

PRESS RELEASE

Basiq Dental Launches 'Basiq Flow': Visibility of your inventory with a single movement

In early 2025, Basiq Dental will introduce the innovative RFID technology 'Basiq Flow', enabling dental practices to manage their ordering processes more simply and efficiently.

Oisterwijk, 31st of January 2025 — Basiq Dental, the leading supplier of high-quality dental materials, is proud to announce the launch of Basiq Flow. This advanced RFID technology will allow dental practices to streamline and optimise their inventory management and ordering processes. With the introduction of this technology, Basiq Dental is responding to the growing demand for automation and efficiency in the dental sector.

What is RFID?

An RFID tag is essentially a sticker containing a small chip and an antenna. This chip stores all the unique data of the product to which the tag is attached, including characteristics such as product properties, packaging information, production date, and expiry date. Using a scanner, these labels can be read remotely at exceptional speed— the handheld scanner can read up to 200 labels per second. This means that a large stock can be fully inventoried in just a few seconds.

What makes our approach unique is that **all products in the Basiq Dental warehouse are already equipped with RFID tags**. For dental practices, this means no additional actions are required: products can simply be placed on the shelf upon delivery. It couldn't be more efficient.

The Ordering process of the future: always in stock, never out of reach

Basiq Flow allows practices to get an immediate overview of their current stock with a single action. The tags are already present on all products supplied by Basiq Dental. Unlike traditional systems, there is no need for manual inbound and outbound scanning. The scanner automatically generates order suggestions based on pre-set minimum and maximum stock levels, ensuring practices are never out of stock.

After scanning, Basiq Flow automatically fills the shopping cart in our online store. So, not only does the scanning of stock save time, but the manual entry of items to order is also eliminated. Everything flows seamlessly. This time-saving feature allows staff to focus on what truly matters: delivering care to patients.

Benefits for different target groups

Basiq Flow offers advantages for all professionals within the dental sector:

- **Dental assistants and practice staff** benefit from the convenience of an automated system that tracks stock and automatically fills the shopping cart with items to be ordered.
- **Practice managers and owners** can rely on a constant availability of the right materials and easily hand over the system in case of illness or holiday. Warning alerts for expiring products and low stock levels help reduce waste and improve planning.
- **DSOs and investors** gain insight into stock values thanks to centralised management and detailed cost categories. This saves time and helps optimise costs through the transparency of all connected practices on a single central dashboard.

In short, the greatest revolution in efficiency for a dental practice is here: the unique Basiq Flow system.

About Basiq Dental

Basiq Dental has been the leading supplier of dental materials for years, simplifying the ordering process for practices. With the launch of Basiq Flow, the company is taking a significant step towards fully automated ordering processes, enabling dental teams to spend more time on patient care and less on administrative tasks.

Basiq Dental at IDS 2025 in Cologne

Basiq Dental will introduce the '**Basiq Flow**' **RFID technology** during the **International Dental Show (IDS) in Cologne, from 25 to 29 March 2025**. Visitors are warmly welcomed to our stand in Hall 5.1 | H020 J021 to discover the possibilities of Basiq Flow. Our team will be available to demonstrate the benefits of this innovative technology and show how it can transform your practice.

Availability

Basiq Flow will be launched in early 2025 and will be available to dental practices and DSOs. Practices interested in an early introduction or demonstration can contact the Basiq Dental team using the contact details below.
