① SMS

SMS non-woven fabric belongs to composite non-woven fabric. It is a composite product of spunbonded and melt blown. It has the advantages of high strength, good filtration performance and no adhesive

③ PP+PE

It has chemical resistance, heat resistance, electrical insulation and good high wear-resistant processing performance

② WOOD PULP

Wood pulp cloth has unique absorption capacity and liquid absorption capacity, superior dust-free, soft, anti-static, no damage to the surface performance of objects, toughness and durability

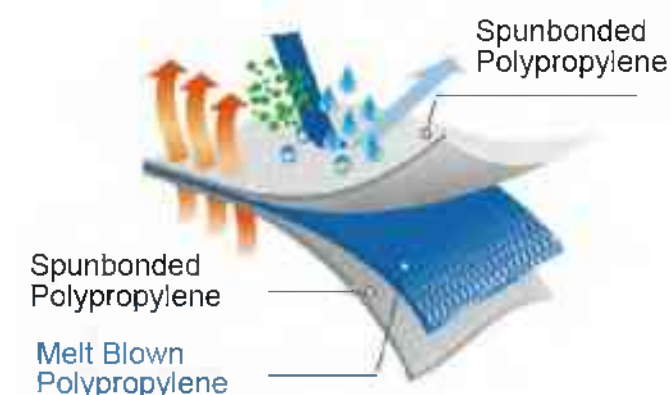

④ SF

SF material is a kind of composite material, also known as soft coating, which is characterized by anti-wear and anti-skid

SMS surgical gown

SMS surgical gown is treated with three antibodies, which has the functions of anti-alcohol, anti-blood and anti-oil, and has strong barrier properties. Ultrasonic stitching of key parts avoids the piercing of the fabric itself by traditional sewing techniques.

SMS non woven fabric, long sleeves, knitted cuffs back neck lace up, easy to wear and take off without reinforced on sleeves and front part, EO sterile .

Reinforced type

- SMS non woven fabric
- reinforced on sleeves and front part
- Knitted ribbed cuffs
- Tie at waist with adjustable elastic
- Comfortable and safe, anti-alcohol, anti-static and anti-blood.

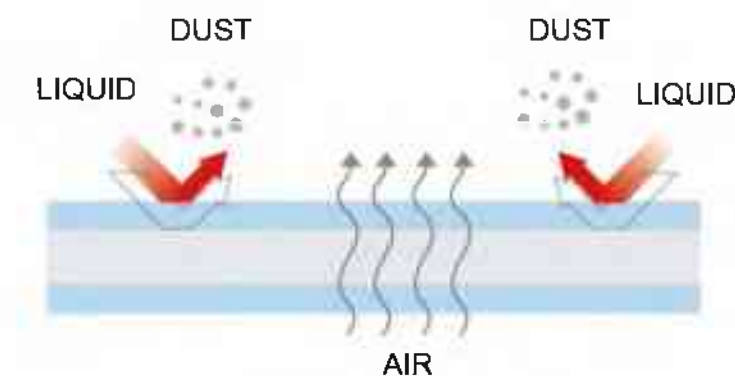

Simple type

- SMS non woven fabric
- without reinforced on sleeves and front part
- Knitted ribbed cuffs
- Tie at waist with adjustable elastic
- Comfortable and safe, anti-alcohol, anti-static and anti-blood.

Wood Pulp Spunlace Surgical Gown

Minimization of the danger of infections due to water repellent treatment prevention of lint generation so that may reduce skin allergic trouble various selection for types of surgery such as OS, URO, CS for more intensive protection Decrease of cost and surgery preparation time due to the elimination of reusing process.

The wood pulp fabric is comfortable, soft, breathable, and has the functions of anti-alcohol, anti-blood, anti-oil, etc. with or without reinforced on sleeves and front part.

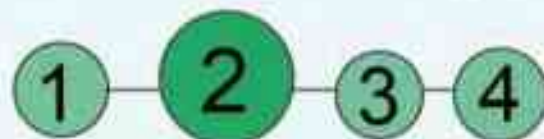

Reusable Surgical Gown

It has the functions of waterproof, anti-blood, anti-bacteria, breathable and anti-static. Since it can be reused after disinfection, the preparation time for surgery is reduced, and the single cost is low.

AAMI LEVEL2

least protective

Most protective

What does it take to become an AAMI Level 2 surgical gown?

These standards are established by AAMI. Specifically, ANSI/AAMI PB70:2012 is the standard that establishes a classification system(levels1-4) for protective apparel used in health care facilities,including surgical gowns, based on liquid barrier performance using standardized test methods.The U.S.Food and Drug Administration(FDA) has adopted ANSI/AAMI PB70:2012 as the standard by which all surgical gown manufacturers must abide.

- SMS non woven fabric
- Round neck,short sleeves
- Provides a reliable barrier against blood and other fluids
- important to minimize cross-infection during surgery

Disposable hand washing gown are made of breathable, hydrophobic and soft SMS, which is convenient for medical staff to wash their arms, safe and comfortable.

Disposable protective gown is made of 63g / 65g / 68g / 70g PP+PE material, which has excellent liquid and particle protection performance, and is comfortable and breathable. It is widely used in various fields.

Hooded design

Zip placket

Adhesive seal protection

waist elastic

Elastic cuffs

Disposable protective gown is made of 80g SFS material, which has many functions such as anti-virus, moisture permeability, anti-blood penetration, waterproof, and anti-static, which can effectively avoid cross-infection.

Elastic brim

Zipper design

Elastic cuffs

Waist elastic

Disposable isolation gowns block germs, waterproof and breathable. One-time use, safe and convenient. The lace-up design at the back of the collar makes it easy to put on and take off, and the waist ties can be adjusted freely.

clothing length 130 cm

clothing width 160 cm

Scope of application: One-time use for general isolation in medical units; non-sterile, disposable use.

Disposable isolation gowns consist of a one-piece structure consisting of a hat, top and pants. The cuffs, ankles and other parts are closed with elastic, one-piece zipper, and the placket is bonded with double-sided tape.
