

OUR COMMITMENT

PMP MULTITASK as a contract manufacturer develops and produces various projects on behalf of world leading companies in the medical device sector.

The company has a strong background in the production of precision mechanical parts starting from the customer's specifications. Thanks to the knowledge acquired in various sectors, the company focuses on the production of critical components used in devices adopted in the medical sector. The methodology for validating suppliers and outsourcers is according to FDA criteria and it is based on IQ, OQ and PQ.

DONE IN ONE

With the use of the latest generation machining centres, it is possible to obtain the finished product in a single machine placement. It is thus possible to reduce the production lead time by increasing machining precision and integrating all the operations necessary to complete the device in a single process.

SWISS TYPE LATHE

We have recently strengthened our machine park by introducing a new swiss type lathe that allows us to expand our offer in the medical sector, managing more volumes and processing on complex materials, guaranteeing the highest quality.

ZEISS O-INSPECT

With the ZEISS O-INSPECT 543 3D CNC measuring machine we can check dimensions and dimensional errors and issue comprehensive and detailed certificates.

DESIGN FOR MANUFACTURING

Our team of engineers at PMP has over 30 years of experience helping customers find the perfect manufacturing approach for their components.

Our experts will guide you through the Design for Manufacturing process, ensuring maximum efficiency and cost-effectiveness and identifying the best compromise between design, ergonomics and performance.
