and validated scanners

Scanbody SmartFlag by APOLLO

It is the latest project of APOLLO IMPLANT COMPONENTS
in the form of the most modern digital scanbody,
dedicated to the implementation of all-on-x cases
in the full-digital protocol, co-created with the opinion
leaders of European implant prosthetics.

A photograph of the SmartFlag by APOLLO product. In the background is a black box with the 'smartflag by APOLLO' logo. In the foreground is the scanbody itself, a white, rectangular device with a clear plastic top and a grid of white pins on top. The text 'work smart discover more' and a small QR code are visible on the front of the device. The entire setup is on a reflective black surface.

01 Independence

Open production libraries. Complete your cases in the chosen laboratory

02 Precision of scanning

Provided by the geometry of the shape and marks.

03 Predictability

For the most complicated cases.

04 Passivity

High precision of cases based on intraoral scans.

05 Smart Components

Full Digital Workflow - Smart & Predictable.

06 Continuity of scanning

Smooth image registering with a standard scanner.

07 Time-saving

Workflow completed in 2-3 visits.

08 Durability

Up to 100 sterilization cycles.

09 Quality of materials

Medical peek eliminates reflections, and titanium alloy Ti6Al4V ELI (grade 23) ensures a tight connection with the implant.

10 Clear identification

of compatible implant systems and their platforms.

Discover the revolution
in the scanning process

01 Various shapes of smartflags of different lengths and spans

02 Optimal height of SmartFlag

03 Characteristic geometry and large reference surface (flat)

04 Unique marks on each scanbody

05 Clear marking of the implant system

06 The implant axis shown by the side indentation

07 Precision of sealing the connection with the implant

08 Certified medical materials

09 Anti-reflective surface

10 Durability

Smart Digital Workflow for any type of all-on-x restoration

Temporary restoration
for immediate loading
of implants
Milled or printed.
