

DAAS Dairy As A Service

PROCUREMENT & SALES

We strategically procure premium cheese and butter, including specialty products, ensuring optimal inventory management for suppliers. Our high-quality offerings for industrial applications are fairly priced, providing clients with a clear view of our total value.

WAREHOUSING

With our own warehouses in the Netherlands and Italy, 10,000 pallet locations and space for refrigerated and frozen products, we can always purchase and deliver quickly.

TAILORED

We organize any additional requirement: from pallet selection to cardboard removal, proprietary packaging or private label.

(RE)PACKAGING

We re-package and re-label cleaned dairy products, allowing them to go back into final processing.

RISK MANAGEMENT

We proactively identify and mitigate risks associated with dairy derivatives. Our robust frameworks ensure informed decision-making, protecting our partners and maintaining stability in market fluctuations.

QUALITY CONTROL

With a warehouse, laboratory and office in one location, we guarantee quality products. Because we see, taste and check our dairy up close.

LOGISTICS

Our logistics department takes care of all transportation, using our own trucks and well-trained, reliable drivers. We are on time and keep our appointments.

CLEANING

We clean cheeses and repackage them with our own EC approval number. This allows products to be returned to the processing industry and not go to waste.

WE MAKE DAIRY WORK **FOR YOU**

WE MAKE DAIRY WORK 

GERIS

At Geris, we have a clear vision: we aim to approach the dairy industry differently. With an open and fair trade strategy, we seek partnerships rather than conflicts. Our word is a promise that our partners can rely on.
