

FEELING GOOD ALL DAY LONG

ELEMENTARY SCHOOL

COMPLETELY HAPPY THE WHOLE DAY

In the early morning, sleepy children arrive at school and gradually wake up while learning, let off steam in the studio or while dancing, and make their way home in the late afternoon.

Children spend many hours a day at school – and ultimately a large part of their childhood. Schools are therefore more than just educational institutions: It becomes a living space for young students. In addition to lessons, a wide range of childcare services support children in their social and emotional development. They can also receive better individual support if needed. In this way, the school gives them better educational opportunities.

Versatile premises are needed in order to meet the different needs of the children – from inquisitive learning to lunch together. How do we design a school that children enjoy coming to in the morning and feel comfortable at during the day? And which offers teachers the courage and opportunities for concentrated retreat and lively exchange?

Let's discover this together.

INTRODUCTION

A LOT OF VERSATILE NEEDS

Children's life themes and needs are the key to a feel-good place. They determine which rooms an educational institution needs. So what does a child's world of needs look like?

Children of elementary school age collect a lot of new experiences – and preferably on their own. Not only do they explore their surroundings with their peers, they also socialize with them. A strong urge to move keeps them on their feet as they playfully discover the possibilities and limits of their bodies.

Driven by questions that they investigate, they explore the world in a sensual way or withdraw to focus on puzzling over things. They absorb environmental impressions and information with curiosity and learn to filter information from media. The numerous sensory experiences need to be processed and require rest before the children can embark on new discovery adventures. We design the learning spaces based on these needs. This makes the elementary school a feel-good place where children can develop their potential.

LEARNING SPACES

Flexible classroom	6
Permanently furnished classroom	12
Independent learning area	16

In the teaching phase ①, the classroom is mainly equipped with student desks and chairs. For afternoon care, ②③ they move to small homework groups on the edges of the room. Tables that are no longer needed are stacked to one side and open up new space: like here for a seating landscape made of floor mats for lively games and encounters.

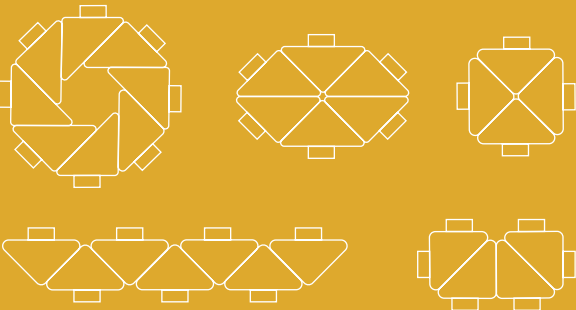

FLEXIBLE CLASSROOM ONE ROOM FOR EVERYTHING: FROM LETTING OFF STEAM TO LISTENING

The classroom is home to children at school – usually in the morning as well as in the afternoon. The demand on this space is therefore often greater than its floor area: How can movement, concentration and meeting be combined in just a few square meters? Flexible furniture helps here, allowing the room to be transformed in an instant: Mobile student desks, stackable benches and student chairs as well as light-weight floor mats form an agile team for versatile learning experiences.

Thinking and pushing around three corners together. Quick changes happen where a lot of learning takes place in groups: from solving puzzles in teams of two, to exchanging experiences in large groups and back again. Triangular tables are a particularly clever solution for classrooms with this orientation. Thanks to their shape, they can be combined in a variety of ways: from compact groups of four to communicative groups of eight. The tables can also easily be stacked away to create space in the classroom for playing and relaxing together.

26 student places | 9.5 x 7 m

Positioning options for triangular tables

In teaching phases ①, learning can take place in various group settings. For childcare and leisure activities ②, the student desks are stacked at the edge of the room to save space or arranged in small work islands. On the space gained, cushions that were previously stowed away on shelves form a seating circle and relaxation area.

In teaching phases ❶, the room is divided into two classrooms by a partition that can be moved on site. It is opened for the lunch break ❷ and the tables are arranged in sociable groups. For childcare and leisure activities ❸, superfluous student desks are stacked at the edge of the room. At the center are work islands for collaborative tinkering and upholstered elements, which children can use to create new seating arrangements and play scenes.

Knowledge nuggets and lunch in the same room. Those who study hard in the morning and let off steam in the afternoon need a nourishing lunch break in between. This can also take place in the classroom, provided it is flexibly equipped: With student tables that can easily be moved from learning settings to dining tables; and upholstered elements that invite you to relax and play with energy afterwards.

Virtual room
How is this room transformed to encourage tinkering and playing in the afternoon?

24 student places | 10 x 7.8 m

PERMANENTLY FURNISHED CLASSROOM BINDING DIVERSITY

Wherever children gain plenty of new experiences, they also need constants – especially if they have learning difficulties or a different mother tongue. A permanently furnished classroom can give children a sense of stability and accompany them throughout the day in a way that meets their needs, even without spatial conversion measures. Especially if it allows for individual differentiation.

A circle of benches ① opens up meetings for the whole class and groups of desks ② facilitate learning in smaller teams. Individual workstations at the edge of the room ③ allow children to switch to independent learning or learning with special educational support. The sofa corner ④ invites students to take a relaxing break.

24 student places | 9.8 x 7 m

ACOUSTICS IN LEARNING SPACES

Children tire more quickly when learning with lively background noise – especially if they are learning outside their native language. Here's what helps:

- Acoustic elements on the walls that reduce the overall noise level
- Partition walls that divide the room into quiet and lively learning zones
- Table dividers that separate individual workstations from each other

Thanks to their very high absorption capacity, our acoustic elements dampen a lot of sound, even with a small surface area. Combined with partition elements, this creates pleasant room acoustics.

Aligned to the front and to each other. A frontal alignment of the student desks can also be reconciled with collaborative forms of learning without the need for conversion work: thanks to student desks that can be used from both sides. To be able to sit opposite each other in the group, the chairs simply change places. Lightweight table dividers can also be used to separate the groups from each other.

At the learning stations **1**, children can concentrate on listening and encounter each other while learning together. Additional workstations are available for independent and special educational needs learning **2**. In the shielded sofa corner **3**, the children can comfortably withdraw and exchange ideas.

FREE LEARNING AREA
PROMOTING FREE SPACES

In order for children to develop their abilities, they need freedom of all kinds. While one child needs individual language support, another wants to discover advanced learning content for themselves. Free learning areas make this possible: With a variety of workstations, they are a popular destination within the school for lively learning groups, hard-working lone wolves and patient learning companions.

Small groups of tables ❶ are available for group work and individual support. Mobile partitions create protected individual workstations ❷ for focused self-study phases. A sofa corner ❸ awaits children who want to take a break or study while lying down.

AR application
What does the island for individual work look from all sides and in your school?

19 student places | 9 x 6.5 m

At table groups ❶, children can learn together and at individual workstations ❷ independently. Mobile shelving ❸ and mobile acoustic partitions ❹ moderate the different learning styles.

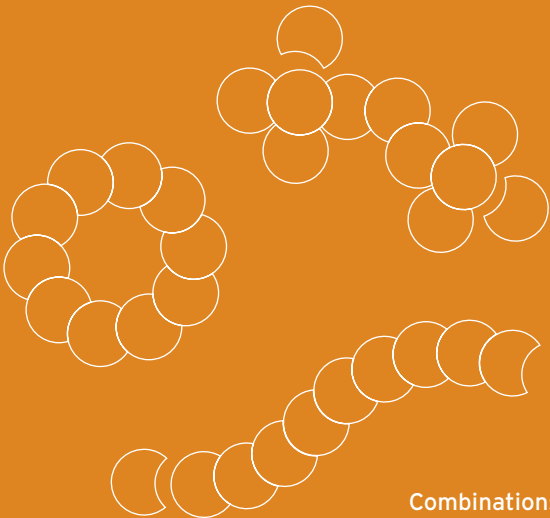

Design free spaces on your own. Adaptable furniture ensures that children and learning companions can reinvent free learning areas time and time again. Triangular tables can be used to create different table constellations, from individual work to large groups. Mobile shelves and lightweight acoustic partitions can be used to create different zones – so poster making, math problems and day-dreaming can be done side by side in harmony.

FREE LEARNING AREA
**CLOSE TO THE
GROUND,
AIMING HIGH!**

Thanks to their intuitive urge to move, children are inventive when it comes to choosing their learning place and body position – and are happy to do without a table and chair from time to time. Upholstered landscapes can provide a welcome change. The children can alternate between lying on their stomachs, kneeling and sitting on floor mats and sofas. For even more variety, they can flexibly combine the light-weight floor mats and sofa elements into new shapes at any time.

Children can sit comfortably at different heights in the seating area. Table elements ① and benches ② are available to help them write, draw and build. Oases of calm ③ offer them a place to retreat. Mobile shelves ④ zone the moving environment and at the same time give the children a view.

Cafeteria	32

PLAY ROOM

ROMPING AROUND AND DANCING IN BALANCE

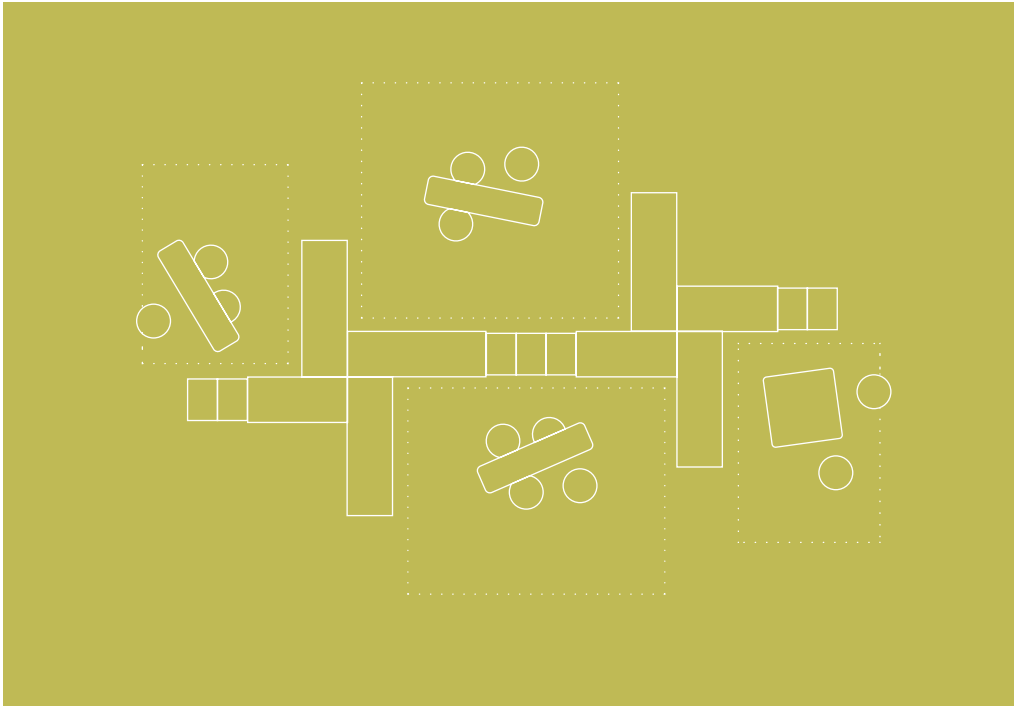

In class, some children slide around fidgeting on their chairs in an attempt to concentrate despite their natural impulses to move. Balance creates a space in which they can let off steam unhindered. The colorful landscape of soft cushions is an invitation to play, climb and dance – and to take a breather in between.

Taming wild spaces. The colorful landscape of towers and islands is easy to clean up after playing. To do this, the cube pieces are puzzled into their shells and the floor mats are stacked on the transport cart.

9.5 x 6 m

A breath of fresh air while playing.
A windmill-shaped arrangement of cupboards divides the room into different painting, play and craft areas. In between, upholstered elements allow curious glances at the other kids playing.

PLAY ROOM
**STACKING AND
COLORING**

Playing together unites – and at the same time children practice communication, creativity and patience. Play rooms create the best conditions for this. Here they can pursue their favorite activities in different corners and levels – whether it's crafting on a bench, building towers on the play cart or playing board games on floor mats.

LIBRARY
**DIVING INTO
OTHER WORLDS**

Browsing, napping and daydreaming – children will find space for this in quiet reading corners, reading rooms or libraries. With a radio play on their ears, a book in their hand or a tablet in their lap, they can immerse themselves in other worlds here. This is particularly easy if the shelves offer a wide range of media, from comics to non-fiction books, and comfortable seating niches create a quiet reading atmosphere.

20 student places | 8 x 7 m

AR application
How would it be if this seating landscape was in your school straight away?

An upholstered landscape stretches out between the bookshelves ❶. This is zoned by the protective rear walls of the COCOON elements ❷ and mobile reversible shelving ❸. With seat cushions ❹, even window niches become reading corners.

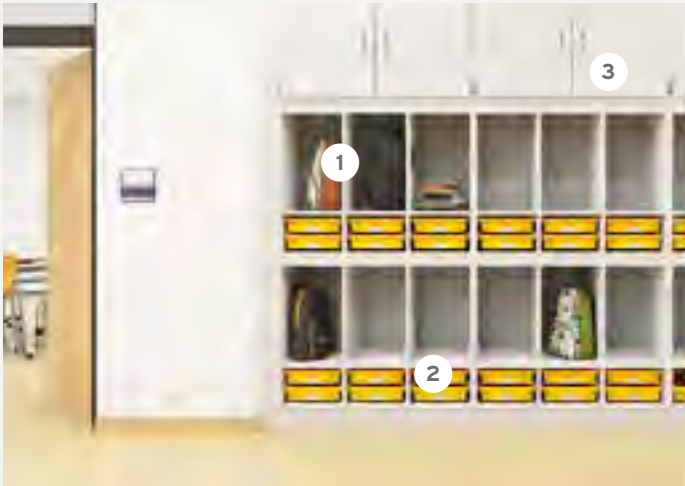

HALLWAY ARRIVE AND ENCOUNTER

The children meet their friends in the morning in hallway areas and cluster centers and start a new school day together. Wardrobe compartments, in which jackets, shoes and sports bags can be neatly stowed away, help them to

get off to a good start. This keeps their classroom tidy at all times. Comfortable seating provides a space for spontaneous encounters – before the start of lessons and for the rest of the day.

To make learning spaces really cozy, jackets, bicycle helmets and school bags can be stored in spacious wardrobe compartments ❶. Street shoes can be stored in the Tidy Boxes ❷ and teachers can store teaching materials, schoolwork or other utensils in the lockable cupboards ❸ – so everything is neatly stowed away.

CAFETERIA
BREAK!

The cafeteria not only provides a hearty meal, but it is also of great social importance: Here the children meet friends from other classes and year groups and can talk about their school day or their hobby. Sometimes they are also joined by learning guides to strengthen the community throughout the day.

Fixed tables and benches ❶ bring peace and security to the cafeteria, since there is no need to move chairs when taking a seat. Thanks to the seat cushions, all cafeteria guests sit particularly comfortably here. The acoustic elements on the walls ❷ ensure pleasant room acoustics during the loud clatter of dishes and lively conversations.

Enjoying versatility. With flexible furniture, a cafeteria can be designed to be multifunctional: At lunchtime, their tables and stools provide space for a communal lunch. They can then be moved, folded and stacked aside for theater rehearsals, the book bazaar or the project week.

76 seats | 15 x 10 m

Large dining tables ① are perfect for socializing over lunch. Meanwhile, they can store their bags in school bag shelving ②. The tables can be folded and rolled to the side for alternative space utilization; the stools can be stacked next to them to save space ③.

WORKING SPACES

Staff room
Team room

38
40

STAFF ROOM

FOCUS AND RECOVERY

Behind the door of the staff room, the teachers are immersed in a soothing silence. In the midst of this, they can prepare and follow up on learning units, grade class work or relax. This creates a healthy balance between work and free time.

Come to rest with variety. Meetings can be held at the large table, with table dividers creating focused workstations. To the side is the spacious wall unit with learning materials. At the high table with bar stools, you can work standing up, while you can put your feet up on the sofa next to it.

TEAM ROOM LIVELY EXCHANGE

Learning guides meet in the team room to coordinate all-day activities together or to have a cup of coffee. During afternoon childcare, children can also find a contact point in the learning guides for their questions and problems. Round meeting tables, comfortable lounge elements and protective acoustic partitions create an inviting atmosphere for everyone.

From conversing to leaning back.
Round meeting tables and high tables make it possible to coordinate and take breaks together. A lounge corner behind acoustic partitions provides a relaxed retreat.

CHAIRS AND TABLES | STUDENTS

7416.041

- PAGHOLZ® FOOTREST CHAIR**
- For all tables in size 6
 - Adjustable footrest
 - Stackable up to 3 chairs

7984014, 7984017

- PAGHOLZ® STOOL WITH FOOTRESTS**
- Available in different sizes
 - Stackable up to 9 stools

7984

- PAGHOLZ® 4-LEGGED STOOL**
- Available in sizes 2-7
 - Stackable up to 12 stools

9445.120

- STACKING BENCH**
- Available in sizes 3-4, different widths
 - Optionally mobile
 - Stackable up to 5 benches

7210

- STUDENT DESK**
- Fixed, single-seater
 - Available in sizes 2-7
 - Seating on both sides due to central column frame

7530

- C-SHAPED SCHOOL TABLE**
- Fixed, single-seater
 - Available in sizes 2-7
 - Frame means no disturbing table legs

7280

- STUDENT STACKING TABLE**
- Single-seater
 - Optionally mobile
 - Up to 4 tables stackable, also with accessories

1003.118

- TRIANGULAR TABLE**
- Single-seater
 - Optionally mobile
 - Up to 3 tables stackable

7632, 7633

- FLEXLAB® PRO JUNIOR TABLE WITH STOOL**
- Suitable size for elementary school
 - Mobile with 4 castors
 - Multifunctional use

7634.001

- FLEXLAB® WHITEBOARD/PINBOARD ATTACHMENT**
- Easy to fix in place and replace thanks to a locking screw
 - Use on both sides

7634.002

- FLEXLAB® ACRYLIC GLASS ATTACHMENT**
- Easy to fix in place and replace thanks to a locking screw
 - Use on both sides

7634.010

- FLEXLAB® STORAGE SPACE ATTACHMENT**
- Storage space, also suitable for Tidy Box
 - Simple and easy mounting

3660.147, 3660.148

- SIDE FOLDING TABLE**
- Mobile with 4 castors
 - Can be folded in at the side and nested to save space

3101.168, 3103.154

- SOLID BRIDGE TABLE WITH BRIDGE BENCH**
- Fixed
 - Optionally with upholstered bench support and floor attachment

7634.021

- FLEXLAB® TABLET HOLDER**
- Can be locked in place or rotated using the locking screw
 - For tablets of different sizes

7634.020

- FLEXLAB® BOARD HOLDER**
- Can be locked in place or rotated using the locking screw
 - For 2 large or small sliding panel elements

CHAIRS AND TABLES | TEACHERS

**PAGHOLZ® WAVE
CANTILEVER CHAIR**

- Cantilever frame promotes blood circulation in the back muscles
- Optionally with upholstery
- Stackable up to 5 chairs

PAGHOLZ® BAR STOOL

- Optionally with upholstery
- Suitable for many high tables, e.g. SOLID tables

**PAGHOLZ® GAS LIFT
CHAIR WITH FOOT RING**

- Height adjustable
- Aluminum base with chrome-plated foot ring
- Optionally with upholstery
- Optionally with castors

**PAGHOLZ®
GAS LIFT CHAIR**

- Height adjustable
- Robust aluminum cross-base
- Optionally with upholstery
- Optionally with castors

**MONO-COLUMN TABLE,
OVAL SHAPE**

- Height adjustable
- Mobile with 4 castors
- Optional safe deposit box pull-out
- Suitable as a teacher's desk or lectern

**TEACHER'S CADDY,
LOCKABLE**

- Mobile with 4 castors
- Including robust, recyclable Tidy Boxes in attractive colors with labeling field

**BARREL-SHAPED
MONO-COLUMN TABLE**

- Height adjustable
- Mobile with 4 castors
- Suitable as a teacher's desk or lectern

4-LEG TEACHER'S DESK

- Matches the student desk 7280
- With lockable drawer base unit
- Optionally with 2 castors

**PAGHOLZ® GAS LIFT
STOOL WITH CASTORS**

- Height adjustable
- Robust aluminum cross-base
- Optional stool seat in Color Wood colors
- Optionally with castors

GAS LIFT STOOL

- Height adjustable
- The convex base relieves pressure on the intervertebral discs, promotes blood circulation and prevents tension

ROUND BASE TABLE

- Sitting or standing table
- Legroom thanks to column frame
- Available in two heights as a meeting or coffee table

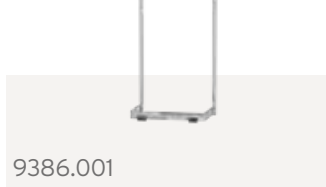

**4-LEGGED TABLE,
WELDED METAL**

- Including floor protector with level compensation
- Optionally with accessories for the administration area
- Optionally with 2 fixed castors

**SOLID BRIDGE TABLE,
HIGH**

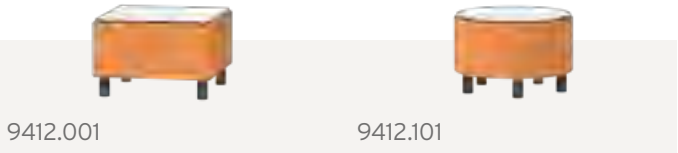

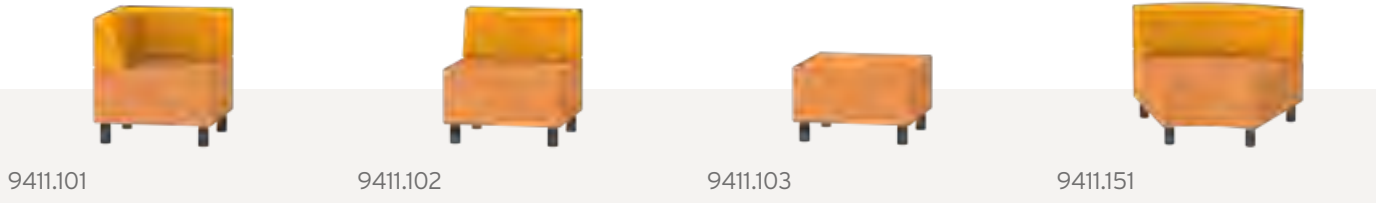

- Fixed bar table
- Seating on both sides
- Optionally with socket outlet inserts and floor mounting

**NOTEBOOK TABLE
C-SHAPE**

- Suitable as a side table for upholstered furniture series DOMINO, MODULA, MAZE or COMFORT HI

LOUNGE | STUDENTS

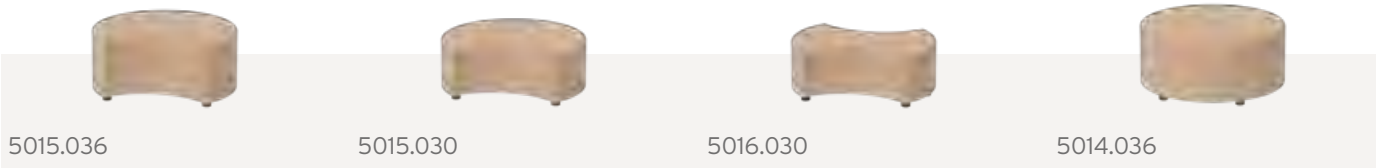

JUNIOR UPHOLSTERY SYSTEM

- Optimal size for an elementary school
- Can be individually combined and extended using interlinkable individual elements
- Matching tables with robust compact tabletop
- Optionally fire protection certified according to DIN 66084 P-a with cover fabric B1

BLOC UPHOLSTERED ELEMENTS

- Optionally fire protection certified to DIN 66084 P-a with B1 cover fabric and with screwed or glued floor attachment
- Ideal for creating seating groups or as an extension for lounge areas

UPHOLSTERY SERIES JOYN

- Optimal size for an elementary school
- Different sizes and shapes allow combinations of positions
- Optionally fire protection certified according to DIN 66084 P-a with cover fabric B1 and with floor attachment

JOYN TABLE

- With internal storage space
- Sturdy, removable table top

JOYN FLOOR MAT

- Underside with anti-slip coating
- Optionally fire protection certified according to DIN 66084 P-a with cover fabric B1

TRANSPORT CART FOR JOYN FLOOR MATS

- For up to 15 floor mats

COCOON UPHOLSTERY RANGE

- Optimal size for an elementary school
- Individual positioning combinations of model 5012 with JOYN elements
- Optionally fire protection certified according to DIN 66084 P-a with cover fabric B1 and with floor attachment

- CHILL SERIES**
- Suitable size for elementary school
 - Removable cover and therefore easier to clean
 - Durable quality thanks to high-quality workmanship
 - Filling has DIN 4102 B1 flame-retardant EPS polystyrene ball filling

- CHILL SEAT CUSHION**

 - Foam core
 - Diameter 35 cm
- TRANSPORT CART FOR CHILL SEAT CUSHION**

 - For up to 15 seat cushions
 - Mobile with 5 castors
- JUNIOR DICE SET**

 - Available in 4 color combinations
 - Including removable cover
- CYLINDA SOFT**

 - No sinking in despite foam core
 - Anti-slip underside
 - Removable cover

LOUNGE | TEACHERS

- DOMINO UPHOLSTERY SYSTEM WITH PRIVACY SCREEN BACK PANELS**
- Optimal size for the administration area
 - Can be individually combined and extended using interlinkable individual elements
 - Matching table with glass or decorative top
 - Optionally fire protection certified to DIN 66084 P-a with B1 cover fabric (except table with decorative top) and with floor attachment

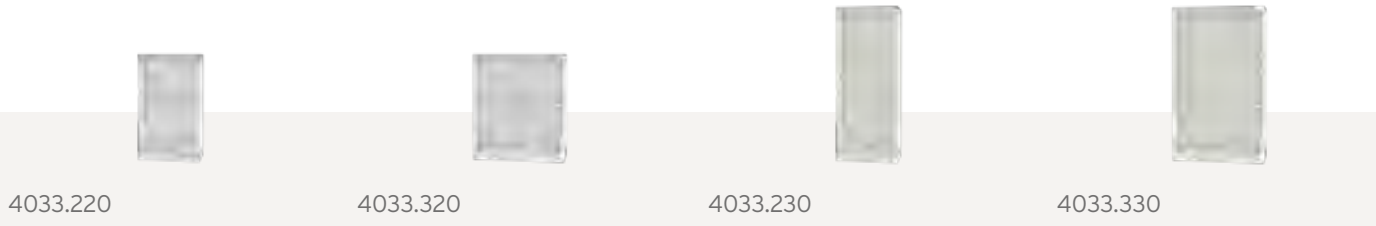

- CYLINDA**

 - Suitable size for the administration area
 - Ideal addition to the DOMINO and MAZE upholstery series
 - Optionally fire protection certified according to DIN 66084 P-a with cover fabric B1 and with floor attachment
- MAZE UPHOLSTERY SYSTEM**

 - Suitable addition to the DOMINO
 - Interlinkable individual elements can be put together individually
 - Optionally fire protection certified according to DIN 66084 P-a with cover fabric B1 and with floor attachment

STORAGE SPACE

SCHOOLBAG SHELVES

- Compartment sizes suitable for standard schoolbags
- Optionally mobile with 4 castors

QUARTER CIRCLE SHELF

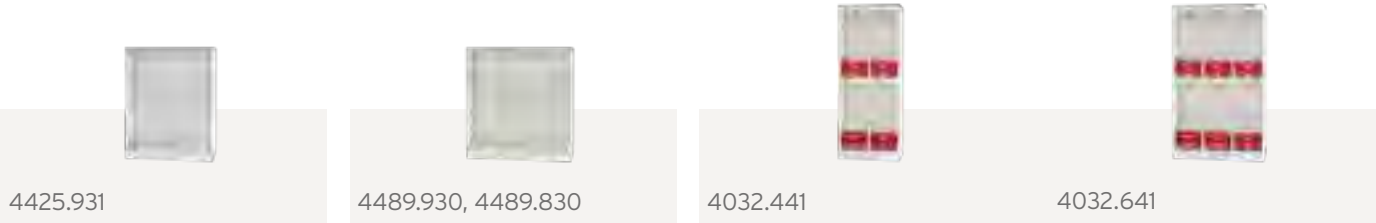

- Mobile
- Can be combined with other mobile shelving units

REVERSIBLE LIBRARY

- Mobile
- Can be used on both sides

BUILD AND PLAY CART

- Practical storage surface for playing standing up
- Compartments with plenty of storage space
- Tidy Boxes included
- Mobile with 4 castors

SHELF WITHOUT MIDDLE WALL

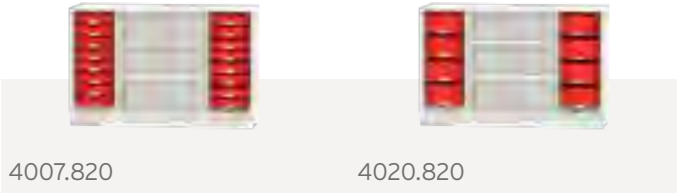

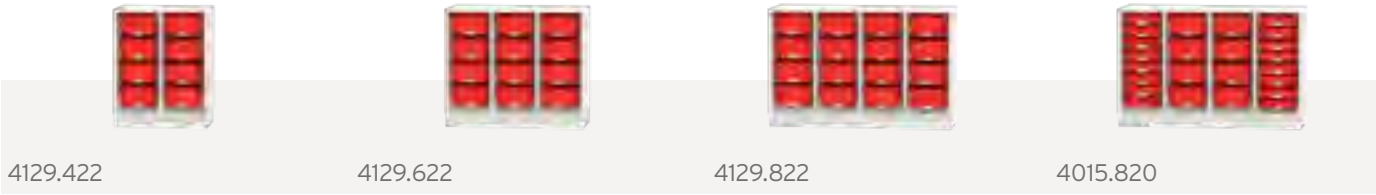

- Optionally mobile with 4 castors

SHELF WITH MIDDLE WALL

- Optionally mobile with 4 castors

WARDROBE SHELVES

- Fixed
- Including robust, recyclable Tidy Boxes in attractive colors with labeling field
- Compartments with 3 hooks for storing schoolbags, jackets and gym bags

PROPERTY LOCKERS

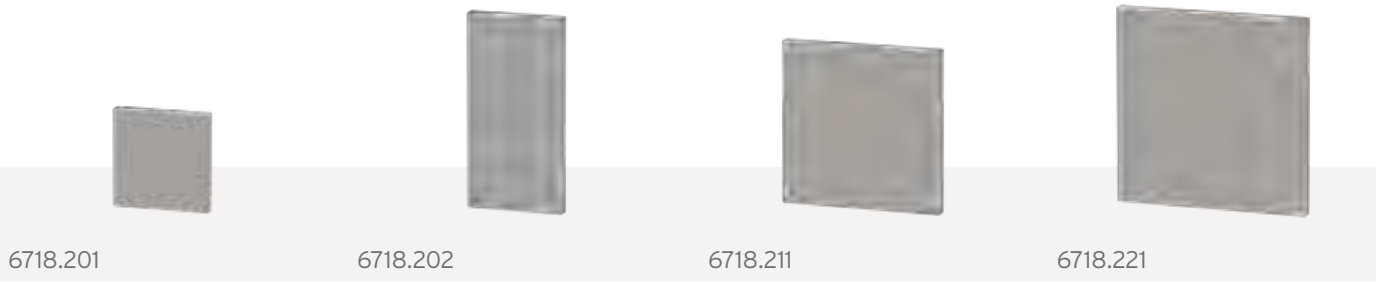

- Including robust, recyclable Tidy Boxes in attractive colors with labeling field
- Optionally mobile with 4 castors

	NUMBER		MODEL
	1 x	4128.621	Base cabinet with 18 small Tidy Boxes
	1 x	4129.623	Base cabinet with 9 large Tidy Boxes
	2 x	4730.104	Top shelf for sliding panel system W x H x D 1042 x 1280 x 420 mm
	1 x	0288	Plinth front panel 2084 mm
	2 x	0290	End panel (depending on local conditions)
	1 x	6872	Aluminum guide rail top/bottom 2084 mm
	2 x	6814923	Sliding panel white/green (design as required)

WALL UNIT WITH SLIDING PANEL SYSTEM

- Easily removable sliding panels for working at the table
- Shelves and Tidy Boxes for plenty of storage space

ACOUSTICS

TEXTILE ACOUSTIC ELEMENTS SERIES

- Particularly durable thanks to removable and washable covers
- Clean mounting with stable mounting plate, screwed together
- Pleasant room acoustics due to maximum absorption performance (absorption factor = 1)
- Different sizes and fabric colors allow for clever integration into any learning area

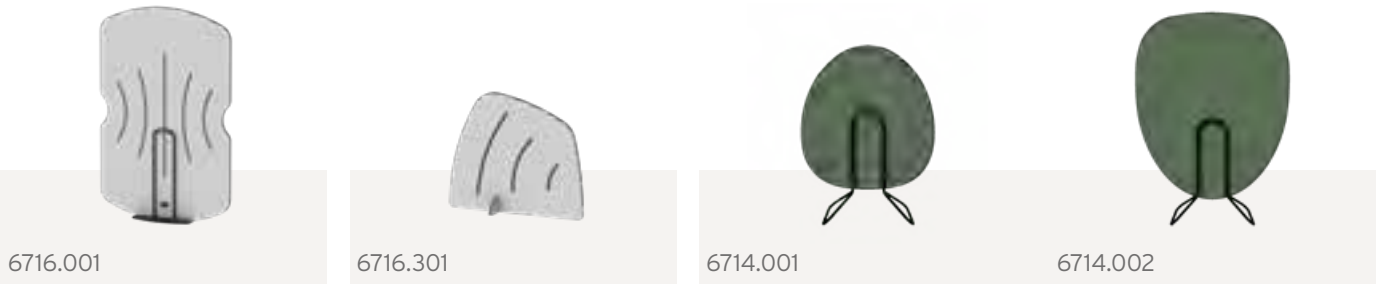

COMBI ACOUSTIC PARTITION WALL SERIES

- Sound-absorbing
- Tool-free interlinking of up to 4 walls at one point, at different angles of degree
- Rotatable extension arm with plastic feet and optionally with castors

JUNIOR ACOUSTIC PARTITION WALL SERIES

- Sound-absorbing
- Stable and firm
- Made from 3-ply recycled PET felt
- Available in widths of 60 cm and 120 cm
- Easy to move and stow away to save space

ACOUSTIC FELT PARTITION WALL

- Sound-absorbing
- Stable and firm
- Easy to move and stow away to save space

FELT TABLE DIVIDER

- Sound-absorbing
- Space-saving storage thanks to the fact it can be dismantled
- Can be used as a privacy screen on tables

ACOUSTIC ELEMENTS SERIES IN SHEET FORM

- Sound-absorbing
- Stable and firm
- Easy to move and stow away to save space

BOARDS

DURAVISION INTERACTIVE DISPLAY

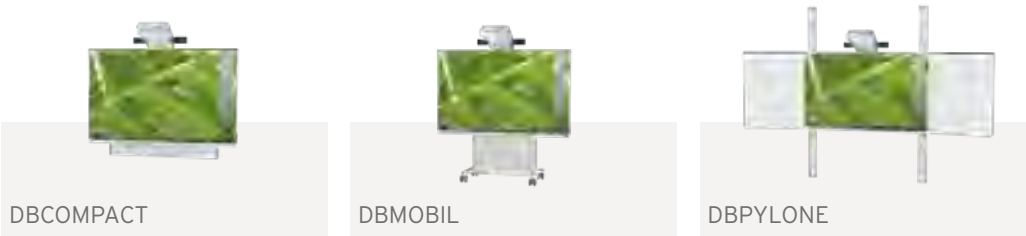

- Wall-mounted
- Electrically or manually height-adjustable
- Diagonal: 75" | 86"
- Optionally with whiteboard wings

DURAVISION INTERACTIVE DISPLAY

- Mobile
- Electrically or manually height-adjustable
- Diagonal: 75" | 86"
- Optionally with whiteboard wings

DURAVISION INTERACTIVE DISPLAY

- Wall-mounted
- Pylon guide, height adjustable
- Diagonal: 75" | 86"
- Standard with whiteboard wings

DURABOARD DIGITAL BOARD

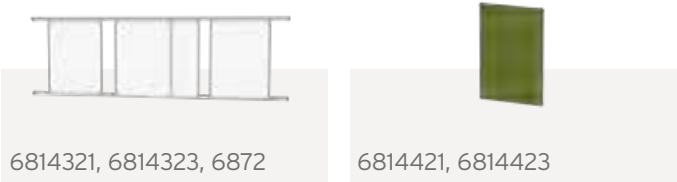

- Wall-mounted
- Interactive writing surface with optional whiteboard wings
- Height adjustable
- Surface area: 2 m x 1.20 m

DURABOARD DIGITAL BOARD

- Mobile
- Interactive writing surface without wings
- Height adjustable
- Surface area: 2 m x 1.20 m

DURABOARD DIGITAL BOARD

- Wall-mounted
- Pylon guide, height adjustable
- 4 writing surfaces (1 m x 1.20 m), one interactive center surface (2 m x 1.20 m)

SLIDING PANEL SYSTEM

- Wall-mounted
- Magnetic and writable sliding boards, optionally in green/white

SLIDING PANEL

- Available in 2 sizes
- Optionally with WOOL fabric covering in 3 colors
- Pinnable

WORLDS OF COLOR
LET'S GET COLORFUL

Colors play an important role in interior design: They give structure to spaces, provide orientation and shape the atmosphere. The choice of colors poses challenges for many schools – including different individual preferences or existing floor and wall colors. But there are a few clues that can provide orientation in the color wheel.

Warm colors such as red and orange tones are considered communication-enhancing and stimulating. They are used in rooms for concentrated learning, but also for meetings and informal exchanges. Young children in particular often prefer warmer colors in classrooms. At the same time, orange tones also warm rooms with little sunlight. If the room is already colorful enough, the furnishings can balance this out with neutral colors and bring a sense of calm.

OUR SERVICE

With a watchful eye and an open ear, we accompany you through every project phase.

ROOM PLANNING

With realistic designs, our spatial planning allows you to experience your future learning environments.

DELIVERY

Together with our logistics partners, we deliver the learning furniture well coordinated.

SUPPORT

Our service team is on hand to answer your questions about product maintenance, spare parts and repairs.

CONSULTING

Our specialist consultants take time to customize rooms to your requirements.

PRODUCTION

With precision and care, our production manufactures the furniture for your learning spaces.

ASSEMBLY

When assembling the learning furniture, our fitters ensure that everyday school life can continue undisturbed.
