Courses

Educational , informative courses they have a duration of approximately two hours and are intended to give a fairly complete idea of the technology described.

Scolarization , aimed at those who purchased it instrument and lends it self to becoming an operator, a day in the studio. Theoretical part and part practice with tutoring; the training intent is that of instructing the operator for a flood operational satisfaction.

In-depth I , it is a training course permanent, streamlined and practical; they are administered online, periodically, dedicated educational content to the operator who wants continuous indications on the single protocol. A moment of comparison with the trainer to list any critical issues identified in the first phase of the learning curve and receive adequate solutions without moving from your location.

In-depth II , a teaching framework of one or two days with the presence of special guests of a high level to delve into topics well precise. A scientific dissemination aimed at practical specialization of certain protocols with demonstrations on patients and/or models.

The Protocols Manual

Parodontologia

Trattamento tasche parodontali 1

Trattamento tasche parodontali 2

Trattamento della Perimplantite / Mucosite

Trattamento della Perimplantite / Osteoite

Recessione gengivale

Discromia gengivale

Endodonzia

Desensibilizzazione dentinale

Incappucciamento diretto della polpa

Vetrificazione dentinale

Cura canalare

LASER 810nm: Easy, Master e Brave

The 810nm Laser, in its variants, was designed and built to be versatile, ergonomic and easy to use. The front output for the fiber optic connection, and the color touch screen display, make it extremely intuitive in use and selection of protocols. The various models are supplied with standard equipment and are ready for use. Each product marketed by Creation is accompanied by an always active telephone help desk service.

To each his own model

Easy

Laser with 5 Watt power, protocols for dentistry.

Master

Laser with 8 Watt power, protocols for Dentistry, Aesthetic Medicine and Traumatology.

Brave

Laser with 15 Watt power, protocols for Dentistry, Aesthetic Medicine, Dermatology and Traumatology.

Creation, with more than twenty years of experience in training in the use of electromedical devices provides a consultancy and assistance service aimed at putting the professional in conditions optimal during daily operating procedures.

GIORNATA DI SCOLARIZZAZIONE

CARATTERISTICHE TECNICHE					
Max. potenza sulla fibra	5, 8, 15 W continui	Frequenza	0-10 KHz	Peso	2,5 Kg
Lunghezza d'onda	810 nm	Modalità di funzionamento	Continuo, pulsato e Impulso ad altra frequenza	Display	7" - Colore - Gloves touch
Tipo di Laser	Diodo ALGaAs, CW (Class IV)	Dimensioni	22x24x10 cm	Autonomia batteria	2 ore a massima potenza
Singolo Impulso	0,2-1 sec.	Certificazione			CE 0068
