XYLOKAT at Interzum 2025

For 30 years, XYLOKAT has been at the forefront of crafting top-tier veneered and laminated panels. 

Recognized as a reliable partner for professionals across Europe, the company delivers surface solutions that enhance residential and commercial projects of all scales.

At Interzum 2025, we proudly introduce our new line of lacquered Special Veneers, designed to meet developing industry demands.

Alongside these, attendees will experience how the renowned 3D Textured Panels turn static surfaces into vibrant elements that respond to their surroundings.

Visit us at Hall 5.2 | J021 to witness the impact of our premium solutions firsthand.

Engage your senses with textures perfected over three decades of expertise, transforming surfaces into dynamic design features.

30 years of Surfaces Shaping Spaces

The vision that started it all

Every great space begins with a surface. One that sets the tone and defines the atmosphere. For Stylianos Katsanis, surfaces were never just materials. They were the backdrop to life's most meaningful moments, elements that would enhance the way people live, work and connect with their environments.

Guided by this belief, he founded XYLOKAT in 1995 in Thessaloniki with a clear vision: To empower designers with surfaces that transform ordinary spaces into extraordinary environments, enriching lives and elevating human experience.

This vision has driven XYLOKAT's evolution from a family-run business into a trusted leader in premium surface solutions, relied upon by industry professionals across Europe.

The turning point

Some moments don't just change a company's trajectory. They set a new course for an entire industry.

For XYLOKAT, that defining moment arrived in 2010 with the launch of its groundbreaking 3D Textured Panels, a bold leap forward that revolutionized surface design.

Surfaces were no longer passive elements. Through their interaction with their surroundings, they became integral to the spatial experience. Textures responded to light, turning static surfaces into vibrant elements that revealed tactile depth and visual intrigue. The interplay of light and texture empowered designers to use surfaces as a key feature in design narratives.

A breakthrough of this scale positioned XYLOKAT among the few European manufacturers capable of producing such distinctive solutions.

Yet, this was just the beginning. Determined to set new standards for what surfaces could achieve and driven by a deep understanding of industry needs, XYLOKAT continued to expand its portfolio:

- 2012: Compact HPL Panels
- 2016: Special Veneers and HPL Panels

Beyond materials

Our impact

XYLOKAT's surfaces do more than cover walls and furniture. They become part of the spaces where life happens. They have greeted guests in luxury hotels, brought an air of distinction for high-end retail and given beautiful homes a sense of comfort.

Natural wood's rich textures and the allure of contemporary finishes unite in surfaces designed to inspire, be seen, felt and experienced.

What comes next?

For three decades, XYLOKAT has pioneered surface design, challenged traditional design norms and redefined what's possible.

And the future promises even more. More innovation. More creativity. More ways to reimagine the spaces we inhabit.

Because at XYLOKAT, we don't just make surfaces. We shape spaces.

And the best is yet to come.

Sustainability

at every step we take

At XYLOKAT, we are committed to reducing our ecological footprint through environmentally responsible practices.

Our company implements a strict policy of sourcing raw materials exclusively from certified forests and suppliers, ensuring full compliance with European E1 regulations. Additionally, we utilise alternative fuel sources and diligently recycle all waste materials generated in our operations.

Together, these efforts reflect our dedication to building a greener, more sustainable future and inspiring others to join us in protecting the planet.

ISO 9001:2015 Certified

The production and sale of 3D Textured Panels, Special Veneers, HPL and Compact HPL Panels by XYLOKAT are certified under ISO 9001:2015.

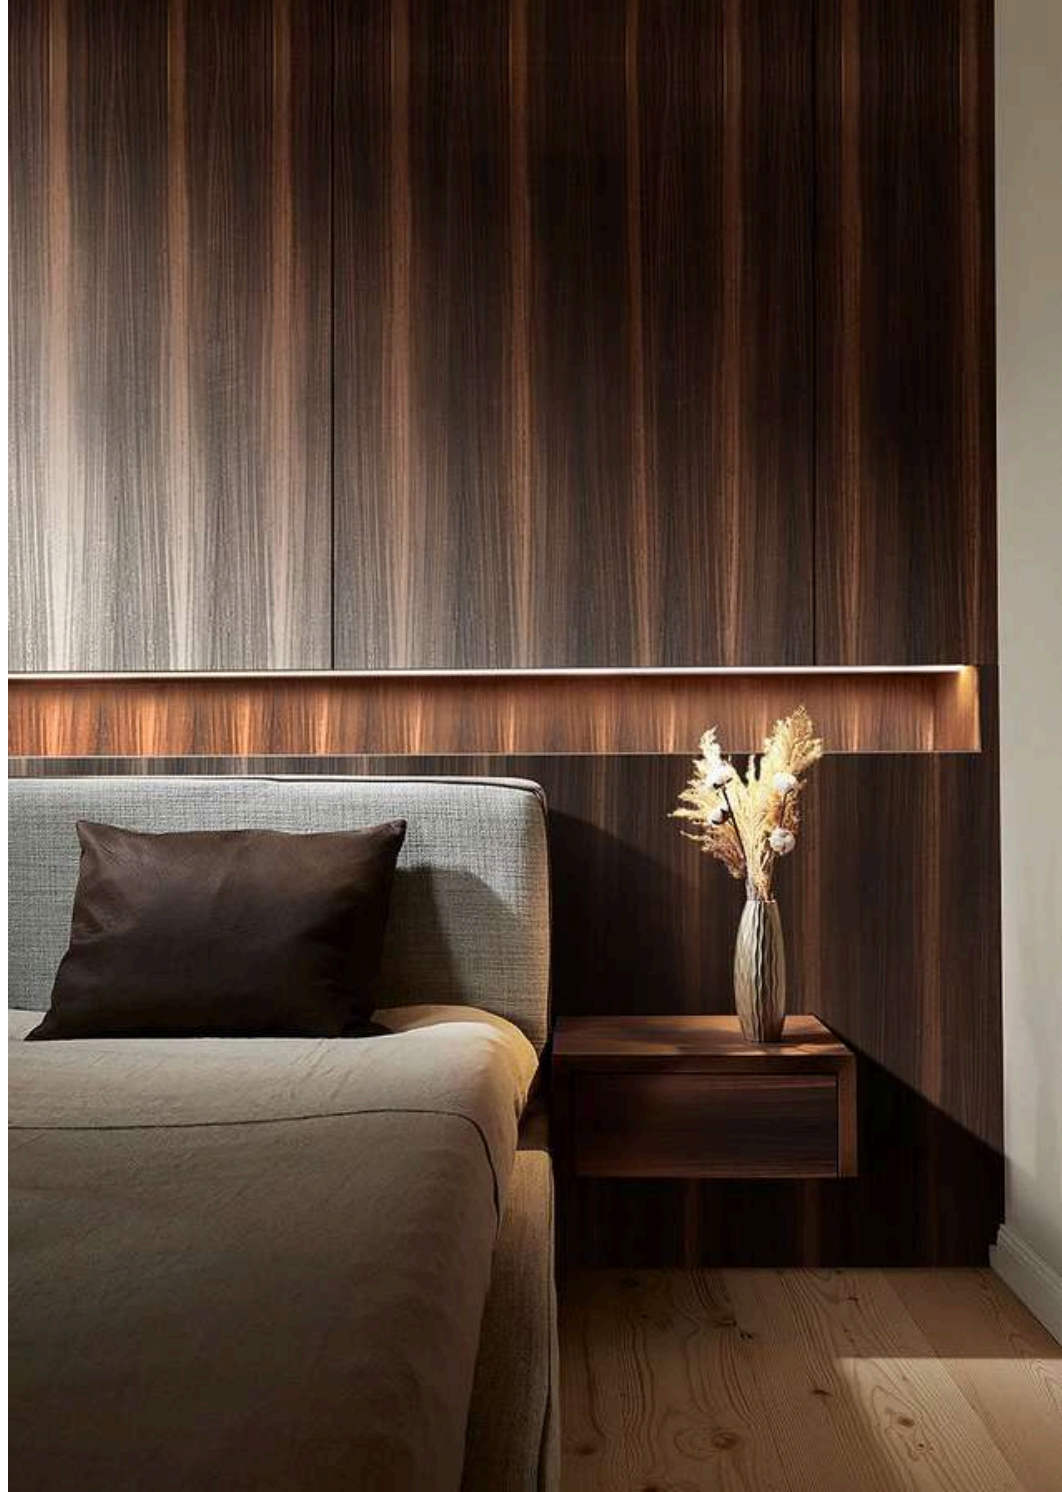

This certification highlights our commitment to maintaining the highest standards of quality and excellence in all our products and processes.

A close-up photograph of a wooden surface, showing the natural grain and texture of the wood. The wood is a warm, golden-brown color. The grain runs diagonally across the frame. There are some darker, irregular spots and shadows on the surface, possibly due to the wood's natural characteristics or the lighting. In the bottom center, the text "Our surface solutions" is written in a clean, white, sans-serif font.
