cannula is bent
- ✓ Easy, precise and safe application due to ergonomic handling

“

MIXPACT-Mixer Colibri Plus Breakable simplifies selection of the mixing tip, since it provides dentists with an innovative, versatile and efficient mixing application system indicated for multiple types of prosthetic materials and applications.

”

Dr. Stefen Koubi, Associate Professor, Operative, Dentistry University of Marseille

Capacity	For 18 to 75mL cartridges
Color	● mint
Ratio	1:1, 2:1
Elements	12
Length (mixing tip + cannula)	63.8 + 15 mm
Package	Pack of 25
Indications for use	Impression of root canal Impression taking (tray material) Core build-ups Cementation of root post
Order No.	186987

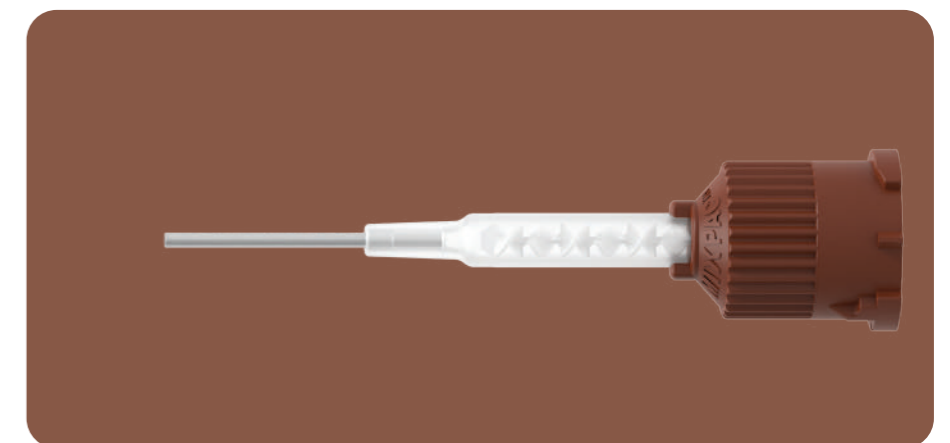

Cementation

MIXPAC™

Helical Mixing Tips

High Reliability and Efficient material mixing

The Original cutting-edge helical technology with a deep understanding of dental workflows, the MIXPAC helical mixing tips – ensure precise and consistent material mixing efficiency.

 Swiss Quality
at the Highest Level

Capacity	For 2.5 mL, 5 mL and 10 mL Systems
Color	● brown, natural elements
Ratio	1:1, 2:1
Elements	8
Length	33.4 mm
Outlet	D
Package	Pack of 20
Indications for use	Cementation
Order No.	187224

Capacity	For 2.5 mL, 5 mL and 10 mL Systems
Color	● brown, natural elements
Ratio	1:1, 2:1
Elements	8
Length	39.7 mm
Outlet	S
Package	Pack of 20
Indications for use	Cementation
Order No.	187225

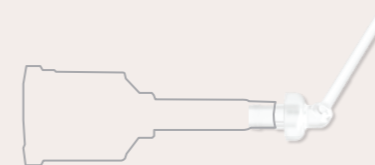

Capacity	For 2.5 mL, 5 mL and 10 mL Systems
Color	● brown, natural elements

MIXPAC™ Helical Mixing Tips & Tip

Root Canal Tip

Capacity	For 2.5 mL, 5 mL and 10 mL Systems
Color	● natural
Ratio	1:1, 2:1, 4:1, 10:1
Size	for 2.5 mm diameter mixing tips
Outlet	Connects to outlet D
Package	Pack of 20
Indications for use	Cementation
Order No.	187227

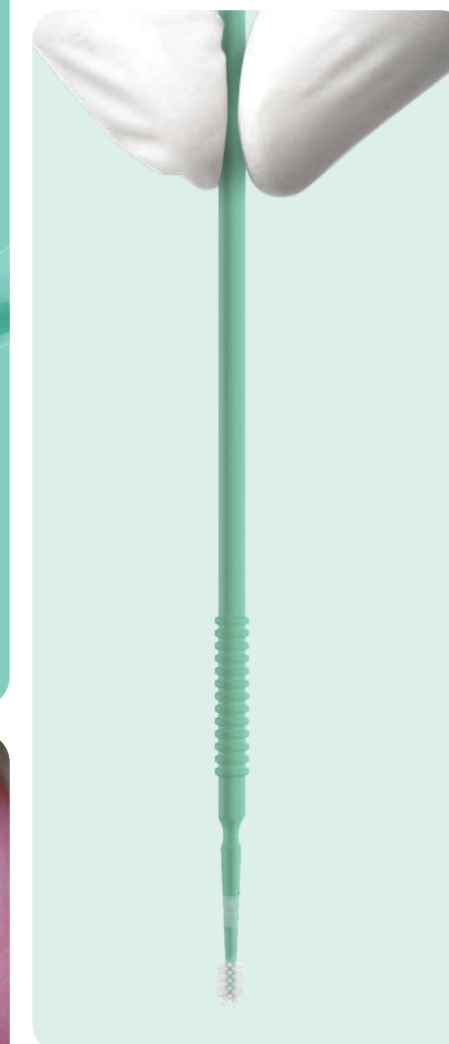

Adhesives and Restoratives

ZeroFloX™ Micro Applicator

The ZeroFloX micro applicator sets a new standard compared to conventional micro applicators. Its flock-free, pliable brush head and ergonomic handle with two bending points deliver precision application for esthetically pleasing clinical results.

Various range
of applications

 Swiss Quality
at the Highest Level

ZeroFloX™ Micro Applicator

FLOCK FREE

EASY ACCESS

SAVE MATERIAL

ONE-SIZE-FITS-ALL*

The ZeroFloX micro applicator is designed for efficient & flock-free application of:

- adhesives
- cements
- composite
- variety of other dental materials

Color	● mint
Size	Universal **
Package	Bag of 50 pcs. (184090) Bag of 100 pcs. (184091)
Packaging unit / Outer packaging	250 bags per packaging units (184090) 150 bags per packaging units (184091)
Shipping carton size	400 x 400 x 305 mm
Minimum order quantity	15.000 pcs. (1 shipping carton)
Types of dental material	Bonding agents Primers & conditioners Etchants Fluorides Desensitizers Cavity liners Composite-based resins Cements Sealants
Order No.	184090 184091

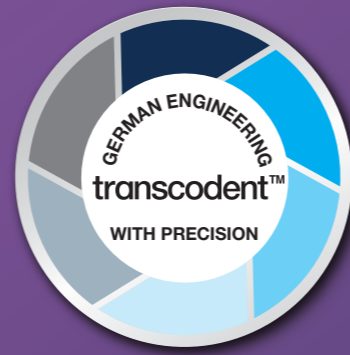

* Universal head size with a soft, pliable and thin anterior head design effectively combines the fine and regular diameter sizes used for conventional micro applicators into one size to help simplify clinical procedures and reduce inventory.
** Comparable to the average range of sizes used for regular, fine and super fine micro applicators.

Say hello to ZeroFloX™

The new standard flock-free micro applicator.

TRY IT. Apply it. LOVE IT.

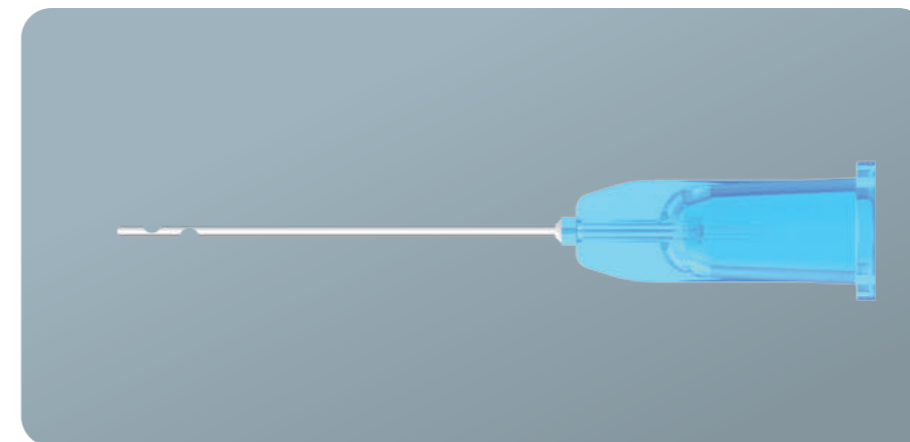

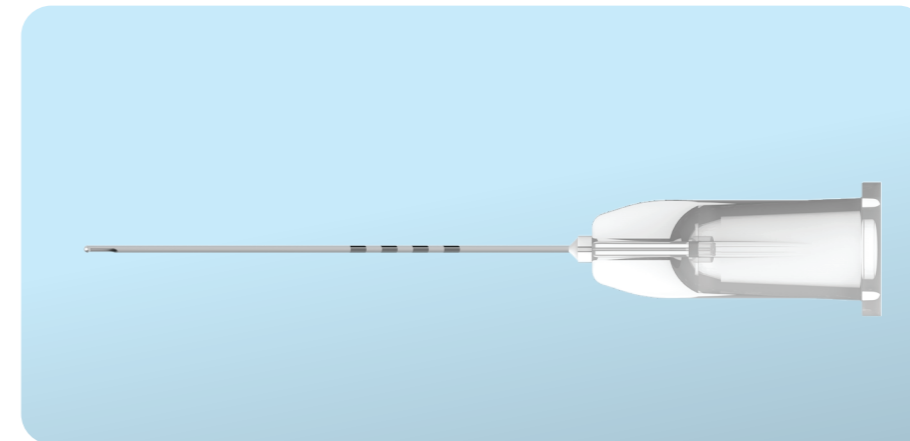

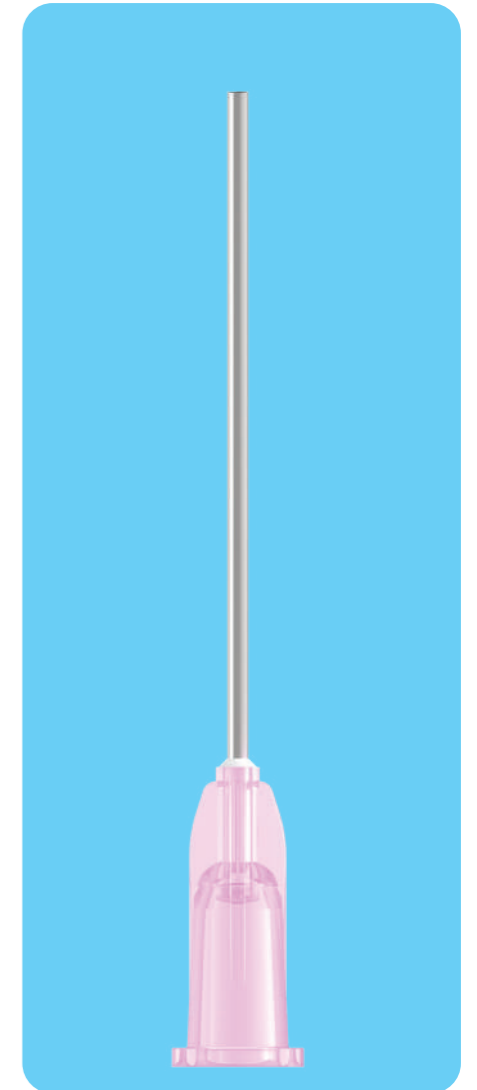

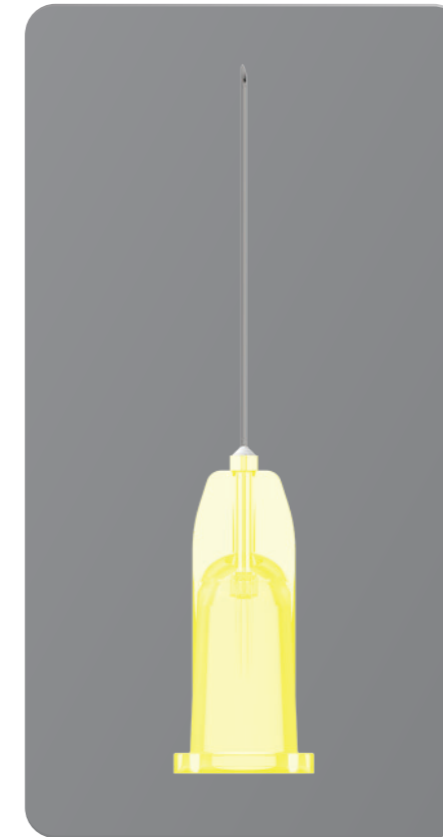

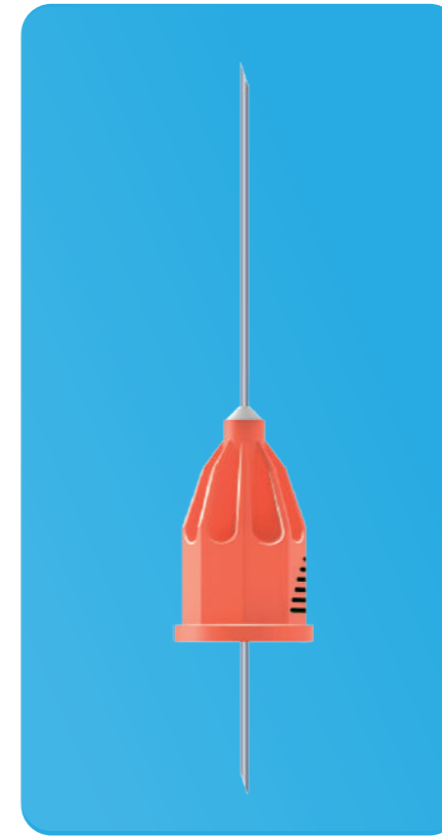

transcodent™ Dental Needles

German engineered products for comfort and safety.

Various range of applications

Anesthetics

Dental Injection Needles

Designed for effective and safe delivery of anesthetic solution to ensure optimal patient comfort.

The injection of local anesthetic is perhaps the greatest source of patient fear*; and the inability to obtain adequate pain control with minimal discomfort remains to be a significant concern.

The transcotent™ three-edge lancet and siliconized Painless Steel™ needles are technologies developed for injection of local anesthetics with reduced pain and minimum adverse effects - using traditional syringes.

transcodent™

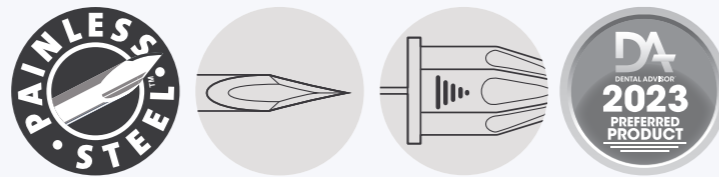

* Kindly refer to Dr. Rice video:
[transcodent™ Painless Steel™ Injection Needles \(Inferior Alveolar Nerve Block\) \(youtube.com\)](https://www.youtube.com/watch?v=...)

transcodent™

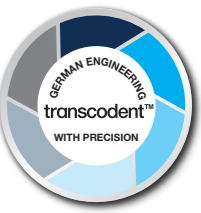

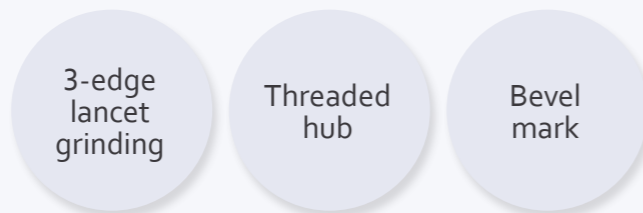

Painless Steel™

DENTAL INJECTION NEEDLES

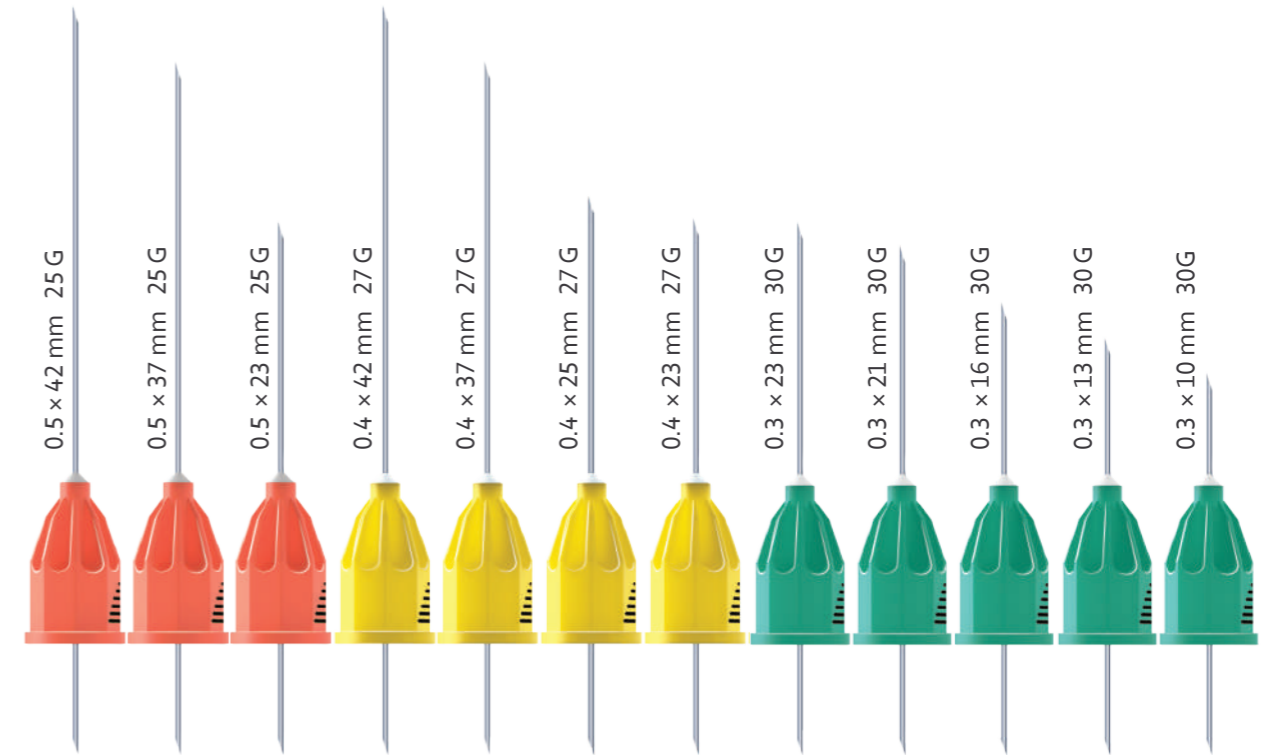

PRODUCT FEATURES AND BENEFITS

- **Siliconized cannula with 3-edge lancet grinding** provides smooth entry which minimizes pain and discomfort to the patient
- **Hub bevel mark** facilitates orientation of the bevel
- **Threaded hub** for easy and safe handling
- EO sterilized

Painless Steel™

transcodent™

Luminject™

DENTAL INJECTION NEEDLES

The transcodent Luminject Injection Needles have thin-wall cannulas and therefore a larger inner diameter compared to standard-wall needles which improves the flow-rate of the anesthetic.

The reduced pressure during the injection causes less initial pain.

PRODUCT FEATURES AND BENEFITS

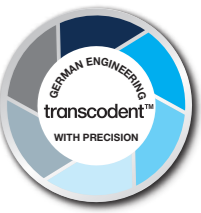

- **For intraligamentary & infiltration anesthesia** in the upper and lower jaw and anterior regions
- **Increased flow** due to enlarged lumen
- **Thin wall** / higher flow
- EO sterilized

3-edge lancet grinding

Threaded hub

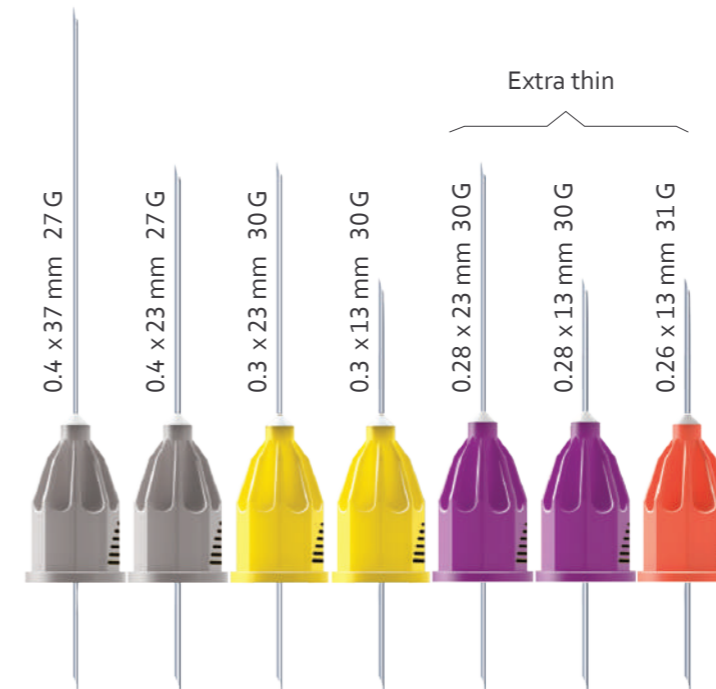

Bevel mark

Enlarged lumen = Increased flow

Endodontics Irrigation Needles

Double- and single-sided vent irrigation needles for increased safety and efficacy of endodontic irrigation.

Medical implications during an Endodontic procedure might be needle binding and wedging in the root canal, trauma to soft/hard tissue or even extrusion of the harmful irrigation solution beyond apical foramen.

transcodent™ Endo Irrigation Needles are especially developed to minimize these risks. Using the latest cutting-edge technology, the transcodent Endo Irrigation Needles increase safety and efficacy of endodontic irrigation.

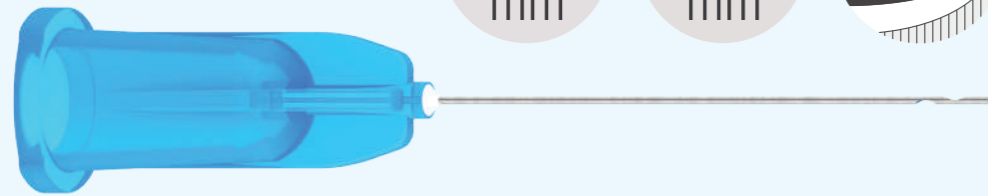

transcodent™

transcodent™

Endo Irrigation Needles

DOUBLE-SIDED VENTS

PRODUCT FEATURES AND BENEFITS

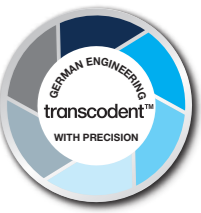

- **For gentle, effective irrigation** of the full length of the root canal
- **Closed-rounded tip with double-sided vent** minimize risk of:
 - needle binding or wedging in the root canals
 - trauma to soft/hard tissue
 - extrusion of irrigation solution beyond apical foramen
- **Thin-walled cannula:**
 - provides improved flow rate for optimal flushing effect
 - for increased flexibility and improved access
- EO sterilized

Two lateral vents

Thin-wall cannula

Flexible cannula

Closed rounded tip

Evacuation

Suction Needles

Designed for effective suction in areas with difficult access such as root canal or in a surgical site during oral surgery.

The transcodent™ Suction Needles stand for precise evacuation with maximal field of view for variety of uses, comprising endodontic treatment and precision suctioning during restorative treatment or surgery.

Paired with transcodent Endo Evacuation Needles the suction system even more allows very precise root canal drying.

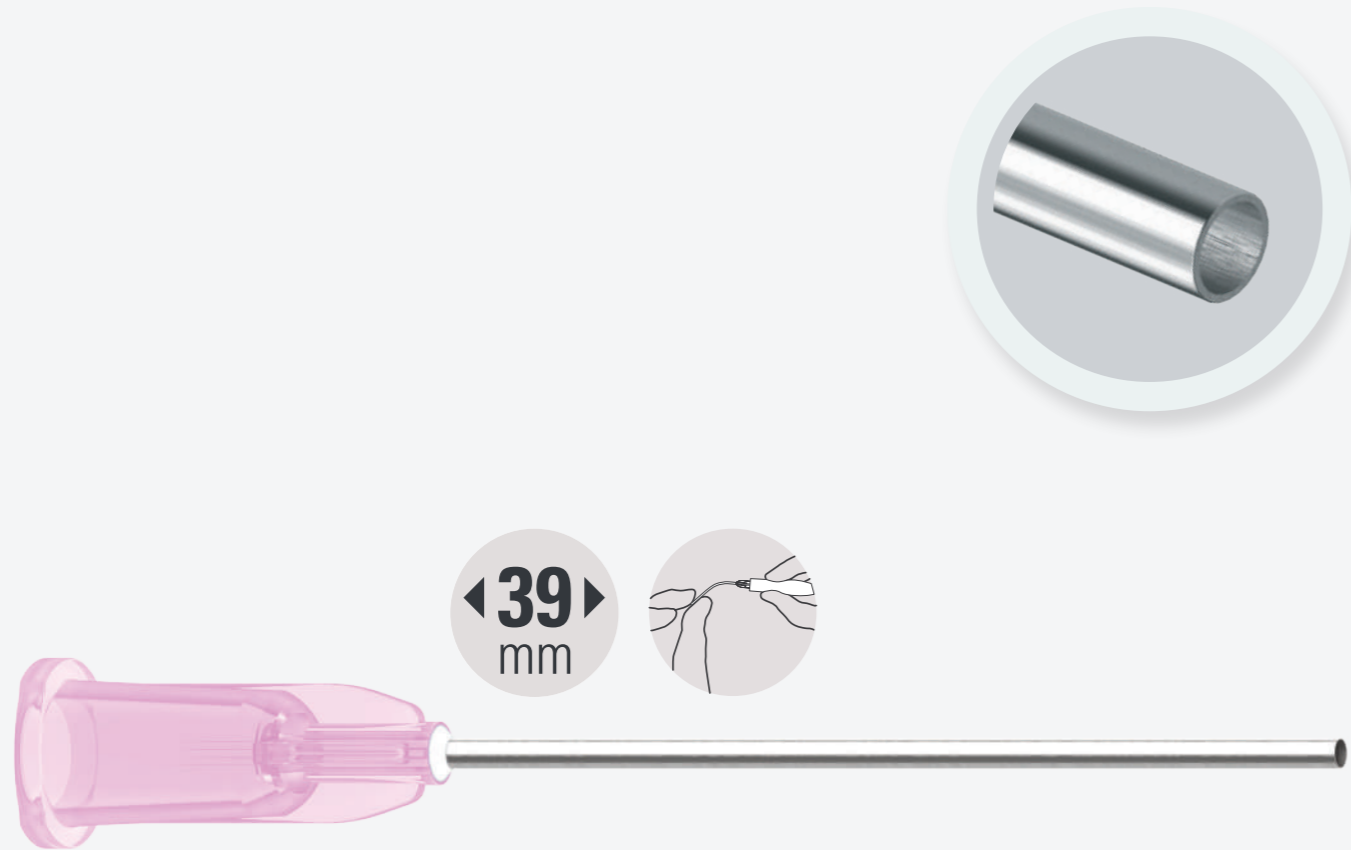

transcodent™

Suction Needles

LUER / LUER LOCK

PRODUCT FEATURES AND BENEFITS

transcodent™

Endo Evacuation Needles

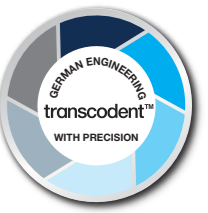

WITH LUER LOCK

transcodent Endo Evacuation Needles are designed to reduce trauma to the apex while providing effective suctioning in difficult access areas. Thin-walled cannula for increased flexibility and improved access.

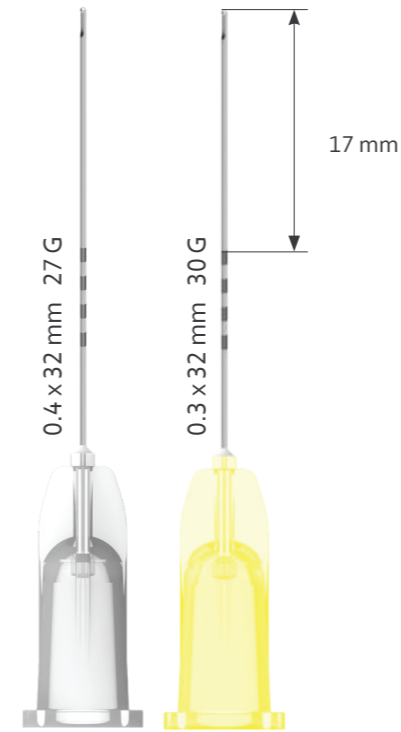

PRODUCT FEATURES AND BENEFITS

- **Apical side vent and closed rounded tip** for the safe suctioning near the apex
- **4 laser markings** for gentle suction of the full length of the root canal to reduce trauma to the apex
- **Luer lock hub**
- EO sterilized

Periodontics

Paste Needles

Sterile single-use Paste Needles, designed for effective paste application in periodontal pockets.

Gingivitis and Peridontitis - these Periodontic diseases are associated to bacterial colonization of tooth surfaces (plaque) and affect the tissues that support the teeth, that is the gums, periodontal ligament and alveolar bones.

Sterile transcotent Paste Needles are designed for superficial, external application of dental ointments, solutions and pastes on the gingival mucosa and into gingival pockets, including Periodontic irrigation, gel application and local drug delivery.

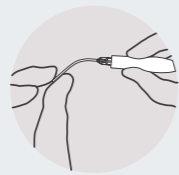

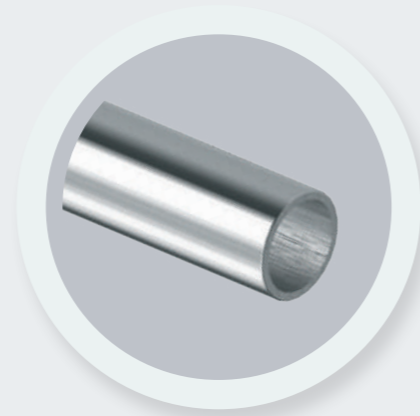

transcodent™

Paste Needles

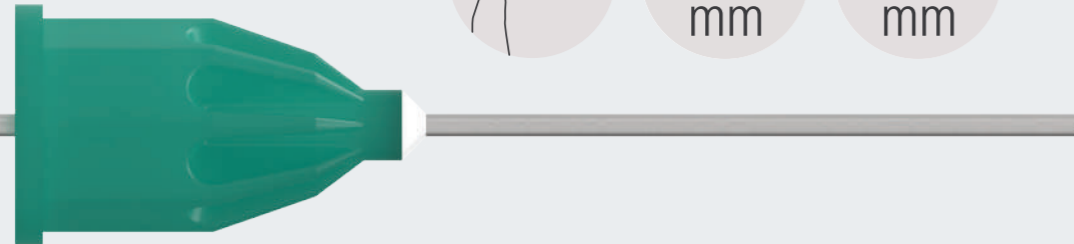

CYLINDER AMPOULES

Paste Needles are suitable for the application of pastes and gels
