

Welcome to our company description!

We specialize in designing and manufacturing modern and functional steel legs for working furniture, office furniture, cabinet furniture, restaurant furniture and hotel furniture as well as realization of individual projects. Our products are made of high quality steel profiles and steel sheets, afterwards are powder painted in fine structure. Our expanded offer consists of steel legs for furniture, desks and tables with possibility of mechanical or electrical height adjustment, legs for desks and tables as well as central bases for desks and tables. We offer a wide selection of additional elements: sliding top mechanism, cable channels, computer holders, cupboard legs as well as supports for wooden and glass panels. We are continuously working on extending our offer to provide our Clients with complex equipment. We provide professional help in selection of our products as well as trainings and instructions in order to make cooperation with our Business Partners as simple and quick as possible.

Through constant appearance in many international exhibitions, in which we present new solutions, our products are of great interest to Customers from many countries. Dynamic development of the company is due to modern technical solutions, precision of manufacturing our products and team of experienced staff. We have developed high quality standards, whereby our brand is recognized throughout Poland as well as many countries around the world. With the effects of our work we look into the future with confidence, planning new investments and further development of our company.

We kindly invite you to cooperate with us.
