Emma Clayton RDT "They are amazing! They are genius! Honestly, I love it! The black Tepe won't clean in there well enough. And, equally with an electric toothbrush you usually can't get the angle right. Thanks so much - we love them!"

Lottie Manahan RDT "I have so many with this issue. Really enjoying them with patients - they handle them really well after demo!"

Helena Mercer RDT "Patients really struggle to clean these areas and time and time again this is the area where I see plaque, periodontal pockets or even treat decay. I would normally recommend a grey tepe curved over or a single tufted brush but they struggle to use these."

Neda Barez RDH "This is a wonderful invention. I think it is very useful and wonderful gadget for patients. It's very durable and the long handle makes it easier to use for patients with manual dexterity limitations."

Jane Peterson RDH, BSc in Oral Health Promotion "I deliver oral care training to caregivers and it's fabulous to see that ErgoProx is now complete! It's an excellent product and one that I will be personally recommending!"

Laura Hempleman RDT "The quality of the design is really very high. They really are fantastic! The patients are loving them!"

Diane Washington RDH "I have used several now on patients, finding them very useful! Patients can manage using them brilliantly and they are very effective at plaque removal!"

**Market: 75% Adults
have Tooth Loss Gaps**

**Clinical Results:
91% Bleeding Reduction
87% Plaque Reduction**

Designed by Dentists
