

Shanghai JPS Medical., Ltd

DENTAL SIMULATION UNIT JPS FT-III

ABOUT US

Established in 2010, Shanghai JPS Medical Co., Ltd has been supplying dental products to customers from more than 80 countries and regions. Our main dental products are dental equipment such as dental simulation, chair-mounted dental unit, portable dental unit, oil free compressor, suction motor, X-ray machine and autoclave, etc. We supply dental disposables like implant kits, dental bibs, crepe paper, etc.

Our CE and ISO13485 were issued by TUV, Germany.

As a reliable and professional partner in China, JPS Medical is able to:

Provide you dental products with the concept of **ONE STOP SOLUTION** to save your time, guarantee quality, manage the stable supply and control the risks.

Focus on R & D to constantly bring you new and advanced products.

Share you more and more business opportunities and experience.

Choose right partner, do right business.

JPS DENTAL SERVICES

CUSTOMIZED PRODUCTS

Having been focusing on dental industry for almost 20 years, JPS Dental is able to supply customized dental products such as dental chair for both right and left handed dentists, dental chair for kids, orthodontic chairs, hydraulic chairs, surgery chairs as well as autoclaves and cabinets, etc.

TENDER BIDDING

JPS has rich experience in tender document preparation and notarization. ISO 13485 and CE are issued by TUV Germany, which are very our tool to win the tenders.

ONE STOP SOLUTION

JPS is able to supply the full range of dental products, which helps our customers to save time, reduce costs and guarantee the quality and control risk.

NEW DEVELOPMENT

To meet the high demand of dentist education, JPS and its partner developed a Dental Unit Simulation in 2017, proving a great success in 2018, in the domestic and the international market

JPS FT-III

The FT-III oral teaching simulation system is a professional oral teaching equipment independently designed and developed by the company. It completely simulates the actual clinical operation, enabling students and medical staff to form correct operating postures and techniques before clinical operation, thus smoothly transitioning to real clinical treatment.

It can be applied to the internship students of the stomatologists in colleges and universities, and the on-the-job training of doctors in medical institutions.

TECHNICAL OVERVIEW

1. Unique product design, compact structure, space saving, free movement and easy arrangement; Equipment size: 1250 × 1200 × 1800 (mm) (length × width × height)

2. Head with full electric control pitch: -5 degrees to 90 degrees; lifting highest position 810mm, the lowest position 350mm.

3. Fully simulation of the clinical four-hand operation; comes with a shoulder body one button automatic reset function, including two memory bits.

4. The instrument tray and assistant frame can be rotated, folded and recycled freely.

5. The simulator has a set of water purification system, (water purification bottle 600mL).

6. Wastewater set, (system, sewage bottle 1100mL) magnetic sewage bottle, convenient for quick unloading.

7. Electric suction system, the pumping capacity is adjustable in 8 steps.

8, LED oral cold light; illumination 6000-25000Lux; with infrared sensor switch; handle removable.

9, High and low speed syringes with four-hole pipeline design.

10. Marble countertops, sturdy, easy to clean; size 530 × 480 (mm) (length × width).

11. Easy movement with four wheels on the bottom of the box for easy movement and self-locking function.

12. Water supply and drainage system, easy to use, no need for pipeline installation design, saving costs.

13. Can decode the high-definition video transmitted by the teacher, and convert to HDMI signal.

14. Reserve a quick-plug air source interface.

15. Monitors, microscopes, etc. can be installed as needed.
