Health Nature Beautiful

Company Profile

Huanghua Promise Dental Co., Ltd. is a professional manufacturer of disposable dental products. Promise Dental covers an area of 18,000 square meters and has two factories, which is accompanying infrastructure such as R & D, production, storage and sales.

Since established in 2008, Promise Dental has continuously improved the technological level, highlighted the advantages of mold design and manufacturing, and developed and produced a series of disposable dental products.

In 2011, the independent brand "Cotisen" was established. In 2017, the Brazilian branch was established. In 2019, the Indian branch was established. In 2020, the Japanese branch was established. In 2023, the Singapore Branch and the Slovakia Office were established. In 2023, a comprehensive factory building covering an area of 30,000 square meters is currently under preparation in the development zone. It is expected to be put into operation in 2025.

Becoming a well-respected and sustainable business enterprise is our corporate vision. Realizing the happiness of all employees, and providing value-for-money products, promoting the social development of the industry is our corporate mission of Promise Dental. Everyone in Promise Dental will pursue "Health, Nature and Beautiful" with the core values of "Integrity, collaboration, passion, innovation, sustainability and gratitude".

*Cotisen is Promise Dental's own brand, the company has passed ISO13485, CE, FDA, FSC and other quality and safety system certifications. The main products are Dental Sectional Contoured Matrices Kit, Micro Applicators, Face Shields and more than 100 kinds of dental products. Promise Dental has more than 200 exclusive agents for Cotisen brand in domestic, and the products are sold to more than 80 countries and regions such as Europe, America, Japan, South Korea, and the Middle East. Cotisen brand products has been widely recognized by domestic and abroad customers.

From 2013 to 2015, Promise Dental was rated as an advanced enterprise of scientific and technological innovation in Huanghua City for three consecutive years. In 2014, it was rated as a small and mid-sized technology-based provincial high-tech enterprise in Hebei Province. In 2019, it was listed as a key export enterprise in Hebei Province and an enterprise on the positive list of environmental protection. According to the development in the past three years, in 2019, it was rated as the leading enterprise of high growth among the thousand leading enterprises in Hebei Province. In 2020, our company was rated as an advanced collective in Hebei Province to fight against the new crown pneumonia epidemic. In March 2021, the general manager of Heqingxuan won the "Mayor's Special Award" of Huanghua City, and Promise Dental won the "Government Quality (Nomination) Award" of Huanghua City, and the same year won the title of "Specialized, Precision and New Small and Mid-sized Enterprises". Since the establishment of the company, Promise Dental has continuously carried out independent research and development, taking science and technology as the primary productive force, and currently has 63 patents, including 6 invention patents (5 Chinese patents and 1 US patent), 39 utility model patents, and 18 appearance patents.

Clamping Ring for Dental Use

It consists of U-shaped alloy spring clips and plastic chucks. The materials used are titanium-nickel memory alloy and PC plastic, which are super-elastic, memory, corrosion-resistant and biocompatible. The clamping force is weak, medium and strong respectively.

Advantage:

- U-shaped memory alloy clamping ring to ensure the strength of the ring;
- Soft and hard plastic clamping heads play an anti-slip effect;
- Head covered with transparent material, which does not affect light curing restoration;
- The design of the V-shaped clamping head can fix the two ends of the interdental space and make full contact with the wedge for more accurate positioning.

Item: SC0204/SC0205/SC0206

Specification: 25.5x22mm

Packing: 1 pc/box, 30 boxes/ctr

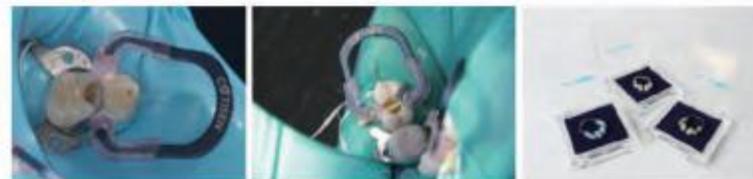

Carton Size: 270x150x140mm

Weight: 2.5KGS

Red (Strong)

Green (Weak)

Clamping Ring for Dental Use

The concave type design of the silicone pads conforms with the anatomy of the tooth adjacent surface, closely fixed on the matrix bands so it make the adjacent relations back to normal the silicone pads circle, vertical circle and triangle all of them can be used to fix the bands.

SC0401 Silicone pad

Packing: 50 pcs/box

Item: SC0201/SC0202/SC0203

Packing: 6 pcs/box, 10 boxes/bag, 24 bags/ctn

Carton Size: 360X360X280mm

Weight: 9 KGS

Silicone Clearance Wedge

Patent Number: ZL 2015 2 0937846.8

The appearance, hollow design, super elasticity can be easily put into any dentures. It is used to fix the resin matrix bands, suitable for repairing the smaller cavity of anterior teeth.

The hardness is 30HA.

Item: SC0301

Packing: 20 pcs/box, 10 boxes/bag, 24 bags/ctn

Carton Size: 360X360X280mm

Weight: 7.5KGS

Resin Matrix Bands

Made of transparent material, without affecting of the resin curing, easy of operation.

SC0601 / SC0602

Item: SC0601/SC0602

Packing: 50 pcs/box, 10 boxes/bag, 24 bags/ctn

Carton Size: 360X360X280mm

Weight: 7KGS

Matrix Bands

Patent Number: ZL 2019 2 1915792.X

Anti-Bleed Type: It's coated with Teflon non-stick material, which can prevent the matrix band from sticking to resin material during dental restoration, and make the filling resin surface smoother and reduce the adhesion of plaque.

Fac for Anti-Bleed Type: large purple, medium orange, small green.

Thickness is 0.03mm

Packing: 50 pcs/box, 10 boxes/bag, 24 bags/ctn

Weight: 9.5KGS

Carton Size: 280X280X220mm

Matrix Bands

Have been appearance, smooth surface, convenient operation. Concave type design ordinary matrix band and subgingival matrix bands make it easy to recover to the normal adjacency relations.

Thickness is 0.025mm, while maintaining strength, it can be applied to more adjacent spaces of teeth.

Ordinary Matrix Band

SC0501L SC0501R

SC0502L SC0502R

SC0503L SC0503R

Subgingival Matrix Band

SC0504L SC0504R

SC0505L SC0505R

Packing: 50 pcs/box, 10 boxes/bag, 24 bags/ctn

Carton Size: 360X360X280mm

Weight: 7.5 KGS

Matrix Bands

Compared with ordinary matrix band, new gingival matrix band reduce the formation of overhang at the gingival margin during dental restoration.

Compared with subgingival matrix band, it protects gingival from over damage when put into any dentures.

Universal type
SC0401 Large
SC0402 Medium
SC0403 Small

Thickness: 0.4mm

Packing: 50 pcs/box, 100 boxes/ctn

Carton Size: 280X280X220mm

Weight: 1.2 KGS

Matrix Bands

Have been appearance, smooth surface, convenient operation. Concave type design ordinary matrix band and subgingival matrix bands make it easy to recover to the normal adjacency relations.

Thickness is 0.025mm, while maintaining strength, it can be applied to more adjacent spaces of teeth.

Packing: 50 pcs/box, 100 boxes/ctn

Carton Size: 280X280X220mm

Weight: 5.5 KGS

Resin Matrix Bands

The product is made of polyester fiber, which can restore the defect tooth shape well. Secured with poly wedges, the matrix bands can fit tooth cervical firmly, reduce overhang to gum, and restore proximal contact point.

Item: SC09

Spec#1: 25X10X0.075mm 100 pcs / 100X10X0.075mm 20 pcs

Spec#2: 25X10X0.05mm 100 pcs / 100X10X0.05mm 20 pcs

Packing: 1 set/box, 50 boxes/ctn

Carton Size: 360X170X280mm

Weight: 8 KGS

Forceps

- High-quality texture, non-slip, it is better to use with COUSON Clamping Ring
- A reusable product can be sterilized at high temperature and pressure at 134°C after use.

Item: SC0702
 Packing: 1 pc/box, 30 boxes/ctr
 Carton Size: 280X280X220mm
 Weight: 6.5 KGS

Forceps

- "S" smooth design forceps clippers, make the circles easily open or place. The plastic sheath design, not easy to slip, good hand feeling.

Item: SC0701
 Packing: 1 pc/box, 50 boxes/ctr
 Carton Size: 280X280X220mm
 Weight: 4.6 KGS

Adhesive Tip Applicator

Patent Number: ZL 2015 2 0375955.5

Item: SC08
 Packing: 20 pcs/box, 120 boxes/ctr
 Carton Size: 440X440X250mm
 Weight: 6 KGS

- Used to stick small device like ceramic veneer, inlay and Orthodontic bracket, special made glass tip with strong stick force, but not remains left over, well-designed, convenient to use to avoid getting slipped from the forceps.

Adhesive Tip Applicator

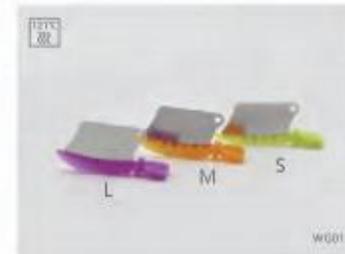

- Used to take small device like veneer, inlay and dental crown.

Item: SC08B
 Packing: 30 pcs/box, 200 boxes/ctr
 Carton Size: 450X230X45mm
 Weight: 7.95 KGS

WedgeGuard

Patent Number: ZL 2017 2 1625810.1

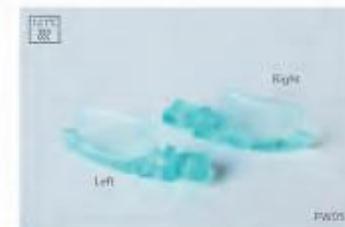

- According to the size of adjacent gap, select the appropriate WedgeGuard and insert with forceps or handle from the buccal or lingual side between the desired preparation tooth and adjacent tooth. Then adjust the position to fit the tooth better. Later, the tooth preparation can be performed.

Item: WG01
 Packing: 50 pcs/box, 100 boxes/ctr
 Carton Size: 280X280X220mm
 Weight: 11.2 KGS

Item No.	Color	A(±0.1mm)	B(±0.1mm)	C(±0.1mm)	Thickness
WG01	Light Purple	3.8 mm	1.8 mm	2.4 mm	0.06 mm
	Light Orange	2.0 mm	1.3 mm	1.7 mm	0.06 mm
	Light Green	1.8 mm	0.9 mm	1.4 mm	0.06 mm

Dental Wedge

- This product is composed of Wedges and Matrix Bands, which can not be separated. The product is made of transparent plastic, which is convenient for curing and forming by light curing machine after filling with resin. It can effectively shorten the curing time and achieve excellent avoiding effect. The Dental Wedge with Matrix is designed to touch the patient's dental papilla in a rounded way. The outside design can effectively prevent slip and feel good. The operation is convenient and quick. This product is an important auxiliary tool for the dentist in the key process of repair and healing.

Item: PW05
 Packing: 50(L+R) pcs/box, 100 boxes/ctr
 Carton Size: 280X280X230mm

Item No.	Type/Position	Color
PW05(L,R)	19.5x6.7mm	Blue, Clear
PW05(M,L,R)	17.6x6.8mm	
PW05(S,L,R)	15.6x6.8mm	

Item: PW06

 Carton Size: 280X280X230mm

Item No.	Specification	Color
PW06L	17.7x8.6mm	Blue, Clear
PW06S	17.7x8.2mm	

Dental Wedge

- The part in contact with the soft tissue and tooth neck is silicone, which can reduce the pressure and injury of the wedge to the gingival papilla.
- The main body is made of transparent material, which has a low resistance to light curing lamps. When a resin matrix band is used, a better curing effect can be obtained.

Item No.	Color	Specification
PW07L	Purple	17.5*2.1*2mm

Dental Dam Kit

Dental Retractor

Dental Retractor

■ CR105, rubber-coated dental retractor, the part where the retractor contacts the patient's mouth corners is coated with silicone, and the silicone material is more skin-friendly and comfortable. During oral treatment, the dental retractor can open the mouth and maintain a certain degree of opening. It is an auxiliary tool for dentists in the treatment process.

■ This product is reusable and can be sterilized at 121°C.

Item : CR105
Specification: 100×72×18mm
Packing: 2 pcs/bag, 100 bags/ctn
Carton Size: 520X350X170mm
Weight: 9KG25

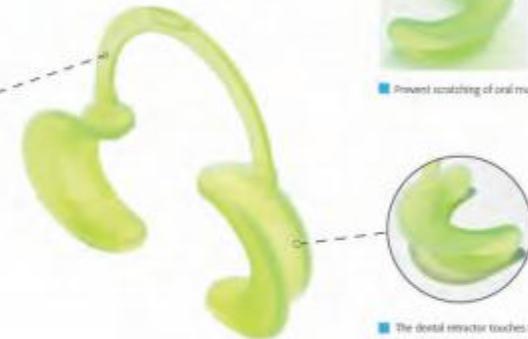

Product Advantages:

■ The material is safe and resistant to high temperature, high stability and not easy to deform.

■ Prevent scratching of oral mucosa.

■ The dental retractor touches the corners of the patient's mouth on both sides, and the protective design is made of silicone material to make the patient more comfortable during treatment.

Dental Retractor

■ The parts of the retractor in contact with the two sides of the mouth of the patient use soft rubber to make protective design which makes the patient more comfortable to use.

■ The outer side of the connecting rod also adopts soft rubber packaging design, smooth and feel good.

Item : CR10M
Specification: 118×85×21mm
Packing: 2 pcs/box, 100 boxes/ctn
Carton Size: 460X350X260mm
Weight: 5KG25

Dental Retractor

■ Rubber-coated design where the dental retractor touches the patient's mouth on both sides can prevent patients from scratching their mouth when wearing and improve the comfort level of treatment.

■ This product is reusable and can be sterilized at 121°C.

Item : CR115
Specification: 66.5×91.5×32.7mm
Packing: 2 pcs/box, 100 boxes/ctn
Carton Size: 420X275X235mm
Weight: 2 pcs/box, 100 boxes/ctn

Dental Retractor

This product consists of a semicircular retractor and a handle. During oral treatment, the medical staff can place the retractor on one side of the mouth corner of the patient and gently pull the upper lip to provide a clear surgical field vision.

Type: T type
Color: Clear

Item No.	Specifications	Carton Size	Packing	Weight

Dry Field System Tubing

Patent Number: ZL 2016 2 1097848.1

- The Dry Field System completely eliminates saliva and fully repairs both arches, making it ideal for all bonding applications. The system is easy to assemble and be inserted and used by a single operator.

- Set safety also prevents orthodontic appliance from slipping.

Item: CR08

Packing: 1 (1 set/box, 40 boxes/can, 501 set/box, 50 boxes/can)

Carton Size: 2144X844X2150mm, 1514X813X2150mm

Weight: 1175.8 KGs, 1215 KGs

White (S) Green (S)

Dry Field System Tubing Component

Item: CR002

Packing: 2 set/box

Remark: Components consist tongue guard, connection arm, piston block, 2 pcs of silicone tubing and V-connector.

Aligner Chewies

Patent Number: ZL 2018 2 1528611.3

Mint flavor Strawberry flavor
Grape flavor Green apple flavor
Lemon flavor Watermelon flavor

- Help aligner tray fit teeth closer to make sure reach given orthodontic force.
- Use for 5-10 minutes to avoid braces face.
- Even bite and handle are designed separately convenience and hygiene.
- Triangular prism shape uses wedge-force principle to fit aligner tray for adjacent anterior or premolar region.
- Cylinder is used to fit aligner tray in molar region with greater occlusal force, and it can also be used to exercise bite muscle.
- Elliptic cylinder is mainly used to fit aligner tray in occlusal surface of posterior teeth.

Item: MP03

Retainer Retrievers

Patent Number: ZL 2019 3 0018952.X

Red Orange Yellow
Green Blue Rose

- Retainer retrievers help patients remove appliances cleanly and efficiently.
- Helps patients remove appliances from the buccal side cleanly and efficiently.
- The ring handle is easy to hold by hand when operating.
- This handy tool features specially designed boats which help to remove clear retainers or aligners with ease.

Item: MP04

Packing: 1 pc/1 pc, 20 sets/box, 30 bags/can

Carton Size: 280X180X230mm

Weight: 2.1 KG

Invisible Braces Box

Patent Number: ZL 2021 2 0505420.0

- New high-quality materials not only have good aging resistance, toughness and stability, but also have a good texture. The lenses are separated from the braces layer by lens, and the dry and wet are separated to avoid stains.
- Put the aligner chewies and the retainer retriever into their fixed positions respectively, and use the upper pain mirror or the middle layer magnifying mirror when wearing the invisible aligners, correcting and using the orthodontic aligner chewies.

**Prophy Brush / Prophy Cup
Prophy Strip/Prophy Paste
Polishing Discs
Composite Polisher**

This product is composed of a metal handle and a working end. The metal handle is connected with the dental handpiece, and the working end is the brush. It is used for polishing the tooth restoration, and also for cleaning and polishing the surface of the teeth to make the surface smooth and even. Non-sterile provision, single use.

BP04

Base Plate Wax

In clinical work, base materials are becoming more and more necessary for the repair of patients with complete edentulous jaws and free dentition. The traditional method of using self-coagulating plastic to directly pile up individual trays will temporarily waste plate wax. It will lead to uneven thickness of self-coagulating resin, and it is difficult to grasp the thickness of self-coagulating resin. The edge should not reach the design position accurately, the operating time is short and the effect is not good.

Base Plate Wax

Patent Number: ZL 2017 1 0131939.5

BP01, non-handle base plate wax is a new product made of environmentally friendly plastic materials. It has good plasticity, uniform thickness, no need to mix, without odor and easy to be operated. The product is suitable for dentist or technicians to make base plate, arrange teeth and form wax patterns.

Item: BP01
 Specifications: (Upper Jaw) 95X80X2mm, (Lower Jaw) 95X80X2mm
 Packing: 10 for upper jaw and 10 for lower jaw/box, 20 boxes/carton
 Carton Size: 340X45X180mm
 Weight: 7.4 KG
 Color: Blue

Steps for usage:

Base Plate Wax

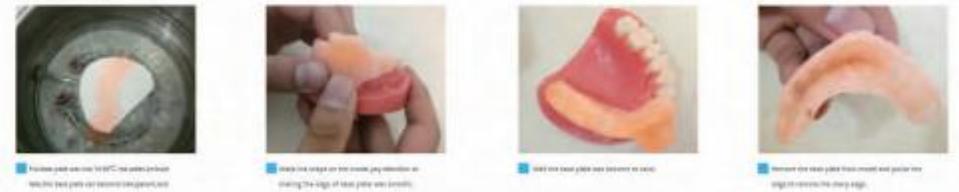

Patent Number: ZL 2017 1 0131939.5

BP02, non-handle base plate wax is a new product made of environmentally friendly plastic materials. It has good plasticity and uniform thickness, no need to mix, without odor, and easy to be operated. The product is used for accurate impression of edentulous jaws.

Item: BP02
 Specifications: (Upper Jaw) 95X84X3.5mm, (Lower Jaw) 95X80X3.5mm, (Side Edge) 80X22.5X3mm, (Anterior Teeth) 62X59X3mm
 Packing: 5 for upper jaw, 5 for lower jaw, 3 for anterior teeth, 2 for each side of mouth/box, 20 boxes/carton
 Carton Size: 340X45X180mm
 Weight: 8.34 KG

Steps for usage:

Rim Former for Dental Use

BP0501 is mainly used as a tool for dentists to fabricate upper and lower bite rims.

The overall shape of the shovel head is like a square circle, the edge of the working end is rolled up like a outward and the rolled-up part forms an obtuse angle with the shovel head flat.

The part below the triangular depression is closed up to hold maxillary wax material.

Item: BP0501, BP0502
 Packing: 1 pc/box, 100 boxes/carton
 Carton Size: 448X409X250mm
 Weight: 16.5 KG

With the extensive development of fixed restorations, more and more temporary crowns are made. The mold extraction method is more suitable for making multi-unit temporary restorations, but for single tooth or less unit restorations, it is more complicated and wasteful, and the patient also feels very uncomfortable. In order to obtain better aesthetic effect and avoid the shortage of traditional self-coagulating resin, our company develops this thermoplastic tray-gate.

Base Plate Wax

Blue

BP03

BP03, no need tray, no mixing, green material and no additional operation. The small pieces are soaked in hot water at 70-80 °C, then softened and placed on the tooth that need to be restored. After the film is hardened, the original tooth shape can be recorded.

It is mainly used in dental restoration to create a single crown with a complete crown or a temporary crown bridge with lower unit(s) or lower.

Item: BP03
Specification: 30.5x15.4x2mm
Packaging: 50 pcs/box, 20 boxes/ctn
Carton Size: 180X150X130mm
Weight: 2 KG

In complete denture restoration, it is very important to determine the relationship between maxillary position and mandible. Usually it is done with the set of maxillary and mandible model. Wax rim is one of the components of jaw track. The traditional method of wax embankment is to make jaw position record by cutting the wax block into wax strips with diameter of 0.2to 1.0 cm. The operation is complicated and the waiting time of patient is long. In order to improve the efficiency, the wax embankment is made into a finished product with a horseshoe structure.

Wax Rim

Red (hard) Blue (soft)

WR04

WR04, the wax embankment is made into one body and adheres to the position of the alveolar ridge of the maxillary base according to the arch shape, easy to operate and saves time for dentists. It can also be used as a functional balance of occlusal wax.

This red wax rim is hard and the blue wax rim is soft which can meet the requirements of different temperature environments.

Item: WR04
Specification: 60.75x7x33.5mm
Packaging: 12 pcs/box, 48 boxes/ctn
Carton Size: 440X440X200mm
Weight: 7.05 KG

Wax Rim

Red (hard) Blue (soft)

WR04B

Item: WR04B
Specification: 11.5x9.2x10.5mm
Packaging: 18pcs/box, 36boxes/ctn
Carton Size: 52X100X200mm
Weight: 7.05 KG

Dental Implant Guide System Kit

Dental Implant Guide System Kit

Patent Number: ZL 2018 2 0803412.2

- IGG, it is suitable for the implant of single teeth and multiple teeth, determine the location more accurately and quickly.
- Zirconia material(s) can be autoclave at 134°C, with high hardness and high strength, good at wear resistance and oxidation resistance.
- The stereoscopic film can be softened after hot water immersion to cover and make reference as the adjacent teeth. A better operation position can be positioned by the system. (from the location and quantity of implant, the system can be for single teeth and multiple teeth).

Item: IGG5
 Specification: 150x100-7x45mm
 Packing: 1 pc/box, 10 boxes/ctn

- Dental implant surgery, due to the rich jaw bone and blood vessels and individual differences among different patients, it is so hard for dentists to control the position and angles during their drilling to the jaw. And peripheral tissue can be unnecessary damaged including titanium drill 2 pcs, guide rod 4 pcs, inner circle 3 pcs, outer circle 3 pcs, partial implant guide 4 pcs, implant guide 12 pcs.

Instructions for single teeth implant guide plate:

- Cut the plaster model in central position where needs to be implanting.
- Draw bone topography.
- According to bone topography, draw position and direction of guide rod.
- Take a zirconia drill in integral 1.2mm groove on both side of plaster model, insert the guide rod, and then glue the two half plaster model together.

- Take single teeth implant guide plate, soak and soften it into hot water (after the color becomes transparent, take out).
- Place the single teeth guide plate on the plaster model, and make shape.
- Take down when the plate becomes harder.
- Black inner ring suits for drill below 2.0mm.
- White inner ring suits for drill below 3.0mm.

Impression Tray

Implant Tray

■ We use special transparent materials for easy observation of the direction of the teeth and implant rods. There are 18 detachable fan-shaped bottom plates attached to the bottom of the dental arch area, which can be quickly and easily removed according to the tooth position. This product does not need to make individual film again, no need to punch holes, just remove the bottom plate corresponding to the implant rod. It is suitable for planting impression or conventional impression taking.

■ It's disposable, need to be heat-sterilized at 134°C.
Item: IG001/IG002/IG003/IG004/IG005/IG006/IG007
Packing: (1P-6P) 6 pcs/bag, 1000 bags/ctn
Carton Size: 790x410x530mm
Weight: 12.4625

Clear

Implant Tray

Patent Number: ZL 2017 1 1324492.X

■ According to different arch shapes, choose a correct implant tray.

■ Rotate the implant tray into the oral cavity, determine the corresponding impression-bearing area of the transfer handle and mark it.

■ Remove the corresponding base plate, mix the impression material, pour it evenly into the tray and put it into the mouth. We can utilize mobile taking technology, so please rotate the transfer handle before solidification and take both model and implant tray out.

Item: IG07
Packing: 6pcs/bag, 1000bags/ctn
Weight: 9.8625

Implant Tray

Patent Number: ZL 2017 1 1324492.X

■ Type I: There are 18 detachable fan-shaped plates at the bottom of the arch area, which can be removed quickly and conveniently according to the tooth position.

■ Type II: The arch area is covered with an easily penetrating film that takes the mold accurately and clearly.

When the dentist is performing root canal treatment, the closeness of the apex often determines the success or failure of the final treatment. Sometimes the root canal is well prepared, but it is easy to overfill or underfill when filling. The main reason is that the size of gutta-percha point is not enough, either too large or too small, and some dentists ignore the use of gutta-percha measuring ruler.

Gutta-Percha Measuring Ruler

8F037, precision Dental developed the gutta-percha measuring ruler which made of Zirconia.

Length range is 30mm, hole diameter is from 20-60, total 11 tapered holes, which can meet the requirements of gutta-percha point accuracy length and diameter.

Suitable for accurate measurements of the diameter of the apes of the main apes of the gutta-percha point, and can also be used as a tool for inspecting the wear of the root canal instrument.

Ultra-High accuracy, the accuracy does not change under different environments.

Advantages:

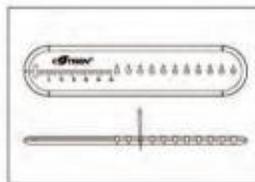

Health and environmental protection Zirconia material itself has chemical stability, non-toxic, non-irritant and corrosion-resistant.

Stylish appearance, yellow color, pure jade texture, bring noble enjoyment.

Smooth surface, easy to clean.

High hardness, high wear resistance.

High temperature and pressure resistant, it is applicable to accurate tip diameter measurement and also can be used as a tool to test the wear of root canal instruments.

Item: 8F037
Specifications: 80x22x5 mm
Packing: 1 pc/box

Bur Holder Frame

Item: 8F03
Specifications: 85x48x12mm
Packing: 20 pcs/box, 20 bags/box
