INNOVATIVE ORAL CARE PRODUCTS

**NEW!**

The IsoDent Para mouthwash series grows with two outstanding additions.

**REVOLUTIONARY MOUTHWASH AGAINST GINGIVITIS**

Witness the start of an era of new, organic and extremely effective methods based on tissue regeneration against periodontitis and periimplantitis.

**NEW!**

**IsoDent Teeth Whitener**

**EFFICIENT AND SAFE TO USE!**

An innovative whitener that removes stains effortlessly and without chemicals!

### IsoDent Paro Mild mouthwash

**250 ml GTIN 6430043960629**

**Intended primarily for the prevention of mucositis and regular maintenance treatment after the active phase.** Furthermore, the product contains Cl-Dextran which strongly reduces tooth decay. Swish thoroughly once a day for 60 seconds after brushing in the evening or once a day as directed by your dentist. Do not rinse.

### IsoDent Paro mouthwash

**250 ml GTIN 6430043960209**

**100 ml GTIN 6430043960940**

**Intended primarily for the treatment of bleeding gum lines and mucous membranes.**

Swish thoroughly once a day for 60 seconds after brushing in the evening or once a day as directed by your dentist. Do not rinse. The best treatment result is achieved with 3 months of continuous use.

### IsoDent Paro Strong mouthwash

**250 ml GTIN 6430043960636**

**Primarily intended for the treatment of advanced dental support tissue problems, when teeth move and the gum edges are constantly inflamed.**

Swish thoroughly once a day for 60 seconds after brushing in the evening or once a day as directed by your dentist. Do not rinse. The best treatment result is achieved with 3 months of continuous use.

## Revolutionary mouthwash against gingivitis.

**The unique IsoDent Paro product series offers effective tissue regeneration treatment against periodontitis and periimplantitis.**

Developed together with a group of American researchers. The product stimulates the body's own protective mechanisms to overcome mouth inflammation. Moreover, it effectively prevents tooth decay. The unique combination of xylitol and erythritol provides strong additional protection against caries.

### IsoDent Super Junior mouthwash

**250 ml GTIN 6430043960100**

**100 ml GTIN 6430043960094**

**Chewing gum-flavoured mouthwash for the youngest in the family.** The product contains 0,05% sodium fluoride NaF (0,5 mg/ml, 230ppmF) and is intended for people over 6 years old. When used regularly, fluoride strengthens the teeth and the unique combination of xylitol, erythritol and Cl-Dextran strongly prevents tooth decay. The use of mouthwash is an effective complement to brushing with toothpaste.

Dispense about 1/2 capful of mouthwash, swish the solution around for 60 seconds, then spit it out. Do not swallow. Use 1-2 times a day. Not for small children.

### IsoDent Niitty moisturising mouthwash

**250 ml GTIN 6430043960261**

**100 ml GTIN 6430043960360**

**The completely new IsoDent Niitty well-being mouthwash is based on an old, time-honoured Eastern recipe, to which we have added new active ingredients of modern Western dentistry,** such as fluoride, xylitol and erythritol, which help prevent tooth decay. Nature's own betaine works effectively against dryness of the mouth, helping to prevent the growth of oral fungus, tooth surface erosion and to prevent bad breath. The mouthwash refreshes the mouth for a long time without alcohol and without excessive "shock" when it bursts, making it very pleasant to use.

Take approx. 1/2 cap of the solution, swish thoroughly for approx. 1 min and spit it out.

Now also available in a smaller 100 ml bottle.

### IsoDent Teeth Whitener

**12 kpl GTIN**  
6430043960278

**An innovative whitener that removes stains effortlessly and without chemicals!** IsoDent Whitener is an effective solution for quickly and gently removing surface stains caused by coffee or tea. It is convenient to carry and requires only water for use. The whitener does not damage enamel and is suitable for those with sensitive teeth. Additionally, it is an excellent tool for maintaining the results of professional whitening treatments at home.

The whitener is made from high-quality microfiber, which mechanically removes surface stains and plaque. No chemicals are needed—gentle rubbing is enough. The package includes one handle and 12 disposable replacement heads.

Follow the instructions for use.

1. Replace the whitening head with a new one after each use.
2. Be patient: removing stubborn stains may take time.
3. Avoid rubbing the gums.
4. Store at room temperature

Recycle the packaging box as cardboard and the inner parts as plastic.

### IsoDent Fluor+ nurturing mouthwash

**250 ml GTIN**  
6430043960278  
**100 ml GTIN**  
6430043960353

**IsoDent Fluor+ nurturing mouthwash contains 0.15% fluoride, effectively protecting teeth from decay.** The unique combination of xylitol and erythritol further reduces harmful demineralisation. Sea buckthorn extract strengthens oral mucous membranes and accelerates wound healing. It also helps to keep the oral mucous membranes comfortably moist. Chamomile has a soothing effect and lingonberry – besides effectively safeguarding oral mucous membranes – acts as a natural preservative. PH level 6.

The product naturally freshens your breath while leaving a mild and soft taste in the mouth. It provides 24-hour protection against cavities when used twice a day. Now also available in a smaller 100 ml bottle.

### IsoDent Ortho cleaner

**250 ml GTIN**  
6430043960230  
**100 ml GTIN**  
6430043960025

**Prepare the cleaning solution by mixing the IsoDent Ortho cleaner concentrate with water.** The cleaning solution effectively dissolves all impurities accumulated in braces and mouth guards. It also removes bacteria and fungal growth – which can cause nasty oral infections – from braces and guards.

IsoDent Ortho is gentle too, never damaging the delicate joints or titanium parts of braces and other dental appliances. Its versatility also makes it also a very cost-effective option.

True value for money: a 250 ml bottle lasts up to 3 months of daily use. Now also available in a smaller 100 ml bottle.

### IsoDent denture cleaner

**250 ml GTIN**  
6430043960193  
**100 ml GTIN**  
6430043960018

**Prepare the cleaning solution by mixing the IsoDent denture cleaner concentrate with water.** The cleaning solution effectively removes stains and tartar that accumulate on dentures over time, and helps get rid of bacteria and fungal growths that cause inflammation.

The cleaning solution remains active and fully effective for 5 days. IsoDent's convenience is accompanied by a fresh mint taste. IsoDent is also a very cost-effective alternative to traditional denture cleaning methods thanks to its versatility.

True value for money: a 250 ml bottle lasts up to 3 months of daily use. Now also available in a smaller 100 ml bottle.

IsoDent denture adhesive cream  
**40 g GTIN**  
6430043960001

**Product developed and manufactured by the Finnish company IsoDent Oy.** Its tried and tested composition keeps dentures in place all day long while favouring the well-being of oral mucous membranes. It relies on arctic herbs for its active effect. Suitable for daily use. Does not contain zinc or artificial preservatives including paraben. Arctic herbs deliver a strong antibacterial effect, which has been proven to work against e.g., yeast (candida albicans) and pharyngeal infections (Streptococcus pyogenes).

IsoDent denture adhesive powder  
**20 g GTIN**  
6430043960056

**IsoDent denture adhesive powder** delivers a proven antibacterial and antifungal effect, which actively prevents oral fungal infections, among other things. IsoDent avoids the growth of harmful bacteria while nurturing oral mucous membranes – unlike traditional adhesives which mainly act as a breeding ground for harmful bacteria. The powder does not dissolve preservatives into the body. The adhesive powder forms a tight and lasting bond between your dentures and the gum. It contains mint, which helps to keep your breath fresh. IsoDent denture adhesive powder is extremely cost-effective: a small amount suffices to keep the dentures in place all day, whatever you may be doing.

Cleaning and storage box for IsoDent mouthpieces and dentures  
**GTIN** 6430043960049

**Handy and easy-to-use cleaning bath for removable mouth guards and dentures;** prepare a working solution of about 20% from IsoDent washing liquid and water, and immerse the rinsed guard/denture in the solution for approx. 5-10 minutes or, if you wish, leave it in the box overnight. Clean the brush under running water using the removable rinsing tray in the box. Use a concentrated (50%) solution to remove tartar and stronger stains.

IsoDent denture brush  
**GTIN** 6430043960063

- Firm grip thanks to the padded anti-slip
- The bushy brush part cleans effectively
- Narrow tip brush cleans tight parts
- The strong and durable nylon brush does not damage the delicate denture surface

IsoDent cleaning brush for braces other removable dentures  
**GTIN** 6430043960469

- Firm grip thanks to the padded anti-slip
- The bushy brush part cleans effectively
- Narrow tip brush cleans tight parts
- The strong and durable nylon brush does not damage braces or dentures
